問題 #76

Which of the following is a business partner category for Business Partner master data in SAP S/4HANA Cloud Public Edition?

Note: There are 2 correct answers to this question.

- A. Organization
- B. Supplier
- C. Person
- D. Customer

答案: A,C

解題說明:

In SAP S/4HANA Cloud Public Edition, the Business Partner (BP) master data is used to manage relationships with entities such as customers, suppliers, and other stakeholders. The business partner category defines the type of business partner being created.

* Organization (Option C): The "Organization" category is used for legal entities such as companies, vendors, or customers. It represents a group or entity that can engage in business transactions. The SAP Business Partner Master Data Guide confirms that "Organization" is a valid business partner category.

* Person (Option D): The "Person" category is used for individuals, such as employees, contacts, or representatives of an organization. This category is essential for managing personal details and relationships. The same SAP Business Partner Master Data Guide lists "Person" as a valid business partner category.

* A. Supplier: While suppliers are managed as business partners, "Supplier" is not a business partner category. Instead, it is a role assigned to a business partner within the system.

* B. Customer: Similarly, "Customer" is a role assigned to a business partner, not a business partner category.

* SAP Business Partner Master Data Guide: Explains the structure of business partner categories and roles in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

* SAP S/4HANA Cloud Master Data Management Guide: Provides details on configuring and managing business partner master data.
