あなたへの紹介よりあなたに自分で体験させたほうがいいと思います。弊社のFast2testで無料でOracleの1Z0-1126-1ソフトのデモを直ちにダウンロードできます。我々豊富な経験があるグループはあなたに一番信頼できるOracleの1Z0-1126-1試験のための資料を提供いたします。我々係員は全日24時間で待っていますから、何か疑問があれば、お問い合わせを期待しています。

Oracle 1Z0-1126-1 認定試験の出題範囲:

トピック	出題範囲

トピック 1	Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.
トピック 2	Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.
トピック 3	Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
トピック 4	Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.
トピック 5	Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 認定 1Z0-1126-1 試験問題 (Q16-Q21):

質問 # 16

Preparing end users to look for help in OGL and preparing support contacts to guide users with OGL are best practices during which activity?

- A. Refine phase
- B. OGL kickoff
- C. Hypercare

正解: C

解説:

Hypercare, the post-launch support period, is when best practices like preparing end users to use OGL's help features and training support contacts to assist with OGL are implemented. This phase focuses on smoothing the transition to live use, ensuring users know where to find assistance and support staff are equipped to guide them. The Refine phase (option A) is for content optimization, not user preparation, and the OGL kickoff (option B) is for project initiation, not post-launch support. Hypercare's emphasis on immediate user enablement and support readiness makes it the ideal context for these activities, ensuring a seamless go-live experience.

質問 # 17

What can information from the Application dashboard be used for?

- A. Identify high-usage days to launch messages.
- B. Deliver a full picture on the types of content.
- C. Show decision-makers' feedback from end users.

正解: A

解説:

The Application dashboard in OGL provides data on application usage patterns, such as peak times or high-traffic days, which can be leveraged to strategically launch messages or notifications when users are most active (option A). This timing optimization enhances visibility and engagement. Option B (types of content) aligns with the Content dashboard, not Application, while option C (feedback) pertains to the Feedback dashboard. The Application dashboard's focus on usage trends rather than content specifics or feedback makes it a tactical tool for communication planning, ensuring messages reach users at optimal moments based on their interaction habits.

質問 # 18

In the Focus phase, which activity is the responsibility of the Functional Consultant?

- A. Collaborate with business process owners to customize OGL templates relevant to the client's application customization
- B. Complete relevant digital learning through online training resources and tools to become familiar with OGL content development
- C. Sign off on OGL content items to signal that content is ready for publishing and end-user consumption

正解: A

解説:

During the Focus phase, which centers on aligning OGL with business needs, the Functional Consultant's role is to collaborate with business process owners to customize OGL templates (option C). This ensures content reflects the client's specific application customizations, enhancing relevance and usability. Signing off on content (option A) typically falls to project managers or content approvers in later phases like Refine, while completing digital learning (option B) is a preparatory step, not a core Focus-phase duty. The Functional Consultant's expertise in business processes and application configuration makes them pivotal in tailoring templates, bridging technical and operational requirements effectively.

質問 # 19

Which status indicates that content will be seen in Production?

- A. Inactive
- B. Archived
- C. Published
- D. Draft

正解: C

解説:

In OGL, only content with the "Published" status is visible in the Production environment. Inactive (option A) content is disabled, Draft (option B) is in development, and Archived (option C) is stored but not active. Publishing content makes it available to end users in the live system, aligning with OGL's content lifecycle management.

質問 # 20

During which stage in the OGL deployment approach will you begin reviewing, selecting, and customizing OGL content to align with business needs and strategic objectives?

- A. Mature
- B. Refine
