Which of the following is the responsibility of AWS?

- A. Patching guest operating systems
- B. Configuring security settings on Amazon EC2 instances
- C. Setting up AWS Identity and Access Management (IAM) users and groups
- **D. Physically destroying storage media at end of life**

答案: D

解題說明:

Media storage devices used to store customer data are classified by AWS as Critical and treated accordingly, as high impact, throughout their life-cycles. AWS has exacting standards on how to install, service, and eventually destroy the devices when they are no longer useful. When a storage device has reached the end of its useful life, AWS decommissions media using techniques detailed in NIST 800-88.

Media that stored customer data is not removed from AWS control until it has been securely decommissioned.
