## New JN0-253 Exam Prep & Exam JN0-253 Price

Our JN0-253 learning materials promise you that we will never disclose your privacy or use it for commercial purposes. And our JN0-253 study guide can achieve today's results, because we are really considering the interests of users. We are very concerned about your needs and strive to meet them. Our JN0-253 training prep will really protect your safety. As long as you have any problem about our JN0-253 exam braindumps, you can just contact us and we will solve it for you asap.

## Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.</li> </ul>

## Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q35-Q40):

### NEW QUESTION # 35

Which three categories of alert types are available in Juniper Mist? (Choose three.)

- A. Users
- B. Security
- C. Site
- D. Marvis
- E. Infrastructure

**Answer: B,D,E**

Explanation:

Alerts represent network and device issues that are ongoing. Juniper Mist™ categorizes them as follows:

\* Infrastructure Alerts-Repeated events involving servers and protocols that can potentially affect a large number of clients. For example, an event during which a Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), or RADIUS server is unreachable can affect many clients.

Similarly, if a power supply on a switch is in alarm state, a large number of clients and a large amount of traffic could be affected.

\* Marvis Alerts-Repeated events that Marvis tracks on the Marvis Actions dashboard. For example, if an access point (AP) regularly fails health checks, you'll see a Marvis alert for it.

\* Security Alerts-Repeated events that could dramatically affect network security. For example, these alerts appear if a rogue AP is detected and clients start connecting to it.

\* Certificate Alerts-Notification for expired, and soon-to-expire, user-added digital certificates. These include RadSec (configured at Organization > Settings > RadSec Certificates and AP RadSec certificate), SSO (configured at Organization > Settings > Single Sign-On), and PSK Portal IDP certificates (configured at Organization > Client Onboarding). Certificate alerts appear on the Alerts page and begin 30 days before the certificate's expiry date, then the notification repeats 15, 7, 3, and 1 day before expiration unless the certificate is renewed. .

### NEW QUESTION # 36

Which two statements are correct when considering Juniper Mist clouds? (Choose two.)

- A. Users created in a specific regional cloud can only manage organizations in that cloud.
- B. Creating a new user enables the user only for the cloud in which it was created.
- C. Users created in a specific regional cloud can manage organizations in other clouds.
- D. Creating a new user enables the user across all clouds.

**Answer: A,B**

Explanation:

The Juniper Mist Cloud operates as a regionally distributed cloud infrastructure, where each geographic region (for example, US, EU, APAC) hosts its own isolated Mist Cloud instance. This design ensures compliance with regional data privacy regulations, improves network performance, and enhances scalability and reliability.

According to the Juniper Mist Cloud Administration and Operations Guide, user accounts and organizations are region-specific, meaning:

"Users and organizations exist within specific regional Mist Clouds. A user account created in one regional cloud is valid only within that region and cannot be used to access organizations hosted in another cloud." This structure ensures data sovereignty and security while maintaining logical separation between regions.

When administrators create a new user, that user's credentials and access privileges apply only to the Mist Cloud region in which the

user was created.

Therefore:

\* B is correct because users created in a regional cloud can only manage organizations within that same cloud.

\* C is correct because a newly created user is enabled only for the regional cloud where it was registered.

Options A and D are incorrect because Mist Clouds are isolated - cross-region user or organization access is not supported.

### NEW QUESTION # 37

You are troubleshooting a wireless client's issue and you suspect it is related to DHCP latency.

In this scenario, which SLE should you review in the Mist UI?

- **A. Time to Connect**
- B. Coverage
- C. Capacity
- D. Throughput

**Answer: A**

Explanation:

Identify the Problem: Suspected issue related to DHCP latency while troubleshooting a wireless client.

Understanding SLEs:

Capacity: Related to the number of clients and bandwidth. Time to Connect: Measures the time taken for clients to connect, including DHCP latency.

Throughput: Measures the data transfer rate.

Coverage: Measures the signal strength and coverage area.

Selecting the Appropriate SLE:

Time to Connect is the relevant SLE as it includes metrics on DHCP latency, which affects the connection time.

Review the SLE:

Analyze the Time to Connect SLE to identify any latency issues with DHCP.

### NEW QUESTION # 38

Which two statements correctly describe Mist claim codes and activation codes? (Choose two.)

- **A. Claim codes may be used to claim only one AP.**
- **B. Activation codes may be used to claim multiple APs at once.**
- C. Claim codes may be used to claim multiple APs at once.
- D. An activation code is printed on a sticker on the AP.

**Answer: A,B**

Explanation:

Claim Codes: Claim codes are unique to each AP and can be used to claim only one AP at a time. This ensures each device is correctly registered and managed individually within the Mist system.

Activation Codes: Activation codes can be used to claim multiple APs at once, facilitating bulk onboarding and simplifying the setup process for large deployments.

### NEW QUESTION # 39

Which two statements are correct after you request the subscription renewal using e-mail? (Choose two.)

- **A. Juniper Mist e-mails the support request for the selected subscriptions.**
- B. Juniper Mist sends a welcome package with promotional materials.
- **C. Juniper Mist processes the order and sends an activation code.**
- D. Juniper Mist sends a cancellation notice.

**Answer: A,C**

Explanation:

When a customer requests a subscription renewal for Juniper Mist services via e-mail, the process is handled through a coordinated workflow between the Juniper Mist Cloud licensing system and Juniper Support. The renewal request ensures that existing service entitlements—such as Wireless Assurance, Wired Assurance, WAN Assurance, Marvis AI, or Premium Analytics—continue without interruption.

According to the Juniper Mist Cloud Licensing and Subscription Management Guide, the renewal workflow is described as follows: "When a renewal request is submitted via e-mail, Juniper Mist support receives and validates the request, initiates processing for the selected subscriptions, and issues a new activation code once the renewal is completed." Here's what happens after the renewal request:

- \* B. The Juniper Mist system sends a confirmation e-mail acknowledging the renewal request and routes it to support for processing.
- \* C. Once processed, Juniper Mist generates and delivers an activation code via e-mail that must be entered into the Mist portal to activate the renewed subscription(s).

Incorrect options:

- \* A. No promotional materials or physical packages are sent.
- \* D. A cancellation notice is not sent for renewal requests; it applies only to expired or terminated subscriptions.

Therefore, the correct answers are B. Juniper Mist e-mails the support request for the selected subscriptions and C. Juniper Mist processes the order and sends an activation code.
