AD0-E124 Test Collection Pdf | Latest AD0-E124 Exam Questions

We want to provide our customers with different versions of AD0-E124 test guides to suit their needs in order to learn more efficiently. Our AD0-E124 qualification test can help you make full use of the time and resources to absorb knowledge and information. If you are accustomed to using the printed version of the material, we have a PDF version of the AD0-E124 study tool for you to download and print, so that you can view the learning materials as long as you have free time. If you choose to study online, we have an assessment system that will make an assessment based on your learning of the AD0-E124 qualification test to help you identify weaknesses so that you can understand your own defects of knowledge and develop a dedicated learning plan. Moreover our AD0-E124 test guides provide customers with supplement service-mock test, which can totally inspire them to study hard and check for defects during their learning process. Our commitment is not frank, as long as you choose our AD0-E124 study tool you will truly appreciate the benefits of our products.

Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q156-Q161):

NEW QUESTION # 156

A DevOps engineer notices that an application's OSGi bundles included in AEM content package under /apps/<appname>/install does not get updated when the package is installed.

What prevents the bundle from being updated?

- A. The bundle's OSGi Dependencies are not fulfilled.
- **B. A higher version of the bundle is already installed.**
- C. The bundle is a -SNAPSHOT version.
- D. The bundle should be included in a runmode dedicated install folder.

Answer: B

NEW QUESTION # 157

Which Cloud Manager pipeline type is used for deploying code to AEM as a Cloud Service?

- A. Full Stack Pipeline
- B. Stage Deployment Pipeline
- C. Content Pipeline
- D. Production Deployment Pipeline

Answer: A

NEW QUESTION # 158

Which file is primarily responsible for managing caching rules in AEM Dispatcher?

- A. sling.properties
- B. dispatcher.any
- C. repository.xml
- D. httpd.conf

Answer: B

NEW QUESTION # 159

A DevOps engineer is supporting a client on Adobe Managed Services. The setup will be migrated to AEM as a Cloud Service. Which two methods can be applied for scaling publish instances on the current platform? (Choose two.)

- A. Manual scaling via the Adobe I/O CLI vertically
- B. Manual scaling via Cloud Manager horizontally
- C. Manual scaling via CSE horizontally
- D. Auto scaling via Cloud Manager vertically
- E. Auto scaling via Cloud Manager horizontally

Answer: B,C

Explanation:

This question draws a technical comparison between how scaling works on the legacy Adobe Managed Services (AMS) platform versus the target AEM as a Cloud Service (AEMaaS) platform. On the current legacy AMS platform, horizontal scaling (adding more instances) requires submitting a ticket to a Customer Success Engineer (CSE) to provision and attach new VMs manually (Option E). By contrast, on AEM as a Cloud Service, publish instances scale automatically (Auto scaling) horizontally via Cloud Manager based on live traffic thresholds, or can be scaled via Cloud Manager logic (Option A represents the target platform's cloud-native scaling methodology, though standard AEMaaS implies Auto scaling; Cloud Manager orchestrates this).

NEW QUESTION # 160

A DevOps engineer is called in to resolve a repeated performance issue. A problem is occurring with the Author performance due to a resource allocation. The AEM platform is set up using the cold-standby Author cluster with the same resources allocation as the primary.

What should the DevOps engineer do?

- A. Run an online-compaction on the primary Author.
- B. Enable the cold-standby Author as primary.
- C. Upscale the Author instance size.

Answer: C

Explanation:

If an AEM Author instance is consistently suffering performance degradation due to "resource allocation" (meaning it is starved for CPU or Memory under its current workload), failing over to the cold-standby instance will not solve the problem, because the standby has the exact same resource limitations. Compaction is a maintenance task for disk size, not a direct fix for resource

starvation. The correct architectural response to constant resource starvation on a single-node system (like a primary author) is to vertically scale-upscale the Author instance by provisioning a larger Virtual Machine with more CPU cores and RAM.

NEW QUESTION # 161

.....

Memorizing these Adobe Experience Manager DevOps Engineer Expert AD0-E124 valid dumps will help you easily attempt the Adobe AD0-E124 exam within the allocated time. Thousands of aspirants have passed their Adobe AD0-E124 Exam, and they all got help from our Adobe Experience Manager DevOps Engineer Expert AD0-E124 updated exam dumps. For successful preparation, you can also rely on AD0-E124 real questions.
