Answer: C

### NEW QUESTION # 12

What is a requirement for Smart DR?

- A. Primary and recovery file servers must have different domain names.
- B. File servers may have different FSVM numbers at the primary and recovery sites.
- C. The Files Manager must have only one file server.
- D. Primary and recovery file servers must support the same protocols.

Answer: D

### NEW QUESTION # 13

A corporate compliance team has asked an administrator to stop using default passwords in the environment. The administrator needs to update the password used on the FSVM.

In which order should the administrator change the FSVM's default password?

Task Step

Step 1

Step 2

step 3

Step 4

Select

Log onto a file server VM via SSH

Change the password

Respond to the prompts, providing the current and new Nutanix user password Repeat the steps on the remaining FSVMs A company decided to switch their existing Windows file server to a new Files instance. After successfully deploying Files, an administrator now needs to plan to reduce the impact of any potential outage. As the source file server resides across the WAN from the destination file server over an unreliable network connection.

The administrator needs to ensure there is minimal impact to data already copied, should a network outage occur.

How should the administrator meet this requirement?

- A. use a method allowing files to be copied in restartable mode.
- B. Check where the data copy failed and restart from that location.
- C. use Microsoft DFS-R to replicate the files.
- D. use rsync in incremental copy mode.

**Answer: A**

Explanation:

Task Step Step 1 Step 2 step 3 Step 4 Select Log onto a file server VM via SSH Change the password Respond to the prompts, providing the current and new Nutanix user password Repeat the steps on the remaining FSVMs
