You will get a list of actual Salesforce Platform-App-Builder test questions in Salesforce Platform-App-Builder pdf dumps file. Practicing with Web-based and desktop Platform-App-Builder practice test software you will find your knowledge gap.

Salesforce Certified Platform App Builder Sample Questions (Q216-Q221):

NEW QUESTION # 216

The app builder at Ursa Major Solar has just created a master-detail relationship between a parent object Galaxy__c and child object Star__c.

What would be the effect of creating this type of relationship if users want to report on Galaxy__c with Star__c?

- A. A Galaxy__c with Star__c report type will be automatically created.
- B. A new custom report type will need to be created for Star__c with lookup fields from Galaxy__c.
- C. A Star__c report type with Galaxy__c as a field will be automatically created.
- D. A new custom report type will need to be created for Galaxy__c with Star__c.

Answer: A

Explanation:

Explanation

A master-detail relationship between two objects automatically creates a report type that includes both objects.

The app builder does not need to create a custom report type for this scenario. The report type will have the format of Parent object with Child object

NEW QUESTION # 217

The VP of Sales wants a Chatter post to the All-Sales private group when an opportunity goes to the closed won stage.

What two tools should the app builder use to automate this process? Choose 2 answers

- A. Big Deal Alert
- B. Process Builder
- C. Flow
- D. Workflow

Answer: B,D

Explanation:

Explanation

The app builder should use two tools to automate this process:

Process Builder: This is a type of automation tool that can execute actions based on certain criteria. In this case, the process builder can have a criteria that evaluates if an opportunity goes to the closed won stage, and then execute an action that posts a message to a Chatter group.

Workflow: This is another type of automation tool that can execute actions based on certain criteria. In this case, the workflow can have a criteria that evaluates if an opportunity goes to the closed won stage, and then execute an action that posts a message to a Chatter group. Option A and C are not tools that can automate this process.

NEW QUESTION # 218

What is a key consideration when using Unmanaged packages? Choose 2 answers

- A. A namespace is not required to create an Unmanaged package
- B. The person who created the Unmanaged package can change or upgrade installed components
- C. The person who created the Unmanaged package has no control over the installed components
- D. A namespace is required to create an Unmanaged package

Answer: C,D

NEW QUESTION # 219

Cloud Kicks works on an annual subscription model. When a sales rep marks an opportunity as closed won, a new opportunity should automatically be created for the renewal. The contracts team works outside of Salesforce but also needs to be notified about closed deals in order to initiate the contract process with the customer.

Which automation solution would meet these requirements?

- A. Process Builder
- B. Workflow Rule
- C. Approval Process
- D. Validation Rule

Answer: A

Explanation:

The automation solution that would meet these requirements is Process Builder. Process Builder is a tool that can create and update records, send email alerts, submit records for approval, invoke flows, call Apex classes, and post to Chatter based on certain criteria and actions. The app builder can use Process Builder to create a process that starts when an opportunity is marked as closed won, creates a new opportunity record for the renewal with pre-populated fields, and sends an email alert to the contracts team. Option A is incorrect because an approval process is not suitable for this requirement, as approval processes are used to define the steps and criteria for approving records. Option B is incorrect because a validation rule is not suitable for this requirement, as validation rules are used to enforce data quality and prevent users from saving invalid records. Option D is incorrect because a workflow rule is not suitable for this requirement, as workflow rules are considered legacy tools and have limitations compared to Process Builder.

NEW QUESTION # 220

UVC's CFO has asked that all deals with more than a 40% discount get automatically sent to the VP of Finance. He will review these deals without the sales rep needing to take action. Which two ways can this be accomplished without building code? Choose two answer

- **A. Launch a new approval process that has automatic submission enabled as an initial submission action**
- **B. Create a new process with a submit for approval action to automatically submit deals for approval**
- C. Create a new approval process that has automatic submission enabled in the entry criteria
- D. Launch a flow that uses the submit for approval action to submit deals for approval

Answer: A,B

NEW QUESTION # 221

.....
