## CS0-003 New Real Exam, CS0-003 Latest Braindumps Ppt

Our products are global, and you can purchase CS0-003 training guide is wherever you are. Believe us, our CS0-003 exam questions will not disappoint you. Our global users can prove our strength in this career. Just look at the hot hit on the website and you can see how popular our CS0-003 Study Materials are. And the numerous of the grateful feedbacks from our worthy customers as well as the high pass rate as 98% to 100%. What are you waiting for? Just rush to buy our CS0-003 preparation quiz!

## CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

The security team is reviewing a list of vulnerabilities present on the environment, and they want to prioritize the remediation based on the CVSS v4.0 metrics:

Which of the following vulnerabilities should the security manager request to fix first?

- A. System D
- B. System C
- C. System A
- D. System B
- E. System E

**Answer: A**

Explanation:

The vulnerability on System D has the most severe combination of base metrics: it is exploitable over the network with low complexity, requires only low privileges, and no user interaction. Its exploit maturity is also above "unknown" (functional), indicating real, working exploit code exists.

This combination makes it the highest-priority issue to remediate first.

#### NEW QUESTION # 42

A company's security team is updating a section of the reporting policy that pertains to inappropriate use of resources (e.g., an employee who installs cryptominers on workstations in the office). Besides the security team, which of the following groups should the issue be escalated to first in order to comply with industry best practices?

- A. Law enforcement
- **B. Legal department**
- C. Board member
- D. Help desk

**Answer: B**

#### NEW QUESTION # 43

A security analyst must assist the IT department with creating a phased plan for vulnerability patching that meets established SLAs. Which of the following vulnerability management elements will best assist with prioritizing a successful plan?

- A. Annual recurrence
- **B. Risk score**
- C. Mitigation strategy
- D. Affected hosts

**Answer: B**

#### NEW QUESTION # 44

While reviewing web server logs, a security analyst discovers the following suspicious line:

Which of the following is being attempted?

- A. Remote file inclusion
- B. Server-side request forgery
- **C. Command injection**
- D. Reverse shell

**Answer: C**

Explanation:

The suspicious line in the web server logs is an attempt to execute a command on the server, indicating a command injection attack.

#### NEW QUESTION # 45

Alerts from the security dashboard are reporting a cloud-based host is suspected to be corrupt.

The OS is not loading. The initial investigation concludes that the OS files were modified. Which of the following security controls provided the report?

- A. DLP
- B. NIDS
- C. API gateway
- **D. FIM**

**Answer: D**

Explanation:

File Integrity Monitoring alerts when critical system files are changed, which aligns with the report that the OS files on the cloud host were modified and are now corrupt.

**NEW QUESTION # 46**

.....

Our CS0-003 guide torrent is compiled by experts and approved by the experienced professionals. They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood to make any learners have no learning obstacles and our CS0-003 study questions are suitable for any learners. Our CS0-003 study questions are linked tightly with the exam papers in the past and conform to the popular trend in the industry. Our product convey you more important information with less amount of the questions and answers. Thus we can be sure that our CS0-003 guide torrent are of high quality and can help you pass the exam with high probability.
