

Demo 300-420 Test & 300-420 New Test Bootcamp

2026 Latest PrepAwayPDF 300-420 PDF Dumps and 300-420 Exam Engine Free Share: https://drive.google.com/open?id=124suHaLJrD6p94lhXCxA_4y5gmGs92SI

Now on the Internet, a lot of online learning platform management is not standard, some web information may include some viruses, cause far-reaching influence to pay end users and adverse effect. If you purchase our 300-420 test torrent this issue is impossible. We hire experienced staff to handle this issue perfectly. We are sure that our products and payment process are surely safe and anti-virus. If you have any question about downloading and using our 300-420 Study Tool, we have professional staff to remotely handle for you immediately, let users to use the Designing Cisco Enterprise Networks guide torrent in a safe environment, bring more comfortable experience for the user.

Cisco 300-420 Exam covers a wide range of topics related to enterprise network design, including advanced routing and switching technologies, network security, wireless technologies, and network automation. 300-420 exam also covers design principles and best practices for enterprise network solutions, including scalability, availability, and performance.

Passing the Cisco 300-420 certification exam demonstrates that the candidate has a thorough understanding of enterprise-level network design and implementation concepts and can apply this knowledge to design and implement advanced network solutions. It also validates their ability to use Cisco's latest technologies and solutions to build robust, secure, and scalable networks that meet the business needs of their organizations.

Cisco 300-420 New Test Bootcamp | 300-420 Actual Dump

The Cisco 300-420 exam questions pdf is properly formatted to give candidates the asthenic and unformatted information they need to succeed in the 300-420 exam. In addition to the comprehensive material, a few basic and important questions are highlighted and discussed in the 300-420 Exam Material file. These questions are repeatedly seen in past Designing Cisco Enterprise Networks exam papers. The Designing Cisco Enterprise Networks practice questions are easy to access and can be downloaded anytime on your mobile, laptop, or MacBook.

Preparing for the Cisco 300-420 exam requires a deep understanding of enterprise network design principles and technologies, as well as hands-on experience in designing and implementing complex network solutions. Candidates can prepare for the exam by taking Cisco-approved training courses, studying the official exam materials, and practicing with sample exams and lab simulations.

By passing the Cisco 300-420 Exam, candidates can demonstrate their expertise in enterprise network design and advance their career in the networking industry.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q160-Q165):

NEW QUESTION # 160

Which Cisco product were incorporated into Cisco ISE between ISE releases 2.0 and 2.3?

- A. Cisco ESA
- B. Cisco ASA
- C. Cisco ACS
- D. Cisco WSA

Answer: C

NEW QUESTION # 161

An architect is designing how the company will manage the infrastructure of a large data center. The company wants to group device types for security reasons and mitigate DoS attacks. The company also wants to ensure that access to the rest of the production network is not possible if one device is compromised on the management plane. Which solution must the architect choose?

- A. out-of-band Ethernet
- B. in-band Ethernet
- C. in-band dial-up circuit
- D. out-of-band dial-up circuit

Answer: A

NEW QUESTION # 162

An architect is working on a design to connect a company's main site to several small to medium-sized remote branches. The solution must include redundant WAN links, but the customer has a limited budget and wants the ability to increase the link speed easily in the future. QoS will not be on the branch routers so there is no need for consistent end-to-end QoS. Which solution does the architect propose?

- A. dual-homed WAN MPLS and Internet links via dual edge routers
- B. dual-homed Internet with dual edge routers running a hub-and-spoke VPN topology
- C. dual-homed Internet with a single edge router running a site-to-site VPN topology
- D. dual-homed WAN MPLS with single edge router

Answer: B

NEW QUESTION # 163

A network engineer must design a multicast solution to prevent the spoofing of multicast streams and ensure efficient bandwidth utilization. The network will be merged with another multicast domain in the future, and the merge must require minimum effort. Which two solutions meet the customer requirements? (Choose two.)

- A. PIM-SSM
- B. IGMPv2
- C. IGMPv3
- D. PIM-SM
- E. MSDP

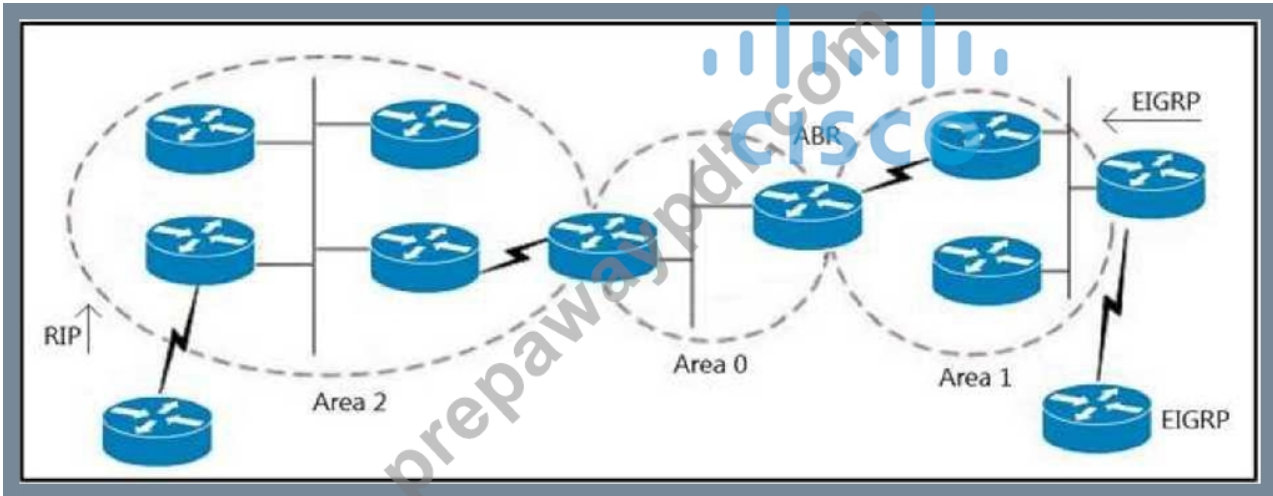

Answer: D,E

Explanation:

https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/ipmulti_pim/configuration/xr-16/imc-pim-xr-16-book/imc-msdp-im-pim-sim.html#GUID-4B201DB3-2C27-4F98-977A-A1AE9DC39C21 MSDP is a mechanism to connect multiple PIM-SM domains. The purpose of MSDP is to discover multicast sources in other PIM domains. The main advantage of MSDP is that it reduces the

complexity of interconnecting multiple PIM-SM domains by allowing PIM-SM domains to use an interdomain source tree (rather than a common shared tree).

NEW QUESTION # 164

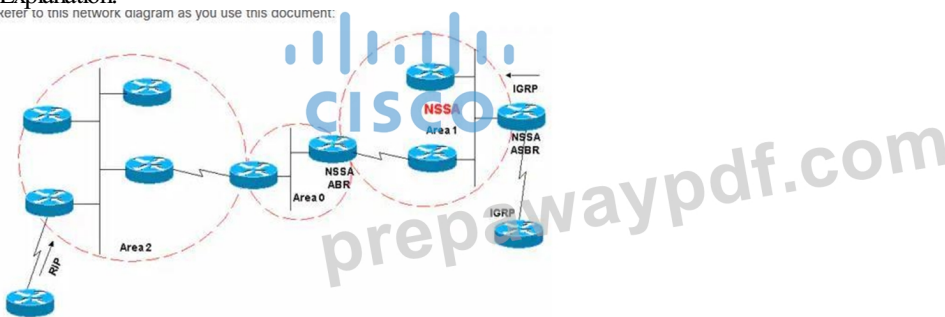

Refer to the exhibit. An engineer is designing an OSPF network for a client. Requirements dictate that the routers in Area 1 should receive all routes belonging to the network, including EIGRP, except the ones originated in the RIP domain. Which action should the engineer take?

- A. Make area 1 a standard OSPF area.
- B. Make the area 1 routers part of area 0.
- **C. Make area 1 a NSSA.**
- D. Make area 1 a stub.

Answer: C

Explanation:

refer to this network diagram as you use this document:

In the network diagram, Area 1 is defined as a stub area. IGRP routes cannot be propagated into the OSPF domain because redistribution is not allowed in the stub area. However, if we define Area 1 as NSSA, we can inject IGRP routes into the OSPF NSSA domain with the creation of type 7 LSAs. Redistributed RIP routes are not allowed in Area 1 because NSSA is an extension to the stub area. The stub area characteristic still exist which includes no type 5 LSAs allowed.

NEW QUESTION # 165
