Salesforce Health Cloud Accredited Professional Sample Questions (Q55-Q60):

NEW QUESTION # 55
A sales Representative wants to request a Rep-to-Rep Transfer. What two paths are available to request the transfer? (Choose two)

- A. The transfer can be requested while creating an Order Authorization for a Visit.
- B. During Visit creation you can request the transfer while selecting products required for a visit.
- C. To Request the transfer, navigate to product, then choose the specific inventory location against which to request the transfer.
- D. Under visit, choose to navigate to visit Products.

Answer: B,C

NEW QUESTION # 56
Bloomington Caregivers has configured the Provider Network Management add-on license. Some of the users are reporting that they are unable to access some of the new functionality.
Which two permission sets should an administrator ensure are assigned so the users can access Provider Network Management? Choose 2 answers

- A. Health cloud Foundation permission set
- B. Health Cloud Standard permission set
- C. Provider Network Management permission set
- D. Health Cloud Utilization Management permission set

Answer: B,C

Explanation:
To ensure that users can access the functionalities of the Provider Network Management add-on in Salesforce Health Cloud, administrators must assign the appropriate permission sets.
Required Permission Sets:
Provider Network Management Permission Set (Answer C):
Purpose: Grants users access to features specific to managing provider networks, including adding providers, managing contracts, and overseeing network adequacy.
Health Cloud Standard Permission Set (Answer D):
Purpose: Provides users with baseline access to Health Cloud features, ensuring they can interact with core health-related data and functionalities.
Implementation Steps:
Assign Permission Sets to Users:
Navigate to the user's detail page in Salesforce Setup.
In the Permission Set Assignments section, click Edit Assignments.
Select **Provider

NEW QUESTION # 57
An administrator for Health Cloud wants to ensure that the files in their full sandbox instance are encrypted.
Which encryption solution supports the encryption of files in this scenario?

- A. Salesforce Shield
- B. salesforce Data Mask

- C. Industry Data Security
- D. Classic Encryption

Answer: A

Explanation:
Step-by-Step Explanation:
* Requirement:
* Encrypt files in a full sandbox instance.
* Salesforce Shield Platform Encryption:
* Provides encryption of files and attachments at rest across Salesforce environments (including sandboxes).
* "Use Shield Platform Encryption to encrypt files and attachments stored in Salesforce, including those in sandbox environments."-Salesforce Shield Platform Encryption Guide
* Other Options:
* Classic Encryption:Only encrypts a limited set of standard fields, not files or attachments.
* Salesforce Data Mask:Masks data for sandbox use, but does not encrypt files for runtime.
* Industry Data Security:Not a Salesforce product for file encryption.

Shield Platform Encryption Guide

NEW QUESTION # 58
Care managers at Bloomington Caregivers call patients after they are discharged from a hospital to ask a series of questions, which the care manager enters Into Health Cloud, The patient Is then automatically assigned a personalized care plan based on the answers they provided.
Which two capabilities should a consultant leverage together to fulfill this requirement?
Choose 2 answers

- A. Care Programs
- B. Integrated Care Management
- C. Salesforce Surveys
- D. Discovery Framework

Answer: B,C

Explanation:
To fulfill the requirement of assigning a personalized care plan based on responses from a questionnaire, the following capabilities should be leveraged:
Salesforce Surveys (C):
Facilitates the creation of custom questionnaires.
Enables care managers to record patient responses directly within Salesforce.
Integrated Care Management (B):
Uses care plans to define problems, goals, and interventions.
Automatically assigns personalized care plans based on survey responses via automation (e.g., Flows or OmniScripts).
How These Work Together:
Step 1: Care managers use Salesforce Surveys to record patient responses post-discharge.
Step 2: A configured automation (e.g., Flow) processes these responses and assigns the appropriate care plan using Integrated Care Management.
Why Other Options Are Incorrect:
A . Care Programs: Focuses on managing care program enrollments, not care plan automation.
D . Discovery Framework: Helps manage patient needs and goals but does not handle surveys or care plan assignments.

Integrated Care Management Overview

NEW QUESTION # 59
In which two ways can an administrator ensure that Patient Risk scores are recalculated periodically? (Choose Two.)

- A. Setup a scheduled Apex batch job.
- B. Setup a Apex batch job and run the job manually

- C. Use a third party API to recalculate CMS risk score
- D. Create a Healthcare Provider enrollment flow.
- E. Use the CMS recalculation API

Answer: A,B

Explanation:
Explanation
Reference and details below.

Calculate Referral Scores

Calculate referral scores with a batch Apex job.

Referral scores are based on the Total Referrals and Converted Referrals fields on the referring practitioner's contact record. The calculated score appears in the Referrer Score field.

Use the scheduled job class name: `HcReferrerScoreScheduledJob`. To invoke Apex classes to run at specific times, first implement the `Schedulable` interface for the class. Then, schedule an instance of the class to run at a specific time using the `System.schedule` method.

👁 Example: To run the `HcCMSRiskScoringScheduledJob` class once, select **Debug | Open Execute Anonymous Window**. Enter the following text in the Enter Apex Code window in Developer Console.

```
// scheduled job sample
int batchSize = 200;
SchedulableContext sc = null;
HcReferrerScoreScheduledJob scheduledJob = new HcReferrerScoreScheduledJob(batchSize);
scheduledJob.execute(sc);
```

NEW QUESTION # 60
......
