## Valid Citrix 1Y0-205 Exam Pass4sure | Valid Test 1Y0-205 Bootcamp

To increase your chances of success, consider utilizing the 1Y0-205 Exam Questions, which are valid, updated, and reflective of the actual 1Y0-205 Exam. Don't miss the opportunity to strengthen your Citrix 1Y0-205 exam preparation with these valuable questions.

## Citrix Virtual Apps and Desktops Administration Sample Questions (Q65-Q70):

### NEW QUESTION # 65

What are three daily steps a Citrix Administrator should take to monitor a Citrix Virtual Apps and Desktops infrastructure? (Choose three.)

- A. Perform a capacity assessment.
- B. **Check for warnings or alerts with Citrix Director.**
- C. Review available Citrix software upgrades.
- D. Review Citrix policies.
- E. **Test environment access.**
- F. **Check virtual machine power states.**

**Answer: B,E,F**

Explanation:

Checking for warnings or alerts in Citrix Director helps quickly identify performance or availability issues.

Testing environment access ensures that users can log on and launch sessions without problems.

Checking virtual machine power states verifies that VDAs are powered on and available for user connections.

### NEW QUESTION # 66

Scenario: A Citrix Administrator needs to gather historical reporting statistics from the Virtual Delivery Agent (VDA) machines, as users are reporting latency and overall performance issues within their sessions. The administrator believes these issues are related to high CPU and memory usage. What can the administrator enable to gather this monitoring data from the VDA machines?

- A. Process Monitoring HDX policy in Citrix Studio
- B. Trends > Machine Usage within Citrix Director
- C. Trends > Sessions within Citrix Director
- D. **Resource Monitoring HDX policy in Citrix Studio**

**Answer: D**

Explanation:

Enabling the Resource Monitoring HDX policy allows collection of CPU and memory utilization data from VDA machines. This data is then sent to Citrix Director for historical reporting, helping administrators analyze performance issues such as latency caused by high resource usage.

### NEW QUESTION # 67

Scenario: A Citrix Administrator needs to power-manage a group of Server OS Virtual Delivery Agent (VDA) machines that are all in the same Delivery Group. The administrator needs all the machines to be restarted once a week during the weekend. Additionally, a subset of the machines should be restarted every day during non-peak hours. Which feature must the administrator change from the default values in order to fulfill the requirements?

- A. **Tag restrictions**
- B. Restart duration
- C. Weekday and weekend hours
- D. Peak and non-peak hours

**Answer: A**

Explanation:

Tag restrictions allow administrators to apply different power management schedules to subsets of machines within the same Delivery Group. By tagging certain Server OS VDAs, the administrator can configure weekly restarts for all machines and daily restarts for only the tagged subset during non-peak hours.

### NEW QUESTION # 68

Scenario: While using Citrix Studio to create a new Delivery Group, a Citrix Administrator does NOT see any machine catalogs listed, but does see an error message. The administrator successfully verified the presence of machine catalogs in the Machine Catalogs node of Citrix Studio. Which issue can cause this to happen?

- A. The administrator has insufficient permissions to create the Delivery Group.
- **B. There are no unassigned machine catalog machines.**
- C. No machine catalog machines have been started.
- D. The Virtual Delivery Agent (VDA) version is lower than 7.15 LTSR.

**Answer: B**

Explanation:

When creating a Delivery Group, Citrix Studio only displays machine catalogs that contain unassigned machines. If all machines in the catalog are already assigned, the catalog will not appear in the Delivery Group creation wizard, even though it is visible under the Machine Catalogs node.

#### **NEW QUESTION # 69**

What are two methods of configuring AutoScale to power on machines as needed? (Choose two.)

- A. Host-Based
- **B. Load-Based**
- C. Server-Based
- D. Desktop-Based
- **E. Schedule-Based**

**Answer: B,E**

Explanation:

AutoScale can be configured using a schedule-based method, where machines power on/off according to defined time schedules, and a load-based method, where machines are powered on/off dynamically in response to user demand and load conditions. These two methods ensure resource optimization while maintaining user experience.

#### **NEW QUESTION # 70**

.....

However, the appearance of our 1Y0-205 certification materials will solve your question and change your impression of 1Y0-205 certification exam. You will find it is easy to pass the 1Y0-205 certification exam. What's more, contrary to most of the exam preparation materials available online, the 1Y0-205 certification materials of 1Y0-205 can be obtained at a reasonable price, and its quality and advantages exceed all similar products of our competitors. All our customers have successfully passed the exam. 1Y0-205 certification materials will enable you to obtain the actual certification within days, and will be the best choice for your time and money.
