

# Hot NEX Printable PDF | Easy To Study and Pass Exam at first attempt & Free Download NEX: Nursing Entrance Exam (Math, Science and Verbal)

If you free download the demos of the NEX exam questions, I believe you have a deeper understanding of our products, and we must also trust our NEX learning quiz. Our products can provide you with the high efficiency and high quality you need. Selecting our study materials is your rightful assistant with internationally recognized NEX Certification. What are you waiting for? Quickly use our NEX study materials.

As the saying goes, practice makes perfect. We are now engaged in the pursuit of Craftsman spirit in all walks of life. Professional and mature talents are needed in each field, similarly, only high-quality and high-precision NEX practice materials can enable learners to be confident to take the qualification examination so that they can get the certificate successfully, and our NEX learning materials are such high-quality learning materials, it can meet the user to learn the most popular test site knowledge. Because our experts have extracted the frequent annual test centers are summarized to provide users with reference. Only excellent learning materials such as our NEX practice materials can meet the needs of the majority of candidates, and now you should make the most decision is to choose our products.

## [2026] NLN NEX Questions: Fosters Your Exam Passing Abilities

Our NEX learn materials include all the qualification tests in recent years, as well as corresponding supporting materials. Such a huge amount of database can greatly satisfy users' learning needs. Not enough valid NEX test preparation materials, will bring many inconvenience to the user, such as delay learning progress, these are not conducive to the user pass exam, therefore, in order to solve these problems, our NEX Certification material will do a complete summarize and precision of summary analysis to help you pass the NEX exam with ease.

## NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q62-Q67):

### NEW QUESTION # 62

Reading Comprehension

Passage:

Stress can affect both physical and mental health. Short-term stress may improve alertness, but chronic stress can weaken the immune system, increase blood pressure, and contribute to anxiety and depression.

Which effect of long-term stress is mentioned in the passage?

- A. Stronger immune response
- B. Improved concentration
- C. Faster healing
- D. Increased blood pressure

**Answer: D**

Explanation:

The passage distinguishes between short-term and chronic stress. While short-term stress may increase alertness, chronic stress is associated with negative health effects. One of the effects specifically mentioned is increased blood pressure. Option C is therefore correct. Options A and D describe benefits not associated with chronic stress in the passage. Option B is incorrect because the passage states that chronic stress weakens, rather than strengthens, the immune system. The NEX exam often includes questions that test the ability to identify contrasting ideas within a passage, such as short-term versus long-term effects.

---

---

**NEW QUESTION # 63**

The figure below represents the human eye.

Where are the rods and cones located?

- A. Retina
- B. Optic nerve
- C. Lens
- D. Cornea

**Answer: A**

Explanation:

Rods and cones are specialized photoreceptor cells responsible for vision. These cells are located in the retina, the innermost layer of the eye. The retina contains multiple layers of cells that convert light energy into electrical impulses, which are then transmitted to the brain through the optic nerve. Rods are highly sensitive to light and are essential for vision in dim conditions, while cones are responsible for color vision and sharp visual detail. The cornea and lens help focus light but do not detect it. The optic nerve transmits signals but does not contain photoreceptors. The NEX Science exam frequently tests eye anatomy and sensory physiology, especially the relationship between structure and function. Correctly identifying the retina as the location of rods and cones is essential for understanding how visual perception occurs.

---

**NEW QUESTION # 64**

Which of the following will increase the amount of oxygen produced by a plant?

- A. Decrease available carbon dioxide
- B. Increase available glucose
- C. Increase available carbon dioxide
- D. Decrease available glucose

**Answer: C**

Explanation:

Oxygen is produced during the process of photosynthesis, which occurs in the chloroplasts of plant cells.

During photosynthesis, plants use carbon dioxide, water, and light energy to produce glucose and oxygen.

Carbon dioxide is one of the key raw materials required for this process. When the availability of carbon dioxide increases, the rate of photosynthesis can also increase, assuming that light and water are not limiting factors. As photosynthesis increases, more oxygen is released as a byproduct. Decreasing carbon dioxide would slow photosynthesis and reduce oxygen production. Glucose is a product of photosynthesis, not a reactant, so changing glucose levels does not directly increase oxygen output. Therefore, increasing available carbon dioxide is the correct answer. The NEX Science exam frequently tests understanding of the inputs and outputs of photosynthesis and how environmental factors affect the process.

---

---

**NEW QUESTION # 65**

Which of the following is the correct classification of a penny made only of copper?

- A. A pure substance that is a compound
- B. A homogeneous mixture of two elements

- C. A heterogeneous mixture of two compounds
- D. A pure substance that is an element

**Answer: D**

Explanation:

Copper is a chemical element, meaning it consists of only one type of atom. If a penny were made entirely of copper, it would be classified as a pure substance and specifically as an element. Compounds consist of two or more different elements chemically bonded together. Mixtures contain substances physically combined, not chemically bonded. Since the penny is composed of only copper atoms, it does not qualify as a mixture or a compound. The NEX Science exam frequently includes questions on classification of matter, requiring students to distinguish between elements, compounds, and mixtures. Therefore, option D is correct.

---

#### **NEW QUESTION # 66**

You are staining bacterial samples for identification and viewing them under a microscope.

Which bacterial shape do you observe in the sample?

- A. Vibrios
- B. Coccis
- C. Bacilli
- D. Spirochetes

**Answer: C**

Explanation:

This question tests knowledge of bacterial morphology, which is commonly assessed on the NEX Science exam. Bacteria are often classified based on their shape, which helps in identification and diagnosis. The image shows elongated, rod-shaped bacteria. This shape is characteristic of bacilli. Bacilli are cylindrical or rod-like and are commonly found in many bacterial species, including *Escherichia coli* and *Bacillus anthracis*.

Cocci are spherical in shape, spirochetes are long and spiral-shaped, and vibrios have a curved, comma-like appearance. None of these shapes match the straight rod-like structures shown in the image. Identifying bacterial shape is an important first step in microbiology before further tests such as Gram staining or biochemical analysis are performed. The NEX exam frequently uses images or descriptions to assess whether students can correctly distinguish between cocci, bacilli, spirilla/spirochetes, and vibrios based on visual characteristics. Recognizing bacilli as rod-shaped bacteria is a key foundational concept.

#### **NEW QUESTION # 67**

.....

Fate is not an opportunity but a choice. As long as you choose our NEX exam materials, you will certainly do more with less. Your work efficiency will far exceed others. NEX practice guide has such effects because they have a lot of advantages. Not only our NEX Practice Braindumps can help you study the latest knowledge on the subject but also it will help you achieve the certification for sure so that you will get a better career.
