ACD201 Valid Exam Sample, ACD201 Reliable Test Pattern

Appian ACD201 test braindump will be the right key to your exam success. As long as the road is right, success is near. Don't be over-anxious, wasting time is robbing oneself. Our Appian ACD201 test braindump will be definitely useful for your test and 100% valid. Money Back Guaranteed!

Appian Senior Developer Sample Questions (Q31-Q36):

NEW QUESTION # 31

You're executing a performance test of the client's application. You notice that server-side resources are at high-to-critical operating levels.

What should you do to troubleshoot this issue?

Note: To answer, move all steps from the Options list to the Answer List area and arrange them in the correct order.

<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 10px;"> <input type="checkbox"/> Validate the test scenario by validating test script behavior matches performance acceptance criteria. </div> <div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 10px;"> <input type="checkbox"/> Analyze the performance of the application by reviewing system resources, application logs, and process reports. </div> <div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 10px;"> <input type="checkbox"/> Identify if there are any anomalies or errors occurring in the environment during the test, by looking for other users logged in, active processes running by test, etc. </div> <div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 10px;"> <input type="checkbox"/> Investigate if the system has cascading errors or unexpected process flows. </div> <div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 10px;"> <input type="checkbox"/> Analyze system resources and perform sizing exercise to validate if more resources or configuration changes are required. </div>	<div style="border: 1px solid #ccc; height: 100px; margin-bottom: 10px;"></div> <div style="border: 1px solid #ccc; height: 100px; margin-bottom: 10px;"></div> <div style="border: 1px solid #ccc; height: 100px; margin-bottom: 10px;"></div> <div style="border: 1px solid #ccc; height: 100px; margin-bottom: 10px;"></div> <div style="border: 1px solid #ccc; height: 100px;"></div>

NEW QUESTION # 32

You're developing a user input form for a government services application that includes a file upload component.

If the uploaded file is a multimedia file (for example: .MP4, .MOV or .WAV), the customer wants these uploaded to Microsoft SharePoint instead.

What is the best way to achieve this requirement?

- A. Use the out-of-the-box Appian Connected System as it has a pre-built connected system to SharePoint to provide a guided experience for designers to send and receive data.
- B. Develop a connected system plug-in given SharePoint has an extensive API that cannot easily be resolved using the Appian out-of-the-box Connected System.
- C. Use the out-of-the-box Appian Connected System, but since it does not have any pre-built connected systems, you will need to use either a HTTP or OpenAI Connected System to connect with SharePoint.

Answer: A

Explanation:

Appian provides an out-of-the-box pre-built connected system for SharePoint, allowing you to integrate file uploads to SharePoint with a guided experience for configuration-making this the best way to fulfill the requirement.

NEW QUESTION # 33

You need to configure your process model to store the result of an expression rule for every item in a list.

Your design must have the smallest memory footprint.

What should you do?

- A. Create a loop of smart service nodes in the process model and execute it for each item in the list.
- B. Invoke a sub-process for each item in the list.
- C. Execute MNI over a script task for each item in the list.
- D. **Configure a script task to use a!forEach() to iterate over each item in the list.**

Answer: D

Explanation:

Configuring a script task to use a!forEach() to iterate over each item in the list allows you to process all items within a single task, minimizing the memory footprint compared to multiple subprocesses or smart service loops.

NEW QUESTION # 34

Match each action you want to perform to the appropriate log type.

Each log type will be used once or not at all. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Analyze the mean time required to evaluate a function or rule
Select a match:

perf_monitor_rdbms.csv
 expressions_details.csv
 integration_summary.csv
 sail_details.csv
 web_api_details.csv

Identify data store operations slowness
Select a match:

perf_monitor_rdbms.csv
 expressions_details.csv
 integration_summary.csv
 sail_details.csv
 web_api_details.csv

Analyze the success rate of an API consumed within your application.
Select a match:

perf_monitor_rdbms.csv
 expressions_details.csv
 integration_summary.csv
 sail_details.csv
 web_api_details.csv

Identify interface slowness when using it from either iOS & Android devices
Select a match:

perf_monitor_rdbms.csv
 expressions_details.csv
 integration_summary.csv
 sail_details.csv
 web_api_details.csv

Select a match:

- perf_monitor_rdbms.csv
- expressions_details.csv
- integration_summary.csv
- sail_details.csv
- web_api_details.csv

NEW QUESTION # 35

You're building a new application to track job applications for a local health club.

The owner wants to have one group of individuals perform the initial application review for completeness, a second group to manage the interview process, and a third group to make the actual hiring decisions.

Which design element should be implemented to best support a memory efficient application?

- A. Create a synchronous process that accurately tracks a candidate's application from start to finish to ensure the hiring group has access to all the information necessary to make a decision.
- B. Break up the application into subprocesses representing each of the different stages of the process to reduce memory use.
- C. Create an entity-backed record for each of the open positions.

Answer: B

Explanation:

Breaking up the application into subprocesses for each stage allows each part to be short-lived and releases memory as each subprocess completes, resulting in a more memory-efficient application.

NEW QUESTION # 36

On the one hand, our company hired the top experts in each qualification examination field to write the ACD201 training materials, so as to ensure that our products have a very high quality, so that users can rest assured that the use of our research materials. On the other hand, under the guidance of high quality research materials, the rate of adoption of the ACD201 Study Materials preparation is up to 98% to 100%. Of course, it is necessary to qualify for a qualifying exam, but more importantly, you will have more opportunities to get promoted in the workplace.
