Three Top Salesforce Sharing-and-Visibility-Architect Dumps Formats

Passing the Sharing-and-Visibility-Architect exam requires the ability to manage time effectively. In addition to the Salesforce Certified Sharing and Visibility Architect (Sharing-and-Visibility-Architect) exam study materials, practice is essential to prepare for and pass the Salesforce Sharing-and-Visibility-Architect exam on the first try. It is critical to do self-assessment and learn time management skills. Because the Sharing-and-Visibility-Architect test has a restricted time constraint, time management must be exercised to get success. Only with enough practice one can answer real Salesforce Sharing-and-Visibility-Architect exam questions in a given amount of time.

Salesforce Sharing-and-Visibility-Architect Certification is a highly respected certification that validates an individual's expertise in sharing and visibility architecture. Passing the certification exam requires extensive preparation and knowledge of Salesforce's sharing and visibility features, as well as the ability to apply that knowledge to real-world scenarios. Individuals who obtain this certification are highly sought after by organizations seeking to optimize their Salesforce implementation and ensure maximum efficiency and effectiveness.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q57-Q62):

NEW QUESTION # 57
Which two settings are available in profiles, but not permission sets?
Choose 2 answers.

- A. Login Hours

- B. Page Layout Assignments
- C. Tab Settings
- D. Record Types

Answer: A,B

Explanation:
Explanation
The two settings that are available in profiles, but not permission sets are C and D. Page layout assignments and login hours are profile-specific settings that control the user interface and the time range that users can log in to Salesforce. The other options are either available in both profiles and permission sets, or not related to either.

NEW QUESTION # 58
The finance team at Universal Containers usually does not have access to account and contact records. A finance analyst was temporarily given opportunity access for a big deal to help with tax calculation. However, she can now also access account and contact records.
What is causing this issue?

- A. Account records can be accessed due to Role Hierarchy.
- B. Contact records can be accessed due to implicit sharing from Opportunity.
- C. Account records can be accessed due to implicit sharing from Opportunity.

Answer: C

NEW QUESTION # 59
Jane, a support representative at Universal Containers, created a report to view all her open cases that have been created in the past 7 days and saved the report in the "Private Reports" folder.
Who can view and run the report?

- A. The report owner and any users who have been given access to the "My Private Reports" folder
- B. The report owner
- C. The report owner and users with the "View All Data" permission
- D. The report owner and anybody in the role hierarchy above the report owner

Answer: B

Explanation:
Explanation
The report owner is the only one who can view and run the report that is saved in the "Private Reports" folder.
Option A is incorrect, since there is no such thing as the "My Private Reports" folder in Salesforce. Option B is incorrect, since the role hierarchy does not affect the access to private reports. Option D is incorrect, since the "View All Data" permission does not grant access to private reports.

NEW QUESTION # 60
Universal Containers (UC) uses a custom Visualforce page to display shipment tracking information (custom object, private OWD) to field manager and agents. The IT team wants to make sure that users have access to only the information that is allowed.
Which Apex method must be used to make sure only allowed fields are shown to the users?

- A. isReadable()
- B. isAccessible()
- C. isShowable()
- D. isViewable()

Answer: B

NEW QUESTION # 61

Universal Containers created a public group with certain sales engineers to help on complex deals, as well as a sharing rule to grant access to these opportunities. The Opportunity organization-wide default is Private.

What is the impact of these sharing settings?

- A. Other sales engineers who are in the same Role Hierarchy as the sales engineers of the public group will also have access to these records.
- B. Sales engineers and their managers in the Role Hierarchy will also have access to these records.
- C. Subordinates of managers who have sales engineers in the public group will also have access to these records.

Answer: B

Explanation:
The Public Group and Sharing Rule approach grants access to specified users and, by default, extends access to their managers in the Role Hierarchy. Here's how the settings interact:
* Public Group: The group includes a specific set of sales engineers.
* Sharing Rule: It grants access to opportunities for the Public Group. This rule respects the existing Role Hierarchy.
* Role Hierarchy: In Salesforce, managers in the hierarchy automatically gain access to records their subordinates can access, ensuring seamless visibility for leadership.
* Option A (Correct): Managers of sales engineers in the Role Hierarchy will gain access because sharing rules honor the Role Hierarchy.
* Option B: Subordinates of managers will not gain access because sharing rules do not propagate access downward in the hierarchy.
* Option C: Other sales engineers outside the specified Public Group will not gain access unless explicitly included in the sharing rule.
