Pass Guaranteed Quiz 2026 C-TADM-23: Certified Technology Consultant - SAP S/4HANA System Administration Authoritative Boot Camp

If you are going to look for C-TADM-23 exam braindumps, you may pay more attention to the quality as well as the pass rate. C-TADM-23 training materials are edited by experienced experts, and therefore the quality can be guaranteed. With the pass rate reaching 98.65%, our C-TADM-23 exam materials have received many good feedbacks from candidates. Besides, C-TADM-23 Exam Materials cover most of knowledge points for the exam, and you can master them well through practicing as well as improve your ability in the process of training. We offer you free update for 365 days, and the update version for C-TADM-23 exam dumps will be auto sent to you.

SAP Certified Technology Consultant - SAP S/4HANA System Administration Sample Questions (Q41-Q46):

NEW QUESTION # 41

What action(s) can you perform in the SAP HANA cockpit to back up the complete database system?

- A. Back up the system using a fallback snapshot for every database
- **B. Back up the system database and all tenant databases individually.**
- C. Back up the system using a data snapshot.
- D. Back up the system database and all tenant databases in one step

Answer: B

Explanation:

In SAP S/4HANA, the SAP HANA cockpit provides a comprehensive toolset for managing and monitoring the SAP HANA database. One of the critical tasks that can be performed through the SAP HANA cockpit is the backup of the database system.

* A. Back up the system database and all tenant databases individually: This approach allows administrators to perform backups of the system database and each tenant database separately. This granular control is crucial for large environments where different databases may have different backup requirements or schedules. By backing up databases individually, administrators can tailor the backup strategy to meet the specific needs of each database, ensuring optimal performance and minimizing disruption.

This method provides flexibility and allows for targeted backups, which is particularly useful in multi-tenant environments where databases may have varying levels of criticality and data change rates.

NEW QUESTION # 42

In the role maintenance transaction (PFCG) of an AS ABAP-based SAP system, which step grants the authorizations of a role to a user master record?

- A. Save the role
- **B. Perform a user comparison**
- **C. Generate the profile**
- D. Assign a user to the role

Answer: B,C

NEW QUESTION # 43

What is the definition of "Transport Group" in Transport Management System (TMS)?

- A. A collection of SAP systems that are controlled by the same transport domain controller
- B. A collection of SAP systems that are connected by transport routes
- C. A collection of SAP systems that share the same transport directory
- D. A collection of SAP systems that are assigned to the same transport target group

Answer: C

Explanation:

In the Transport Management System (TMS) of SAP, a "Transport Group" is defined as:

* C. A collection of SAP systems that share the same transport directory: A Transport Group in TMS groups together SAP systems that utilize a common transport directory. This shared directory serves as the central repository for all transport requests and files for the systems within the group. By sharing a transport directory, these systems can efficiently manage and execute transport requests across the landscape, ensuring consistency and streamlining the transport process.

This concept is fundamental in TMS to organize and manage transports in complex SAP landscapes, particularly in scenarios involving multiple systems with interdependencies or shared development and configuration efforts.

NEW QUESTION # 44

You want to set up a printer locally on a Microsoft Windows-based AS ABAP. Which host spool access method must you use?

- A. G
- B. C
- C. U
- D. L

Answer: B
