No matter what kind of learning method you like, you can find the best one for you at JS-Dev-101 Exam Materials. And our JS-Dev-101 study braindumps contain three different versions: the PDF, Software and APP online.

Salesforce Certified JavaScript Developer - Multiple Choice Sample Questions (Q49-Q54):

NEW QUESTION # 49

A developer wrote the following code to test a `sum3` function that takes in an array of numbers and returns the sum of the first three numbers in the array, and the test passes.

A different developer made changes to the behavior of `sum3` to instead sum only the first two numbers present in the array.

Which two results occur when running this test on the updated `sum3` function? Choose 2 answers

- A. The line 05 assertion passes.
- B. The line 02 assertion passes.

- C. The line 02 assertion fails.
- D. The line 05 assertion fails.

Answer: B,D

NEW QUESTION # 50

is below:

```
<input type="file" onchange="previewFile()">
<img src="" height="200" alt="Image Preview...">
```

The JavaScript portion is:

```
01 function previewFile() {
02   const preview = document.querySelector('img');
03   const file = document.querySelector('input[type=file]').files[0];
04   //line 4 code
05   reader.addEventListener("load", () => {
06     preview.src = reader.result;
07   }, false);
08   //line 8 code
09 }
```

In lines 04 and 08, which code allows the user to select an image from their local computer, and to display the image in the browser?

- A. 04 const reader = new FileReader();08 if (file) URL.createObjectURL(file);
- B. 04 const reader = new FileReader();08 if (file) reader.readAsDataURL(file);
- C. 04 const reader = new File();08 if (file) URL.createObjectURL(file);
- D. 04 const reader = new File();08 if (file) reader.readAsDataURL(file);

Answer: B

NEW QUESTION # 51

Given the following code:

```
document.body.addEventListener('click', (event) => {
  if (/* CODE REPLACEMENT HERE */) {
    console.log('button clicked!');
  }
});
```

Which replacement for the conditional statement on line 02 allows a developer to correctly determine that a button on page is clicked?

- A. e.nodeTarget === this
- B. button.addEventListener('click')
- C. Event.clicked
- D. event.target.nodeName === 'BUTTON'

Answer: D

NEW QUESTION # 52

Given the code below:

```
01 setCurrentUrl();
02 console.log("The current URL is: " + url);
03
04 function setCurrentUrl() {
05   url = window.location.href;
06 }
```

What happens when the code executes?

- A. The url variable has local scope and line 02 throws an error.

- B. The url variable has global scope and line 02 throws an error.
- C. The url variable has local scope and line 02 executes correctly.
- D. The url variable has global scope and line 02 executes correctly.

Answer: D

Explanation:

Inside setCurrentUrl, url is assigned without var, let, or const:

```
url = window.location.href;
```

In non-strict mode, this implicitly creates a global variable url on window.

Execution order:

setCurrentUrl(); creates/sets global url to window.location.href.

console.log("The current URL is: " + url); has access to url in global scope and prints correctly.

Thus:

url has global scope.

Line 02 runs without error and logs a valid string.

So B is correct.

NEW QUESTION # 53

A developer is working on an ecommerce website where the delivery date is dynamically calculated based on the current day. The code line below is responsible for this calculation.

```
Const deliveryDate = new Date ();
```

Due to changes in the business requirements, the delivery date must now be today's date + 9 days.

Which code meets this new requirement?

- A. deliveryDate.date = new Date(+9) ;
- B. deliveryDate.setDate((new Date ()).getDate () +9);
- C. deliveryDate.setDate(Date.current () + 9);
- D. deliveryDate.date = Date.current () + 9;

Answer: B

NEW QUESTION # 54
