

Accurate FCSS_SDW_AR-7.4 Pass4sure bring you Effective FCSS_SDW_AR-7.4 New Soft Simulations for Fortinet FCSS - SD-WAN 7.4 Architect

BTW, DOWNLOAD part of RealExamFree FCSS_SDW_AR-7.4 dumps from Cloud Storage: <https://drive.google.com/open?id=1vMQwR9rCxSOmAfA0cOrbFg8GJat9s5Y>

There are many benefits after you pass the FCSS_SDW_AR-7.4 certification such as you can enter in the big company and double your wage. Our FCSS_SDW_AR-7.4 study materials boost high passing rate and hit rate so that you needn't worry that you can't pass the test too much. We provide free tryout before the purchase to let you decide whether it is valuable or not by yourself. To further understand the merits and features of our FCSS_SDW_AR-7.4 Practice Engine you could look at the introduction of our product in detail.

Fortinet FCSS_SDW_AR-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Configure Performances SLAs: Designed for network administrators, this part focuses on setting up performance Service Level Agreements (SLAs) within SD-WAN environments. Candidates must show proficiency in defining criteria to monitor and maintain network performance and reliability.
Topic 2	<ul style="list-style-type: none"> Advanced IPsec: Intended for security engineers, this section covers the deployment of advanced IPsec topologies for SD-WAN, including hub-and-spoke models, ADVPN configurations, and complex multi-hub or multi-region deployments. Candidates need to demonstrate expertise in securing wide-area networks using IPsec technologies.
Topic 3	<ul style="list-style-type: none"> SD-WAN Troubleshooting: This part assesses the troubleshooting skills of network support specialists. Candidates should be able to diagnose and resolve issues related to SD-WAN rules, session behaviors, routing inconsistencies, and ADVPN connectivity problems to maintain seamless network operations.
Topic 4	<ul style="list-style-type: none"> Rules and Routing: Targeted at network engineers, this section assesses the ability to configure SD-WAN rules and routing policies. Candidates will be tested on managing traffic flow and prioritization across the SD-WAN infrastructure.

FCSS_SDW_AR-7.4 New Soft Simulations - FCSS_SDW_AR-7.4 Latest Exam Materials

With all types of FCSS_SDW_AR-7.4 test guide selling in the market, lots of people might be confused about which one to choose. Many people can't tell what kind of FCSS_SDW_AR-7.4 study dumps and software are the most suitable for them. Our company can guarantee that our FCSS_SDW_AR-7.4 Actual Questions are the most reliable. Having gone through about 10 years' development, we still pay effort to develop high quality FCSS_SDW_AR-7.4 study dumps and be patient with all of our customers, therefore you can trust us completely.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q49-Q54):

NEW QUESTION # 49

When a customer delegate the installation and management of its SD-WAN infrastructure to an MSSP, the MSSP usually keeps the hub within its infrastructure for ease of management and to share costly resources.

In which two situations will the MSSP install the hub in customer premises? (Choose two.)

- A. The majority of the branch traffic is directed to a corporate data center.
- B. The customer requires SIA with centralized breakout.
- C. The administrator expects a large volume of traffic between the branches.
- D. The customer expects a large amount of VoIP traffic.

Answer: A,C

Explanation:

A large volume of inter-branch traffic benefits from a local hub to avoid backhauling and reduce latency.

If most traffic is destined for a corporate data center, placing the hub on-premises ensures efficient routing and improved performance.

NEW QUESTION # 50

Refer to the exhibit.

```
Diagnose output

fgt_A # diagnose sys sdwan service4

Service(1): Address Mode(IPV4) flags=0x4200 use-shortcut-sla use-shortcut
Tie break: cfg

peer: 192.168.1.93, source 192.168.1.61, priority: 1 1024, weight: 0

fgt_A # get router info routing-table all | grep HUB1
S 10.0.0.0/8 [10/0] via HUB1-VPN3 tunnel 172.16.1.5, [1/0]
B 10.0.3.0/24 [200/0] via 192.168.1.2 [3] (recursive is directly connected, HUB1-VPN1), 04:11:41, [1/0]
  [200/0] via 192.168.1.34 [3] (recursive is directly connected, HUB1-VPN2), 04:11:41, [1/0]
B 10.1.0.0/24 [200/0] via 192.168.1.29 (recursive via HUB1-VPN1 tunnel 100.64.1.1), 04:11:42, [1/0]
  [200/0] via 192.168.1.61 (recursive via HUB1-VPN2 tunnel 100.64.1.9), 04:11:42, [1/0]
  [200/0] via 192.168.1.93 (recursive via HUB1-VPN3 tunnel 172.16.1.5), 04:11:42, [1/0]
```

An administrator is troubleshooting SD-WAN on FortiGate. A device behind branch1_fgt generates traffic to the 10.0.0.0/8 network.

The administrator expects the traffic to match SD-WAN rule ID 1 and be routed over HUB1-VPN1. However, the traffic is routed over HUB1-VPN3.

Based on the output shown in the exhibit, which two reasons, individually or together, could explain the observed behavior? (Choose two.)

- A. HUB1-VPN3 has a lower route priority value (higher priority) than HUB1-VPN1.
- B. HUB1-VPN1 does not have a valid route to the destination
- C. HUB1-VPN3 has a higher member configuration priority than HUB1-VPN1.
- D. The traffic matches a regular policy route configured with HUB1-VPN3 as the outgoing device

Answer: A,C

NEW QUESTION # 51

Which statement describes FortiGate behavior when you reference a zone in a static route?

- A. FortiGate installs a static route for each member in the zone.
- B. FortiGate installs ECMP static routes for the first two members of the zone.
- C. FortiGate ignores the static routes defined through members referenced in the zone.
- D. FortiGate routes the traffic through the best performing member of the zone.

Answer: A

Explanation:

When referencing a zone in a static route, FortiGate's behavior is described as:

"Referencing a zone in a static route causes FortiGate to install a static route for each member interface of the zone. This enables ECMP (Equal-Cost Multi-Path) and load balancing where supported and ensures that traffic can be steered over any valid zone member according to SD-WAN rules or standard routing." This mechanism is fundamental to Fortinet's implementation of SD-WAN and simplifies large, multi- interface deployments.

FortiOS 7.4 Routing Guide, "Zone-based Routing and ECMP Behavior"

NEW QUESTION # 52

Refer to the exhibit.

```

config system sdwan
  config health_check
    edit "DNS"
      set server "4.2.2.1" "4.2.2.2"
      set detect-mode active
      set protocol ping
      set embed-measured-health enable
      set members 3 4
      config sla
        edit 1
          set link-cost-factor latency
          set latency-threshold 100
        end
      next
    end
  end
end

```

The exhibit shows the health-check configuration on a FortiGate device used as a spoke. You notice that the hub FortiGate doesn't prioritize the traffic as expected.

Which two configuration elements should you check on the hub? (Choose two.)

- A. The performance SLA uses the same criteria.
- B. This performance SLA uses the same members.
- C. The performance SLA is configured with set embedded-measure accept.
- D. The performance SLA has the parameter priority-out-sla configured.

Answer: A,C

Explanation:

The hub must use a performance SLA with the same criteria as the spoke's health check. The spoke's health check is using ping (protocol ping) and measuring latency (link-cost-factor latency). For the hub to use the data sent by the spoke, its performance SLA must be configured to measure the same metrics. If the hub is looking for jitter or packet loss, it will not use the latency data sent by the spoke.

When a spoke sends embedded health data, the hub FortiGate must be configured to receive and use it. This is done by setting set embedded-measure accept within the performance SLA configuration on the hub. This setting explicitly tells the hub to trust and use the performance metrics received from the remote FortiGate (the spoke). Without this setting, the hub will likely ignore the embedded health data and rely on its own health checks, which could lead to incorrect traffic prioritization.

NEW QUESTION # 53

SD-WAN interacts with many other FortiGate features. Some of them are required to allow SD-WAN to steer the traffic. Which three configuration elements that you must configure before FortiGate can steer traffic according to SD-WAN rules? (Choose three.)

- **A. Routing**
- B. Traffic shaping
- **C. Interfaces**
- **D. Firewall policies**
- E. Security profiles

Answer: A,C,D

NEW QUESTION # 54

.....

In today's technological world, more and more students are taking the FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam online. While this can be a convenient way to take an FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam dumps, it can also be stressful. Luckily, RealExamFree's best FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam questions can help you prepare for your FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) certification exam and reduce your stress.
