

# CompTIA CNX-001 Dumps Cost - CNX-001 VCE Exam Simulator

BTW, DOWNLOAD part of Dumpkiller CNX-001 dumps from Cloud Storage: <https://drive.google.com/open?id=1ESciKEI2Q5WnsPn12E5JF4aaJ5tZAEhx>

The Dumpkiller is committed to making the CompTIA CNX-001 exam practice test question the ideal study material for quick and complete CompTIA CloudNetX Certification Exam (CNX-001) exam preparation. To achieve this objective the "Dumpkiller" is offering real, valid, and updated CNX-001 Exam Practice test questions in three different formats. These formats are Dumpkiller CNX-001 PDF dumps files, desktop practice test software, and web-based practice test software.

## CompTIA CNX-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Network Operations, Monitoring, and Performance:</b> This section of the exam measures skills of Network Operations Specialists and covers day-to-day operational management of network environments. It involves configuring monitoring tools, analyzing performance data, and responding to alerts. Candidates are evaluated on their ability to maintain network health, optimize throughput, and ensure consistent uptime by applying best practices for proactive performance tuning and operations management.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Network Security:</b> This section of the exam measures the skills of Security Engineers and covers core practices for protecting network infrastructure. It includes applying firewall rules, implementing access control measures, and designing secure segmentation strategies. The content emphasizes threat mitigation techniques, secure configuration of networking devices, and adherence to compliance frameworks, preparing professionals to safeguard both internal and external network assets effectively.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Network Troubleshooting:</b> This section of the exam measures the skills of Network Support Engineers and covers diagnosing and resolving connectivity and performance issues across various network layers. It focuses on identifying root causes, using diagnostic tools, and applying systematic troubleshooting methodologies. The goal is to ensure that professionals can minimize downtime, restore service quickly, and prevent recurring problems by maintaining a resilient and stable network environment.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Network Architecture Design:</b> This section of the exam measures the skills of Network Architects and covers the ability to design scalable, secure, and efficient network architectures. It focuses on understanding design principles, selecting appropriate network components, and aligning architecture decisions with organizational needs. Candidates are expected to demonstrate a solid grasp of topology planning, high-availability configurations, and integration of cloud and on-premise systems to ensure reliability and performance.</li> </ul>

## CNX-001 VCE Exam Simulator, Test CNX-001 Online

The CompTIA CNX-001 certification exam is a valuable asset for beginners and seasonal professionals. If you want to improve your career prospects then CNX-001 certification is a step in the right direction. Whether you're just starting your career or looking to advance your career, the CompTIA CNX-001 Certification Exam is the right choice.

### CompTIA CloudNetX Certification Exam Sample Questions (Q76-Q81):

#### NEW QUESTION # 76

A partner is migrating a client from on premises to a hybrid cloud. Given the following project status information, the initial project timeline estimates need to be revised:

Phase	Initial estimate	Current status
Discovery	1 month	2 months
Design	2 weeks	1 month
Implementation	6 months	9 months
Knowledge transfer	2 months	3 months

Which of the following documents needs to be revised to best reflect the current status of the project?

- A. BIA
- **B. WBS**
- C. SLA
- D. SOW

**Answer: B**

Explanation:

The Work Breakdown Structure is where each project phase and its duration are documented in detail. Since the estimated timelines for discovery, design, implementation, and knowledge transfer have all slipped, you update the WBS to reflect the new, actual phase durations.

#### NEW QUESTION # 77

An architect needs to deploy a new payroll application on a cloud host. End users' access to the application will be based on the end users' role. In addition, the host must be deployed on the 192.168.77.32/30 subnet.

Which of the following Zero Trust elements are being implemented in this design? (Choose two.)

- A. CASB
- **B. Microsegmentation**
- **C. Least privilege**
- D. Device trust
- E. WAF
- F. MFA

**Answer: B,C**

Explanation:

Least privilege: Granting users access to the payroll app strictly according to their roles enforces the principle of least privilege.

Microsegmentation: Placing the host in its own 192.168.77.32/30 subnet isolates it from other workloads, achieving microsegmentation.

#### NEW QUESTION # 78

A company provides an API that runs on the public cloud for its customers. A fixed number of VMs host the APIs. During peak hours, the company notices a spike in usage that results in network communication speeds slowing down for all customers. The management team has decided that access for all customers should be fair and accessible at all times. Which of the following is the most cost-effective way to address this issue?

- A. Enable throttling on APIs.
- B. Increase the MTU on the VMs.
- C. Increase the number of VMs running APIs.
- D. Use an allow list for customers using APIs.

**Answer: A**

Explanation:

Implementing request throttling (rate limiting) lets you cap how many requests each customer can make per time unit. This ensures no single user can saturate the API servers, providing fair access across all customers without the recurring costs of adding more VMs.

#### NEW QUESTION # 79

A network engineer is designing a Layer 2 deployment for a company that occupies several floors in an office building. The engineer decides to make each floor its own VLAN but still allow for communication between all user VLANs. The engineer also wants to reduce the time necessary for STP convergence to occur when new switches come online. Which of the following should the engineer enable to accomplish this goal?

- A. Tagging
- B. Priority
- C. BPDU Guard
- D. Portfast

**Answer: D**

Explanation:

Enabling PortFast on access ports lets them immediately enter the forwarding state, skipping the STP listening /learning timers, and dramatically speeds up convergence when switches or end-stations come online.

#### NEW QUESTION # 80

An administrator must ensure that credit card numbers are not contained in any outside messaging or file transfers from the organization. Which of the following controls meets this requirement?

- A. Encryption in transit
- B. Egress filtering
- C. Intrusion detection system
- D. Data loss prevention

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Data Loss Prevention (DLP) solutions scan messages and file transfers for sensitive data patterns, such as credit card numbers or social security numbers. DLP can block, log, or alert when such information is detected attempting to leave the organization.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Data Protection and Compliance Controls":

"DLP systems identify and restrict the transmission of sensitive data such as credit card numbers, enforcing organizational data handling policies." Other options:

\* A. IDS detects threats but doesn't enforce data content policies.
