PMI Agile Certified Practitioner (PMI-ACP)® Sample Questions (Q436-Q441):

NEW QUESTION # 436

Following chart lists stories for a release of an Agile project;

Story	Story Points
A	4
B	5
C	6
D	5
E	4
F	6
G	1

If the team completes Story A, Story B, and 50% of Story C for the first iteration, what is the team's velocity?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

NEW QUESTION # 437

A team working with a new technology faces a significant amount of uncertainty about its ability to deliver stories due to technical issues. What should the team do?

- A. Seek guidance from the development manager
- **B. Capture risks and make them visible, and use a burn down chart to focus on reducing risks early in the project.**
- C. Ask the scrum master to extend the sprint's duration to allow more time to work through technical issues.
- D. Place the impacted stories on the story board, and use daily stand ups to make the product owner aware of the technical issues.

Answer: B

NEW QUESTION # 438

To: Team Manager
From: Agile Project Lead
Subject: Re: Initiative status as of today

Hi Team Manager,

Here is the initiative information you requested for the monthly review.

Backlog

User Story Title	Estimate in Story Points	Minimum Viable Product (MVP)?		Status
		Yes	No	
New log-in screen	6	Yes	Yes	Complete
Save passwords	4	Yes	Yes	Complete
Defect fixing – triaged top 10	8	No	No	Not Started
Accessibility – color blind	4	Yes	No	Not Started
Increase security	21	Yes	No	Not Started
Shopping cart	7	No	No	Not Started
Accept credit card payments	5	No	No	Not Started
Accept bank drafts	9	No	No	Not Started
New sort order	3	No	No	Not Started
Add AI chatbot	5	Yes	No	Not Started

MVP Remaining Story

Risk Register

#	Title	Summary	Impact
1	Defect backlog size	Significant number of known defects exist, but not all will be addressed in the MVP	Defects prioritized with product owner and top 10 defects will be addressed. Remaining defects will be prioritized in future initiative.
2	Holiday Impact	Burn for April expected to decrease due to holiday schedule	Expected reduction of 1 story point of burn for sprints 4 through 6. Then return to normal burn.
3	Regulation Changes	Proposed government regulations might be enacted which would cause rework in the project.	Team chose to watch this risk and not take action at this time. Not likely to impact MVP.
4	Team Morale	Our project team feels that their value to the company is tied to the value of the initiative they are working on.	No impact to current velocity or initiative. Will need to monitor.

Thanks,
Agile Project Lead

The manager of the team is responsible for delivering a specific initiative within the organization. They are preparing for the monthly project review meeting, where they will present the current state of this initiative.

The agile project lead sends the manager the following email with the initiative's current status.

Which summaries are correct and will be presented during the monthly project review? (Refer to the email and exhibits to the Team Manager)

- A. MVP has 30 remaining story points; MVP will complete at the end of sprint 8; with no other deviations, the entire backlog will complete at the end of sprint 15.
- **B. MVP has 30 remaining story points; MVP will complete at the end of sprint 9; with no other deviations, the entire backlog will complete at the end of sprint 16.**
- C. MVP has 25 remaining story points; MVP will complete at the end of sprint 9; with no other deviations, the entire backlog will complete at the end of sprint 16.
- D. MVP has 25 remaining story points; MVP will complete at the end of sprint 8; with no other deviations, the entire backlog will complete at the end of sprint 15.

Answer: B

Explanation:

Step 1: Identifying Remaining MVP Story Points

From the backlog, the MVP-related stories that are not started include:

Accessibility - color blind (4 story points)

Increase security (21 story points)

Add AI chatbot (5 story points)

Total remaining MVP story points = $4 + 21 + 5 = 30$

Step 2: Projected Sprint Completion

MVP Completion: The risk register mentions a burn reduction for sprints 4-6 due to holiday schedules.

If the burn rate is consistent after sprint 6, the MVP will be completed by sprint 9.

The entire backlog is projected to complete by sprint 16 assuming no further deviations.

NEW QUESTION # 439

On an agile project, it is important to identify and engage business stakeholders throughout the project and to ensure the team understands the stakeholders' business needs. Which option supports this idea?

- A. A project charter should be established and reviewed throughout the project life cycle to ensure the accurate documentation of stakeholders' interests and expectations.
- B. An Agile Manifesto should be created to document the project stakeholders, their desired outcomes, and identified risks.
- **C. A product backlog should be created to list the project requirements from all of the project stakeholders.**
- D. A user story should be created for all key stakeholders to list their individual business objectives and needs.

Answer: C

NEW QUESTION # 440

During a review close to a product release, the customer spotted several features that will need to be changed.

What caused this to happen?

- **A. Reduced or improper customer collaboration.**
- B. Reduced or improper release planning.
- C. Reduced or improper product specification.
- D. Reduced or improper product knowledge by the development team.

Answer: A
