#### NEW QUESTION # 52

When you have created a new custom field and marked it as reportable, saved and published your changes, but the field does not show up in reports. How can you resolve the issue?

- A. You did not assign the custom field to the appropriate report category.
- **B. Run the "Retrieve flexible fields metadata for reporting" task under Reporting Manager.**
- C. Wait 2 hours for the schema to refresh automatically.
- D. Custom fields must be created in the same module where reports are generated.

**Answer: B**

**Explanation:**

After publishing a custom reportable field, the "Retrieve flexible fields metadata for reporting" task must be run to update the reporting schema with the new field metadata. Without this manual step, the reports do not recognize the new field despite it being published. The system does not perform automatic timed refreshes of the schema. Module location or report category assignment is not a

prerequisite for report visibility in SAP Ariba's analytics.
