

AB-900 Exam Questions are Available in 3 Easy-to-Understand Formats

2026 Latest ExamDiscuss AB-900 PDF Dumps and AB-900 Exam Engine Free Share: https://drive.google.com/open?id=14hnBLHUMAbUz1ehf3aCHe8DFj_2vtcH5

ExamDiscuss constantly attract students to transfer their passion into progresses for the worldwide feedbacks from our loyal clients prove that we are number one in this field to help them achieve their dream in the AB-900 exams. For we have the guarantee of high quality on our AB-900 exam questions, so our AB-900 practice materials bring more outstanding teaching effect. And instead of the backward information accumulation of learning together can make students feel great burden, our latest AB-900 exam guide can meet the needs of all kinds of students on validity or accuracy.

Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.
Topic 2	<ul style="list-style-type: none">Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.
Topic 3	<ul style="list-style-type: none">Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.

100% Pass Quiz Microsoft - Useful AB-900 - Reliable Microsoft 365 Copilot & Agent Administration Fundamentals Exam Cost

They work together and strive hard to design and maintain the top standard of Microsoft AB-900 exam questions. So you rest assured that the AB-900 exam questions you will not only ace your Microsoft 365 Copilot & Agent Administration Fundamentals certification exam preparation but also be ready to perform well in the final AB-900 Certification Exam. The AB-900 exam are the real AB-900 exam practice questions that will surely repeat in the upcoming Microsoft 365 Copilot & Agent Administration Fundamentals (AB-900) exam and you can easily pass the exam.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q14-Q19):

NEW QUESTION # 14

A user named User1 is responsible for quarterly sales reporting.

User1 needs to identify performance trends, generate visual insights, and create a summary of anomalies across multiple files that contain various datasets.

What should you use

- A. Copilot in Excel
- B. the Researcher agent in Microsoft 365 Copilot
- C. Microsoft 365 Copilot Search
- D. the Analyst agent in Microsoft 365 Copilot

Answer: D

Explanation:

The correct answer is D. the Analyst agent in Microsoft 365 Copilot. Microsoft Learn training for Microsoft 365 Copilot specifically distinguishes the Analyst agent as the tool for gathering insights from data and enhancing data presentations. Microsoft's guidance also notes in the Researcher FAQ that when the task is spreadsheet-related, Analyst agent is better suited for Microsoft Excel related tasks. This makes Analyst the best choice for a quarterly sales reporting scenario that involves detecting performance trends, surfacing anomalies, and producing visual insights from multiple datasets.

The other options are less suitable. Researcher is intended for complex multi-step research and source-cited reports across web and work content, not specialized data analysis across files. Microsoft 365 Copilot Search is for finding information, not for deep quantitative analysis and anomaly summarization. Copilot in Excel is powerful for workbook-level analysis, but the question emphasizes broader insight generation across multiple files and asks for the best Copilot experience for trends, visuals, and anomaly summaries. Microsoft positions Analyst as the dedicated agent for that kind of data-analysis workflow.

NEW QUESTION # 15

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area	Statements	Yes	No
	A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input checked="" type="radio"/>	<input type="radio"/>
	A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input checked="" type="radio"/>	<input type="radio"/>
	A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input checked="" type="radio"/>	<input type="radio"/>

The correct selections are Yes, Yes, Yes . For statement 1, Microsoft Support explains that if you are not a site owner, you might still be able to invite other people to the site , although the invitation can generate an access request that a site owner approves or declines. Microsoft also states that site users have the opportunity to invite other people to collaborate on sites , unless that feature is disabled. That makes the statement true.

For statement 2, Microsoft Learn states that in SharePoint you can give people permissions to a site by adding individual users, security groups, or Microsoft 365 groups to one of the three SharePoint groups, including the Members group. That directly supports the statement.

For statement 3, Microsoft documents that site ownership and membership can be managed by adding or removing owners, members, site owners, site members, and site visitors . For group-connected sites, Microsoft also documents that owners can manage group ownership and remove owner status. Therefore, a site owner can remove another site owner, provided at least one owner remains.

NEW QUESTION # 16

A manager asks: "What is the main capability difference between Microsoft 365 Copilot (built into Word/Excel) and a custom AI Agent built in Copilot Studio?" What is the correct answer?

- A. Custom Agents are only accessible via the Copilot Studio portal, while Copilot is embedded in apps
- B. Only built-in Copilot can access and summarize Microsoft Graph data
- C. Built-in Copilot is a broad productivity assistant; custom AI Agents are designed for specific multi- step tasks and integrations with external systems
- D. Only custom AI Agents can ground responses in organizational data

Answer: C

Explanation:

Microsoft 365 Copilot is a general-purpose tool integrated across the M365 suite, assisting with tasks like drafting emails, summarizing documents, and generating presentations. A custom AI Agent (built with Copilot Studio) is designed to solve a narrow, specific, and often complex business problem, frequently requiring interaction with external, non-M365 data sources or APIs (via connectors) to execute specific actions or complete multi-step workflows.

NEW QUESTION # 17

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area	Statements	Yes	No
	Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input type="radio"/>
	Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input type="radio"/>	<input type="radio"/>
	Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input checked="" type="radio"/>

The correct selections are No, Yes, No . Statement 1 is No because Microsoft 365 Copilot is a work service that requires users to sign in with a work or school account . Microsoft documentation for setup and use consistently describes licensing and access in the context of signed-in organizational users, not anonymous access. Statement 2 is Yes because Microsoft documents that administrators can manage self-service purchases and trials in the Microsoft 365 admin center , including allowing or blocking eligible products for self-service acquisition. That means admins can allow self-service purchasing where the product is eligible. Statement 3 is No because Microsoft explicitly states that assigning Microsoft 365 Copilot licenses to cross-tenant users, including guests , isn't supported.

NEW QUESTION # 18

A user is blocked from signing in and the admin suspects Conditional Access or a risky sign-in detection. Which two tools in the Microsoft Entra admin center should the administrator use first to identify the exact sign-in failure and which policy caused it? (Select TWO)

- A. Exchange Online Message Trace
- B. Microsoft Entra ID Application proxy
- C. Conditional Access What If tool
- D. Microsoft 365 Service Health dashboard
- E. Sign-in logs and Troubleshoot and support in Microsoft Entra ID

Answer: C,E

Explanation:

Option A: This tool allows the administrator to simulate a sign-in for a specific user under specific conditions (e.g., location, device state) to determine which Conditional Access policies would apply and whether they would result in a grant or a block. This is ideal for pre-emptively troubleshooting a suspected Conditional Access block.

Option C: The Sign-in logs are the definitive source of truth for all sign-in attempts, providing the outcome, the reason for failure (including block by Conditional Access or ID Protection), and the policy name that was applied. The Troubleshoot and support blade often provides targeted troubleshooting flows for sign-in and access issues.
