

2026 Professional H12-891_V1.0: HCIE-Datcom V1.0 Reliable Dumps Book

P.S. Free & New H12-891_V1.0 dumps are available on Google Drive shared by ValidBraindumps:
https://drive.google.com/open?id=1mjVH3i_vrg_JXTBCANG8q5jfèFHns7YA

Our website offers you the most comprehensive H12-891_V1.0 study guide for the actual test and the best quality service for aftersales. Our customers can easily access and download the H12-891_V1.0 dumps pdf on many electronic devices including computer, laptop and Mac. Online test engine enjoys great reputation among IT workers because it brings you to the atmosphere of H12-891_V1.0 Real Exam and remarks your mistakes.

Huawei H12-891_V1.0 (HCIE-Datcom V1.0) Certification Exam is a globally recognized certification program that validates the advanced-level networking skills of professionals in the field of data communication. HCIE-Datcom V1.0 certification program covers a wide range of topics and is designed to help professionals enhance their knowledge and skills in the field. HCIE-Datcom V1.0 certification exam is challenging, but individuals who pass it are recognized as experts in the field and are highly sought after by employers.

2026 Efficient H12-891_V1.0 Reliable Dumps Book | 100% Free H12-891_V1.0 Learning Materials

In the Huawei H12-891_V1.0 Dumps PDF format of ValidBraindumps, the questions are very relevant to the actual HCIE-Datcom V1.0 (H12-891_V1.0) exam. The HCIE-Datcom V1.0 (H12-891_V1.0) dumps PDF format is appropriate for laptops, smartphones, and tablets. As the H12-891_V1.0 PDF questions file is portable, you can easily study via it anywhere. You can also print these Huawei PDF Dumps. ValidBraindumps regularly updates its HCIE-Datcom V1.0 (H12-891_V1.0) questions PDF file to improve the questions and introduce changes when required.

Passing the Huawei H12-891_V1.0 (HCIE-Datcom V1.0) Certification Exam is a significant achievement for professionals in the field of data communication technologies. HCIE-Datcom V1.0 certification demonstrates the candidate's expertise and proficiency in designing, implementing, and troubleshooting complex data communication networks using Huawei's products and technologies. HCIE-Datcom V1.0 certification is recognized globally and can lead to better job opportunities, higher salaries, and professional growth.

Huawei H12-891_V1.0 (HCIE-Datcom V1.0) Certification Exam is an advanced level certification exam that is designed for professionals who specialize in data communication technologies. H12-891_V1.0 exam is intended to test the knowledge, skills, and expertise of individuals in designing, implementing, and troubleshooting complex data communication networks. HCIE-Datcom V1.0 certification exam covers various topics, including network architecture, network protocols, network security, network virtualization, and data center technologies.

Huawei HCIE-Datcom V1.0 Sample Questions (Q87-Q92):

NEW QUESTION # 87

On an SR-MPLS network, manually configured prefix SIDs on different devices may conflict with each other. Assume that there are four routes (prefix/mask SID) as follows. Which of the following routes will be selected according to the conflict handling principle?

- A. 3.3.3.3/32 1
- B. 1.1.1.1/32 2
- C. 1.1.1.1/32 1
- D. 2.2.2.2/32 3

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In SR-MPLS, if prefix SIDs conflict, the following principles are applied:

Prefix with a smaller value (numerically lower SID) wins.

If the prefix length is the same, the lower SID value is selected.

In this case:

Both 1.1.1.1/32 2 (A) and 1.1.1.1/32 1 (B) have the same prefix length.

Since SID 1 is numerically smaller than SID 2, B (1.1.1.1/32 1) is selected.

The other routes (C and D) have different prefixes and do not directly conflict.

NEW QUESTION # 88

Man-in-the-middle attacks (MITM) or IP/MAC Spoofing attacks are common on intranets and can cause information leakage. Which configuration method can prevent these attacks?

- A. Configure association between DHCP snooping and IPSG or DAI on the switch.
- B. Limit the maximum number of MAC addresses that can be learned on a switch interface.
- C. Configure DHCP snooping to check the CHADDR field carried in a DHCP Request packet.
- D. Configure the trusted or untrusted interface.

Answer: A

Explanation:

Comprehensive and Detailed

✓ The Best Protection Against MITM and Spoofing Attacks:

(D) Associating DHCP Snooping with IPSG (IP Source Guard) and DAI (Dynamic ARP Inspection) provides complete protection by:

Blocking rogue DHCP servers.

Preventing MAC/IP spoofing.

Ensuring only valid clients access the network.

✓ Why Not Other Options?

(A) Configuring trusted/untrusted interfaces only helps block rogue DHCP servers, but does not prevent spoofing.

(B) Limiting MAC address learning prevents MAC flooding, but does not stop MITM attacks.

(C) Checking the CHADDR field in DHCP Snooping helps detect spoofed requests, but does not block all MITM scenarios.

NEW QUESTION # 89

Which of the following channels are involved in the Huawei SD-WAN Solution?

- A. Control channel
- B. Data channel
- C. Management channel
- D. Orchestration channel

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed In-Depth

The Huawei SD-WAN Solution involves four types of channels to ensure smooth and efficient network operation:

Management Channel (A): Used for managing and monitoring SD-WAN devices. It facilitates communication between the iMaster NCE-Campus controller and SD-WAN devices.

Control Channel (B): Responsible for transmitting control plane information such as routing updates and protocol control messages.

Data Channel (C): Carries actual user data traffic over the SD-WAN network.

Orchestration Channel (D): Used for service orchestration, configuration delivery, and policy management.

All four channels work together to provide comprehensive network management, data transmission, and service orchestration in an SD-WAN environment.

NEW QUESTION # 90

Free mobility implements policy management and permission control based on users' VLAN IDs and IP addresses.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

Why is Free Mobility Not Based on VLANs or IP Addresses?

* Free mobility in Huawei CloudCampus implements policy-based user access control based on user identity (rather than VLANs or IP addresses).

* Users can move across different network locations while maintaining their assigned security and access policies.

How Free Mobility Works:

* Policies are applied based on User Groups instead of VLAN or IP.

* Uses Group-Based Policy Control (GBP) and Software-Defined Access (SDA) principles.

Incorrect Statement Explanation:

* Traditional networks rely on VLANs and IP addresses for segmentation, but Free Mobility applies policies at the user level, allowing seamless access anywhere on the network.

NEW QUESTION # 91

Is the following GR description of ISIS correct?

- A. ISIS's GR has a total of four timers.
- B. The GR feature of ISIS is turned on by default.
- C. ISIS's GR notifies of events and maintains neighbor relationships through CSNP messages.
- D. ISIS's GR defines a new TLV structure to support this feature.

Answer: D
