

Authoritative Trustworthy FCSS_SDW_AR-7.6 Pdf & Passing FCSS_SDW_AR-7.6 Exam is No More a Challenging Task

The training tools of Prep4King contains exam experience and materials which are come up with by our IT team of experts. Also we provide exam practice questions and answers about the SAP C_THR96_2211 exam certification. Our Prep4King's high degree of credibility in the IT industry can provide 100% protection to you. In order to let you choose to buy our products more peace of mind, you can try to free download part of the exam practice questions and answers about SAP Certification [C_THR96_2211 Exam](#) online.

SAP C_THR96_2211 Certification Exam is intended for individuals who have skills and knowledge in the area of workforce analytics as a technical consultant. Specifically, this certification exam is aimed at assessing a candidate's ability to apply SAP SuccessFactors Workforce Analytics in the 2H/2022 release. Certified Application Associate - SAP SuccessFactors Workforce Analytics Technical Consultant 2H/2022 certification exam is designed to validate the knowledge and skills of a candidate in SAP SuccessFactors Workforce Analytics Technical Consultant.

Related C_THR96_2211 Certifications & Practical C_THR96_2211 Information

We have three versions packages of the C_THR96_2211 exam questions to help you comprehensively. Also, all contents are carefully prepared by our researchers. So you needn't to read and memorize the boring reference books of the [C_THR96_2211 Exam](#). Most people have successfully passed the exam under the assistance of our study materials. So try to trust us. Our C_THR96_2211 study materials will help you generate a wonderful life.

SAP Certified Application Associate - SAP SuccessFactors

100% Pass Quiz SAP - C_THR96_2211 Authoritative Trustworthy Exam Content

P.S. Free 2026 Fortinet FCSS_SDW_AR-7.6 dumps are available on Google Drive shared by Pass4training:
https://drive.google.com/open?id=1T3KbUwofzgLE_TtxZZwnEkwSuarFfSAr

As we all know, the preparation process for an exam is very laborious and time-consuming. We had to spare time to do other things to prepare for FCSS_SDW_AR-7.6 exam, which delayed a lot of important things. If you happen to be facing this problem, you should choose our FCSS_SDW_AR-7.6 Study Materials. With our study materials, only should you take about 20 - 30 hours to preparation can you attend the exam. The rest of the time you can do anything you want to do to, which can fully reduce your review pressure.

Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test FCSS_SDW_AR-7.6 certification. For the convenience of the users, the FCSS_SDW_AR-7.6 test materials will be updated on the homepage and timely update the information related to the qualification examination. As a result, the FCSS_SDW_AR-7.6 Test Prep can help users to spend the least time, know the test information directly, let users save time and used their time in learning the new hot spot concerning about the knowledge content.

Test FCSS_SDW_AR-7.6 Price & FCSS_SDW_AR-7.6 Valid Exam Cram

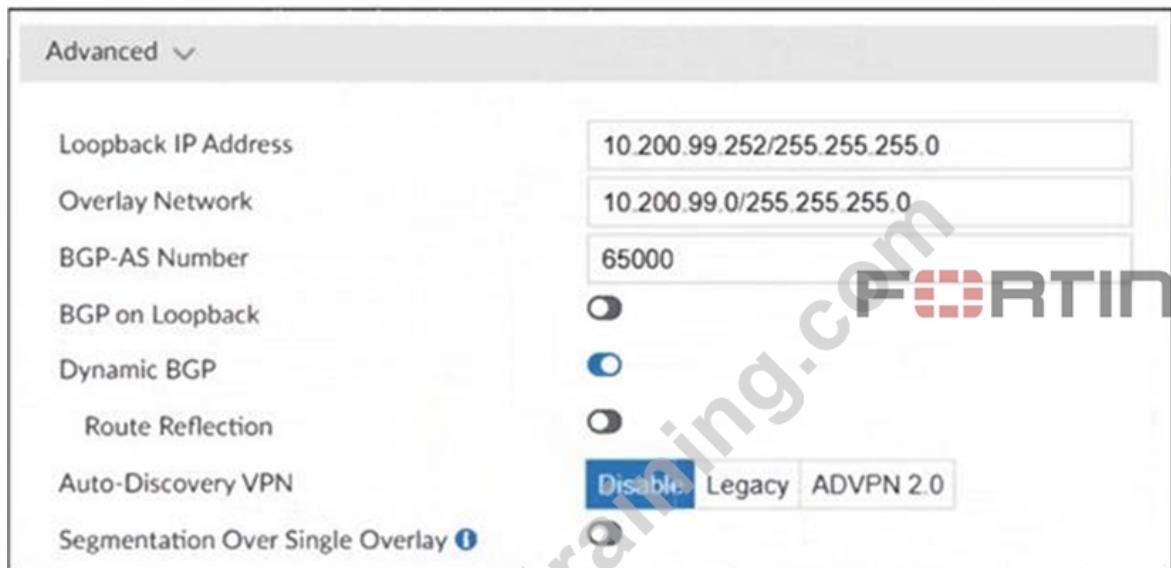

For the candidates, getting access to the latest Fortinet FCSS_SDW_AR-7.6 practice test material takes a lot of work. The study materials for the FCSS_SDW_AR-7.6 test preparation are spread throughout a number of websites and the majority of them aren't updated. However, the applicants only have a short time to prepare for the Fortinet FCSS_SDW_AR-7.6 Exam. They want a platform that offers the latest and real FCSS_SDW_AR-7.6 exam questions so they can get prepared within a few days.

Fortinet FCSS - SD-WAN 7.6 Architect Sample Questions (Q32-Q37):

NEW QUESTION # 32

(Refer to the exhibits.

SD-WAN overlay template advanced settings

Advanced

Loopback IP Address: 10.200.99.252/255.255.255.0

Overlay Network: 10.200.99.0/255.255.255.0

BGP-AS Number: 65000

BGP on Loopback:

Dynamic BGP:

Route Reflection:

Auto-Discovery VPN: Disable Legacy ADVVPN 2.0

Segmentation Over Single Overlay

Underlay and network advertisement configuration

Secondary HUB

Underlay

#	Private Link	Override IP	Action
WAN Underlay 1	<input checked="" type="radio"/> port1	<input type="radio"/>	<input type="button"/> <input type="button"/>
WAN Underlay 2	<input checked="" type="radio"/> port2	<input type="radio"/>	<input type="button"/> <input type="button"/>

Network Advertisement

#	Interface	Action
Interface 1	port5	<input type="button"/> <input type="button"/>

The SD-WAN overlay template advanced settings and the underlay and network advertisement settings are shown. These are the configurations for the secondary hub of a dual-hub SD-WAN topology created with the FortiManager SD-WAN overlay orchestrator.

Which two conclusions can you draw from the information shown in the exhibits? Choose two answers.)

- A. FortiManager will create an overlay tunnel on the port2 interface.
- B. FortiManager will define port2 as a BGP neighbor.
- C. FortiManager will define port5 as a BGP neighbor.
- D. FortiManager will create an overlay tunnel on the port1 interface.

Answer: A,D

Explanation:

From the Underlay and network advertisement configuration exhibit for the Secondary HUB:

Under Underlay, the template explicitly lists:

WAN Underlay 1 = port1

WAN Underlay 2 = port2

In FortiManager SD-WAN Overlay Orchestrator, underlay interfaces selected for a hub are the transports used to build the overlay IPsec tunnels (one overlay per underlay, per peer as defined by the template). Because both port1 and port2 are configured as underlays, FortiManager will build overlay tunnels over both underlay links. That supports:

Option C (overlay tunnel on port1)

Option B (overlay tunnel on port2)

For the BGP neighbor options:

The Network Advertisement section shows Interface 1 = port5, which indicates a LAN/internal interface whose connected or static networks may be advertised into the overlay routing domain. This does not make port5 a BGP neighbor interface; it is the interface whose routes are being advertised.

The template indicates Dynamic BGP is enabled. In Overlay Orchestrator designs, BGP neighbor relationships are formed across the overlay tunnel interfaces / overlay endpoints, not directly on the raw underlay interfaces (port1/port2) and not on the advertised LAN interface (port5). Therefore, options A and D are not valid conclusions from what is shown.

So, the two correct conclusions are B and C.

NEW QUESTION # 33

The SD-WAN overlay template helps to prepare SD-WAN deployments. To complete the tasks performed by the SD-WAN overlay template, the administrator must perform some post-run tasks.

What are two mandatory post-run tasks that must be performed? (Choose two.)

- A. Configure routing through the overlay tunnels created by the SD-WAN overlay template.
- B. Assign a hub id metadata variable to each hub device.
- C. **Create policy packages and assign them to the branch devices.**
- D. **Configure SD-WAN rules.**
- E. Assign an sdwan_id metadata variable to each device (branch and hub).

Answer: C,D

Explanation:

On page 76 in the Study Guide:

"You must define a unique branch ID value for each branch device"

"Mandatory . . .

- Configure the SD-WAN rules by editing the SD-WAN template
- Create policy packages for branch and hub devices"

NEW QUESTION # 34

Refer to the exhibit. For your ZTP deployment, you review the CSV file shown in exhibit and note that it is missing important information. Which two elements must you change before you can import it into FortiManager? (Choose two.)

Serial Number	name	branch_id	admin_gw	sdwan_port1_gw	sdwan_port2_gw	latitude	longitude	lan_interface_ip
FGVM01TM22000077	branch1_fgt	1	172.16.0.2	192.2.0.2	192.2.0.10	37.37610911	-122.0260914	10.0.1.254
FGVM01TM22000078	branch2_fgt	2	172.16.0.10	203.0.11.2	203.0.113.10	25.77404351	-80.20508525	10.0.2.254
FGT40FTK20000624	shop1_fgt	11		198.0.1.1				10.10.1.254
FGT40FTK20003026	shop2_fgt	12				48.88941	2.25125	10.10.2.254
FGVM02TM24010735		3	172.16.0.10	100.64.33.2	100.64.33.10	45.32482	-75.8359	10.0.3.254

- A. You must define a value for each device and each metadata variable that defines an IP address.
- B. You must define a value for each device and each user-defined metadata variable.
- C. **You must associate a device blueprint with each device**
- D. **You must define a name for each device**

Answer: C,D

Explanation:

Declare Branch Devices Using a CSV File

- Why use CSV file?
 - Bulk import of devices to FortiManager
 - Easy CSV file creation
 - Simplify large deployments
- What does the file contain?
 - The serial number for each FortiGate device
 - To device blueprint to use
 - The value for each metadata variable used

CSV file elements

- Required
 - Device serial number
 - Blueprint
 - Device name
- Required for VM models
 - Number of ports to provision
- Required for SD-WAN template
 - Branch_id
- Optional
 - Value for each metadata variable in use in referenced template or configuration element

CSV file example *

A	B	C	D	E	F	G	H
1	serial_number	device_blueprint	name	vm_interface_number	branch_id	admin_gw	sdwan_port1_gw
2	FGVM01TM22000 Branch-KVM	branch1_fgt	branch1_fgt	10b	1	172.16.0.2	192.2.0.2
3	FGVM01TM22000 Branch-KVM	branch2_fgt	branch2_fgt	10	2	172.16.0.10	203.0.113.10
4	FG30E10U160006 Branch-30E	shop1_fgt	shop1_fgt		11	172.18.0.1	198.0.1.1
5	FG30E10U160004 Branch-30E	shop2_fgt	shop2_fgt		12	172.18.0.1	198.0.1.1

For a large SD-WAN deployment, adding each branch device one by one would be repetitive and time consuming. Fortunately, to simplify this step, FortiManager provides a CSV file import feature.

To use this bulk import feature, the administrator builds a CSV file. The file must contain some mandatory values, such as the device serial numbers, the device names, and the associated blueprints, as well as optional values for the metadata variables used in the configuration.

NEW QUESTION # 35

The administrator uses the FortiManager SD-WAN overlay template to prepare an SD-WAN deployment. Using information provided through the SD-WAN overlay template wizard, FortiManager creates templates ready to install on the spoke and hub devices.

What are the three templates created by the SD-WAN overlay template for a spoke device?
(Choose three.)

- A. CLI template
- B. Rules template
- C. Static route template
- D. IPsec tunnel template
- E. BGP template

Answer: A,D,E

Explanation:

CLI template → Contains device-specific parameters (like local interface IPs).

BGP template → Configures dynamic routing for overlay tunnels.

IPsec tunnel template → Builds the IPsec VPN tunnels from the spoke to the hubs.

NEW QUESTION # 36

(As an IT manager, you want to delegate the installation and management of your SD-WAN deployment to a managed security service provider (MSSP). Each site must maintain direct internet access and be secure. You expect significant traffic flow between the sites and want to delegate as much of the network administration and management as possible to the MSSP.

Which two MSSP deployment blueprints address your requirements? Choose two answers.)

- A. Install the hub and spokes on the customer premises, and enable the MSSP to manage the SD-WAN deployment using FortiManager with a dedicated ADOM.
- B. Use a shared hub on the MSSP premises with a dedicated VDOM for the customer, and install the spokes on the customer premises.
- C. Use a shared hub on the MSSP premises and a dedicated hub on the customer premises, and install the spokes on the customer premises.

- D. Install a dedicated hub on the MSSP premises for the customer, and install the spokes on the customer premises.

Answer: B,D

Explanation:

Your requirements map to two key MSSP goals described in the FCSS SD-WAN 7.6 blueprint patterns:

Delegate as much administration and management as possible to the MSSP

This is best achieved when the hub security and SD-WAN control point is located on the MSSP premises, because the MSSP can centrally operate the core enforcement and overlay control. Both option B (dedicated hub at MSSP) and option D (shared hub at MSSP with customer isolation) meet this requirement.

Each site must maintain direct internet access (DIA) and be secure, with significant site-to-site traffic. In Fortinet SD-WAN MSSP designs, spokes can still use local breakout for DIA while also building secure overlays for inter-site traffic. Placing the hub at the MSSP enables centralized security services and scalable inter-site connectivity management while preserving DIA where required. Options B and D support this operating model.

Why the other options do not best match:

A includes a dedicated hub on the customer premises, which reduces how much the MSSP can centralize and operate from its own environment, so it does not maximize delegation.

C places both hub and spokes on the customer premises. While the MSSP can manage using a dedicated ADOM, this blueprint does not align as strongly with "delegate installation and management" to the MSSP as the designs where the hub is hosted and operated from the MSSP premises.

Therefore, the two MSSP deployment blueprints that address your requirements are B and D.

NEW QUESTION # 37

.....

As is known to us that pass rate is one of the most important standards when candidate choose the practice materials. The pass rate is 98.95% for FCSS_SDW_AR-7.6 training materials, and you can pass and get a certificate successfully. In addition we also pass guarantee and money back guarantee if you fail to pass the exam after using FCSS_SDW_AR-7.6 Exam Dumps. Free update for one year is also available, namely in the following year, you can get latest information about the FCSS_SDW_AR-7.6 training materials. We also have online and offline chat service to solve your confusions.
