우리 KoreaDumps사이트에서 제공되는SAP인증C-BCBAI-2502시험덤프의 일부분인 데모 즉 문제와 답을 다운받으셔서 체험해보면 우리KoreaDumps에 믿음이 갈 것입니다. 우리KoreaDumps의 제품을 구매하신다고 하면 우리는 최선을 다하여 여러분들한테 최고의 버전을 제공함으로 한번에SAP인증C-BCBAI-2502시험을 패스하도록 하겠습니다. IT시험이라고 모두 무조건 외우고 장악하고 많은 시간을 투자해야만 된다는 사상을 깨게 될 것입니다.

최신 SAP Certified Associate C-BCBAI-2502 무료샘플문제 (Q48-Q53):

질문 # 48

What AI-driven functionalities does SAP Business AI offer?

There are 3 correct answers to this question.

Response:

- A. Conversational AI for customer interactions
- B. Legacy system processing without AI
- C. Machine learning automation
- D. Manual sales reporting
- E. Predictive analytics for decision-making

정답: A,C,E

질문 # 49

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Reduce sales outstanding
- B. Enforce compliance
- C. Simplify error resolution
- D. Guard against fraud
- E. Generate creative accounting solutions

정답: B,C,D

설명:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com "Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction

is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C_BCBAI_2502 certification materials.

질문 # 50

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI- powered solutions should they implement? Note: There are 3 correct answers to this question.

- A. SAP Cloud ERP
- B. SAP AI Business Services
- C. SAP BusinessObjects Planning
- D. SAP Predictive Analytics
- E. SAP Digital Manufacturing Cloud

정답: B,D,E

설명:

For a logistics company aiming to reduce delivery delays and optimize inventory management, SAP offers AI- powered solutions that enhance supply chain efficiency and forecasting. The correct answers are SAP AI Business Services, SAP Predictive Analytics, and SAP Digital Manufacturing Cloud, as these solutions directly address logistics challenges with AI-driven capabilities.

SAP documentation highlights: "Create a risk-resilient and sustainable supply chain with built-in AI that is connected and contextualized. Enabling you to predict customer demand and adjust to change." SAP AI Business Services provide reusable AI capabilities, such as machine learning for demand forecasting and anomaly detection, which help "optimize supply chain operations by analyzing real-time data and market trends." SAP Predictive Analytics, embedded in solutions like SAP S/4HANA, supports "predicting customer demand and adjusting inventory levels" to minimize delays and overstocking. SAP Digital Manufacturing Cloud leverages AI to "optimize production scheduling and inventory management," ensuring efficient logistics operations by integrating real-time data from manufacturing and supply chain processes.

The incorrect options-SAP BusinessObjects Planning and SAP Cloud ERP-are not primarily AI-driven for logistics. SAP BusinessObjects Planning focuses on financial planning and analytics, not logistics-specific AI applications. SAP Cloud ERP, while encompassing AI capabilities, is too broad and not specifically tailored to logistics compared to the selected solutions. SAP's case study on Henkel illustrates how AI in SAP Business Technology Platform enhances supply chain resilience, supporting the relevance of the chosen solutions.

질문 # 51

Which SAP AI tool provides businesses with chatbots for automated customer interactions? Please choose the correct answer.

- A. SAP Cloud ERP AI
- B. SAP Intelligent RPA
- C. SAP Business AI Core
- D. SAP Conversational AI

정답: D

설명:

SAP Conversational AI is the primary tool for providing businesses with chatbots to automate customer interactions, leveraging natural language processing for seamless communication. The correct answer is SAP Conversational AI, as it is explicitly designed for this purpose.

SAP documentation explains: "SAP Conversational AI, powered by Joule, enables businesses to deploy chatbots that automate customer interactions, answer inquiries, and enhance engagement through natural language processing." This tool supports "proactively finding answers to customer questions" and "turning prospects into customers using instant account insights," as seen in SAP Sales Cloud and SAP Service Cloud.

For example, Joule's conversational capabilities allow businesses to automate customer support, provide personalized responses, and integrate with business processes for efficient service delivery.

The incorrect options are not relevant to chatbots. SAP Business AI Core is a platform for developing and running AI models, not a chatbot solution. SAP Intelligent RPA automates repetitive tasks, not customer interactions. SAP Cloud ERP AI refers to AI capabilities within ERP systems, not specifically chatbots. SAP Conversational AI's role in customer experience, as evidenced by its integration with SAP Customer Experience solutions, confirms its suitability.

질문 # 52

(What are some ways that Joule revolutionizes how users can interact with SAP business systems? Note: There are 3 correct answers to this question.)

- A. Perfect predictions
- B. Better outcomes
- C. Better control
- D. Smarter insights
- E. Faster work

정답: B,D,E

설명:

Comprehensive and Detailed Explanation From Exact Extract: Joule revolutionizes user interactions with SAP business systems by delivering better outcomes through connected, cross-enterprise AI agents; providing smarter insights via context-aware, data-grounded responses; and enabling faster work by streamlining tasks and accelerating processes up to 80-90% more efficiently. These capabilities transform productivity, decision-making, and efficiency without claiming perfect predictions or enhanced control as primary revolutions.

Exact extracts supporting this:

"Joule revolutionizes how you interact with your SAP business systems, making every touch-point count and every task simpler."help.sap.com

"Faster Work: Streamline tasks with an AI ..."learning.sap.com"enables employees to work 80% more efficiently."community.sap.com For better outcomes and smarter insights: "Collaborative AI agents in Joule, working across the business to deliver connected, cross-enterprise outcomes" and "offer intelligent suggestions."news.sap.com sap.com Other options are incorrect because:

Option B: Better control is not emphasized as a revolutionary aspect; Joule focuses on simplification and automation rather than increased user control.

Option C: Perfect predictions are not claimed; SAP Business AI prioritizes reliable, data-grounded insights over infallible predictions.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP product page "Joule Copilot from SAP" and SAP Learning course "Discovering SAP Business AI," explaining key capabilities like faster work, smarter insights, and better outcomes. Additional support from SAP News articles on Joule, positioned within the C_BCBAI_2502 certification for articulating Joule's transformative role in SAP Business Suite interactions.

질문 # 53

.....

KoreaDumps에서 출시한 SAP인증C-BCBAI-2502 덤프는 시험문제점유율이 가장 높은 시험대비자료입니다. 실제 SAP인증C-BCBAI-2502시험문제유형과 같은 형식으로 제작된SAP인증C-BCBAI-2502 시험공부자료로서 KoreaDumps덤프의 실용가치를 자랑하고 있습니다.덤프를 공부하여 시험불합격하시면 덤프비용은 환불처리해드립니다.
