The Chrome-Enterprise-Administrator desktop-based practice software has an easy-to-use interface. You will become accustomed to and familiar with the free demo for Google Chrome-Enterprise-Administrator Exam Questions. Exam self-evaluation techniques in our Chrome-Enterprise-Administrator desktop-based software include randomized questions and timed tests. These tools assist you in assessing your ability and identifying areas for improvement to pass the Professional Chrome Enterprise Administrator Certification Exam exam.

New developments in the tech sector always bring new job opportunities. These new jobs have to be filled with the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) certification holders. So to fill the space, you need to pass the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam. Earning the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) certification helps you clear the obstacles you face while working in the Google field. To get prepared for the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) certification exam, applicants face a lot of trouble if the study material is not updated. They are using outdated materials resulting in failure and loss of money and time.

Chrome-Enterprise-Administrator Reliable Exam Practice - Reliable Chrome-Enterprise-Administrator Exam Guide

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. Chrome-Enterprise-Administrator practice materials are an effective tool to help you reflect your abilities. We also hire a team of experts, and the content of Chrome-Enterprise-Administrator question torrent is all high-quality test guidance materials that have been accepted by experienced professionals. Chrome-Enterprise-Administrator practice materials will be the most professional and dedicated tutor you have ever met.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48
How often do extensions update"?

- A. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- B. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- C. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- D. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store

Answer: D

Explanation:
Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

NEW QUESTION # 49
A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles Company
- Employees
- Users
- Contractors
If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Employees OU
- B. Create a Managed Browsers OU nested under the Users OU
- C. Create a Managed Browsers OU nested under the Contractors OU
- D. Create a Managed Browsers OU nested under the Company OU

Answer: D

Explanation:
To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply policies at the user profile level), creating a separate OU at the top level (under "Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same

managed browser.

NEW QUESTION # 50
A company uses Chrome Enterprise Core to manage Chrome browsers for its employees and contractors who share devices They need a way to ensure the following:
* Full-Time Employees (FTEs) can only see and use extensions assigned to them
* Contractors can only see and use extensions assigned to them
* Both FTEs and contractors have access to a set of shared extensions
How can the Chrome administrator configure Chrome Enterprise Core to achieve this'?

- A. Ask users to install all the extensions they need on the shared device
- B. Create separate groups in the Google Admin Console for FTEs and Contractors. Assign extensions to respective groups based on their needs
- C. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Use Group Policy Objects to assign specific extensions by user group
- D. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Create a separate group in the Google Admin Console for FTEs. Assign extensions to the group based on their needs

Answer: D

Explanation:
The most effective way to manage extensions in this scenario is to use a combination of OUs and groups.
Create an OU for the shared devices and force-install the shared extensions at this OU level. Then, create separate user groups for FTEs and Contractors in the Google Admin console and force-install their specific extensions to these groups. User group policies have a higher precedence than OU policies, ensuring the correct extensions are available to each user type when they sign in to the shared devices. Option A mentions Group Policy Objects, which are for Windows environments and less relevant in a cloud-managed scenario across potentially different OSes. Option B doesn't address the shared device aspect effectively. Option C is not a managed approach.

NEW QUESTION # 51
A user reports having frequent issues accessing corporate pages and logging into corporate applications After looking into user reports, it is determined that other users have reported similar issues over the past few months While the broader investigation is launched to identify and resolve the root cause, which Google Admin remote actions for managed Chrome browsers can be used to help alleviate such issues for the user?

- A. Clear Cache and Cookies; Delete Temporary Files; Restart User Session
- B. Clear Cache; Clear Cookies; Clear Cache and Cookies
- C. Clear Cookies; Restart Browser; Logout User
- D. Clear Cache; Delete Temporary Files; Delete Swap File

Answer: B

Explanation:
Clearing the browser's cache and cookies is a common first-line troubleshooting step for issues related to website access and login problems. Outdated or corrupted cached data and cookies can often interfere with website functionality and authentication processes. The Google Admin console provides remote actions to
"Clear Cache," "Clear Cookies," or both. Options B, C, and D include actions that are either more disruptive (restart browser, logout user, restart user session) or not standard remote actions available for managed Chrome browsers through the Admin console (delete temporary files, delete swap file).

NEW QUESTION # 52
An organization experiences a recent surge in account takeovers and suspicious activity Upon investigation a security team discovers that employees are falling victim to infostealer malware specifically designed to target Chrome browser cookies This malware is spreading through phishing emails and compromised websites, and it is capable of stealing session cookies, login credentials,and other sensitive information stored in the browser Which measure can an administrator implement using Chrome Enterprise Core to mitigate the risks posed by cookie theft?

- A. Require Enhanced Safe Browsing and enable Application Bound Encryption
- B. Disallow Chrome Sync and Require Incognito mode
- C. Invalidate user's session cookies and tokens by resetting the sign-in cookies from the Google Admin console
- D. Block the use of third-party cookies

Answer: A

Explanation:
To combat cookie theft from infostealer malware, requiring "Enhanced Safe Browsing" provides proactive protection against malicious websites and downloads that might distribute such malware. Enabling
"Application Bound Encryption" adds an extra layer of security to cookies and other sensitive data stored by Chrome, making them harder for malware to use even if stolen. Blocking third-party cookies (option A) can improve privacy but doesn't directly prevent malware from stealing first-party session cookies. Invalidating existing cookies (option C) is a reactive measure and doesn't prevent future theft. Disallowing Chrome Sync and requiring Incognito mode (option D) changes user behavior but doesn't inherently protect against malware on the local machine.

NEW QUESTION # 53
......

As is known to all, for the candidates who will attend the exam, knowing the latest version is quite significant. Our Chrome-Enterprise-Administrator training materials are free update for 365 days after purchasing. And the updated version will be sent to your email address automatically by our system. Besides, our Chrome-Enterprise-Administrator Training Materials are verified by the skilled professionals, and the accuracy and the quality can be guaranteed. By using the Chrome-Enterprise-Administrator exam dumps of us, you can also improve your efficiency, since it also has knowledge points.

Chrome-Enterprise-Administrator Reliable Exam Practice: https://www.ipassleader.com/Google/Chrome-Enterprise-Administrator-practice-exam-dumps.html

You just need to spend your spare time to practice the Chrome-Enterprise-Administrator vce dumps, then you can solve all the problem in easiest way, It reflects the usefulness of our Chrome-Enterprise-Administrator training materials indirectly, What is more, you may think these high quality Chrome-Enterprise-Administrator preparation materials require a huge investment on them, At the same time, Chrome-Enterprise-Administrator practice engine will give you a brand-new learning method to review - let you master the knowledge in the course of the doing exercise.

In today's networks, Gigabit Ethernet campus backbones are the standard Vce Chrome-Enterprise-Administrator Format for new installations, On the Home screen, press and hold the Recent Apps key and tap the Wallpapers icon at the bottom of the screen.
