Biology Exam Test Questions

Introduction to Biology:

1. A scientific hypothesis must be proposed in a way that:
(a) ensures that the experiment will be proven true (b) ensures that the experiment will work
(c) enables the hypothesis to be proven or disproven (d) doesn't interfere with a previous hypothesis.
2. This part of the experiment serves as a basis of comparison. The one variable that is being tested has been left out. This is called the: (a) control (b) experimental (c) qualitative data
(d) dependent variable.
3. A possible explanation for a set of observations is called a(n):
(a) theory (b) hypothesis (c) variable (d) control (e) experiment.
4. The variable that is deliberately changed in an experiment is called the:
(a) control (b) dependent variable (c) experimental group (d) independent variable.
5. When graphing the data obtained from an experiment, the dependent variable is always placed on which axis of the graph?
(a) the x-axis (b) the y-axis (c) the z-axis (d) either axis is fine.
6. Data that is numerical and is obtained by counting or measuring is called:
(a) qualitative (b) scientific (c) quantitative (d) variable.
7. This type of organism consists of a group of cells, but there is no specialized relationship between the cells.
(a) unicellular (b) multicellular (c) colonial (d) specialized.
8. Prior to the 17th century, some scientists believed that life could arise from non-living objects. This was known as:
(a) asexual reproduction (b) biogenesis (c) differentiation (d) spontaneous generation.
9. Which of the following scientists disproved spontaneous generation by boiling the broth in an open goose-neck flask? (a) Redi (b) Spallanzani (c) Needham (d) Pasteur (e) Calvin.
10. The disadvantage of cell specialization is that:
(a) The cells have too many jobs to do and cannot do any of them very well.
(b) The cells are not specialized and have no relationship to each other.
(c) The cells are so highly specialized that if one group of cells fails to do its job, all other cells will perish.
(d) It is too hard to maintain homeostasis if the cells are specialized.
11. The stable internal environment maintained by living things is called:
(a) homeostasis (b) differentiation (c) adaptation (d) interdependence.
