With the Citrix 1Y0-312 Certification Exam, IT professionals can demonstrate their expertise in advanced administration of Citrix Virtual Apps and Desktops 7.

Citrix Virtual Apps and Desktops 7 Advanced Administration Sample Questions (Q79-Q84):

NEW QUESTION # 79

For which three reasons are connectors needed to create layers? (Choose three.)

- A. To deploy a packaging disk
- B. To publish a layered image
- C. To export an elastic application layer
- D. To import a prepared OS image
- E. To import a prepared application layer

Answer: A,B,D

Explanation:

The appliance uses connectors for accessing locations in your hypervisor environment or provisioning service.

You configure each connector with the credentials for a specific location in your virtual environment. Each of your connector configurations includes the credentials required for the appliance to do one of the following:

Import the OS for the OS layer.

Package layers during layer creation.

Publish layered images to a specific location.
