

# Pdf F5CAB3 Exam Dump | 100% Free High-quality BIG-IP Administration Data Plane Configuration Exam Cost

BONUS!!! Download part of TestPDF F5CAB3 dumps for free: <https://drive.google.com/open?id=1eYPmjylyVmD4a06LYp9C4dCigE1mhTzq>

Stop wasting time on meaningless things. There are a lot wonderful things waiting for you to do. You still have the opportunities to become successful and wealthy. The F5CAB3 study materials is a kind of intelligent learning assistant, which is capable of aiding you pass the F5CAB3 Exam easily. If you are preparing the exam, you will save a lot of troubles with the guidance of our F5CAB3 study materials. Our company is aimed at relieving your pressure from heavy study load. So we strongly advise you to have a try.

The F5 F5CAB3 practice exam will be a great help because you are left with little time to prepare for the F5 F5CAB3 certification exam which you cannot waste to make time for the F5 F5CAB3 Exam Questions. Get the F5 F5CAB3 certification by preparing through F5 F5CAB3 exam questions that will help you pass the F5 F5CAB3 exam.

## TestPDF Offers Valid and Real F5CAB3 BIG-IP Administration Data Plane Configuration Exam Questions

In addition to the F5 F5CAB3 PDF questions, we offer desktop F5CAB3 practice exam software and web-based F5CAB3 practice test to help applicants prepare successfully for the actual BIG-IP Administration Data Plane Configuration exam. These BIG-IP Administration Data Plane Configuration practice exams simulate the actual F5CAB3 Exam conditions and provide an accurate assessment of test preparation. Our desktop-based F5CAB3 practice exam software needs no internet connection.

## F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q49-Q54):

### NEW QUESTION # 49

The BIG-IP Administrator has to provide encrypted communication between the users and the virtual server they access. Multiple hostnames are configured in DNS with the same IP address. Which profile type and setting in the profile should be used?

- A. Client SSL, Client Name
- B. Server SSL, Client Name

- C. Server SSL, Server Name
- D. Client SSL, Server Name

**Answer: D**

Explanation:

When a single IP address (Virtual Server) must host multiple hostnames (e.g., site1.com, site2.com) over HTTPS, the BIG-IP must be able to present the correct SSL certificate for each site during the initial handshake. This requirement is handled by a technology called Server Name Indication (SNI).

To implement this on the BIG-IP, the administrator must use a Client SSL profile because the encryption is occurring between the user (Client) and the Virtual Server. Within the Client SSL profile settings, there is a field called Server Name. By creating multiple Client SSL profiles-each with a different "Server Name" (the hostname) and its corresponding certificate-and attaching them all to the same Virtual Server, the BIG-IP can inspect the SNI extension in the client's "Client Hello" packet. It then selects the specific profile that matches the requested hostname.

Option A is incorrect because "Client Name" is not the standard field name used for SNI hostname matching in the profile. Options B and C refer to Server SSL profiles, which manage the connection between the BIG-IP and the backend servers. While Server SSL profiles also have a "Server Name" field (used to send SNI to a backend server), the requirement here is to provide encrypted communication for "users" accessing the virtual server, which definitively requires a Client-side SSL configuration.

### NEW QUESTION # 50

All pool members are online and all other settings are default.

What might alter the load balancing behavior?

- A. Adding a persistence profile
- B. Enabling SNAT Automap
- C. Adding a OneConnect profile
- D. Enabling an HTTP fallback host

**Answer: A**

Explanation:

Persistence overrides load balancing decisions by maintaining client-to-server affinity.

### NEW QUESTION # 51

In a pool there are 2 pool members (older servers) that can handle fewer connections than the other 3 newer servers.

Which load balancing method would allow more traffic to be directed to the newer servers? (Choose one answer)

- A. Global Availability
- B. Round Robin
- C. Weighted Least Connections (member)
- D. Least Connections (member)

**Answer: C**

Explanation:

This scenario requires unequal load distribution based on server capacity. The newer servers must receive more connections than the older ones, while still dynamically accounting for active connection counts.

According to BIG-IP Administration: Data Plane Configuration documentation:

Weighted Least Connections (member) combines:

Connection awareness (least connections)

Administrator-defined weights (ratios) to reflect server capacity

Pool members with higher weights receive proportionally more new connections than members with lower weights, even when using the same load balancing algorithm.

Why B is correct:

Allows assigning higher weights to newer servers and lower weights to older servers Ensures smarter traffic distribution based on both capacity and real-time load Why the other options are incorrect:

A . Global Availability

Used for disaster recovery and site failover, not intra-pool load distribution.

C . Round Robin

Distributes connections evenly without considering server capacity.

D. Least Connections (member)

Balances only by current connection count and does not account for differences in server performance or capacity.

Correct Resolution:

Use Weighted Least Connections (member) and assign higher weights to newer servers so they receive more traffic while protecting older servers from overload.

### NEW QUESTION # 52

Due to a change in application requirements, a BIG-IP Administrator needs to modify the configuration of a Virtual Server to include a Fallback Persistence Profile.

Which persistence profile type should the BIG-IP Administrator use?

- A. SSL
- B. Universal
- C. Hash
- D. Source Address Affinity

**Answer: D**

Explanation:

Fallback persistence is used when the primary persistence method fails. Source Address Affinity is a Layer 4 persistence method and is fully supported as a fallback option for most virtual server types.

### NEW QUESTION # 53

Refer to the exhibit.

<input checked="" type="checkbox"/>	Status	Member	Address	Service Port
<input type="checkbox"/>		10.200.50.210:80	10.200.50.210	80
<input type="checkbox"/>		10.200.50.210:21	10.200.50.210	21
<input type="checkbox"/>		10.200.50.211:443	10.200.50.211	443
<input type="checkbox"/>		10.200.50.211:22	10.200.50.211	22

A BIG-IP Administrator needs to configure health monitors for a newly configured server pool named Pool\_B. Which health monitor settings will ensure that all pool members will be accurately marked as available or unavailable?

- A. HTTPS, HTTP, FTP, and ICMP, with the Availability Requirement of all health monitors
- B. HTTPS, HTTP, FTP, and SSH with the Availability Requirement of all health monitors
- C. HTTPS and HTTP with the Availability Requirement of at least one health monitor
- D. HTTPS, HTTP, FTP, and SSH, with the Availability Requirement of at least one monitor

**Answer: D**

Explanation:

The pool member list in the exhibit shows servers listening on four distinct service ports: 80 (HTTP), 21 (FTP), 443 (HTTPS), and 22 (SSH). To accurately monitor a pool where members provide different services, the administrator must apply monitors that correspond to each of those specific services.

The key to this configuration is the Availability Requirement (also known as "Monitor Rule"). If the administrator sets the requirement to "All health monitors," every single monitor (HTTP, HTTPS, FTP, and SSH) must pass for a member to be marked "Up." This would cause an immediate failure: for example, a server listening only on port 80 would fail the HTTPS, FTP, and SSH checks, resulting in the member being marked "Down" even if the HTTP service is healthy.

To ensure accuracy, the administrator should apply all four relevant monitors and set the Availability Requirement to at least one monitor. With this setting, the BIG-IP marks a member as "Up" if any of the assigned monitors return a successful response.

Therefore, the member at 10.200.50.210:80 will stay "Up" as long as the HTTP monitor passes, even though it fails the FTP, HTTPS, and SSH monitors. This configuration allows a single pool to contain diverse service types while ensuring that the specific port defined for each member is verified correctly. Option C is incorrect because ICMP only checks if the IP is alive, not if the specific service port is functioning.

## NEW QUESTION # 54

.....

With all this reputation, our company still take customers first, the reason we become successful lies on the professional expert team we possess , who engage themselves in the research and development of our F5CAB3 learning guide for many years. So we can guarantee that our F5CAB3 exam materials are the best reviewing material. Concentrated all our energies on the study F5CAB3 learning guide we never change the goal of helping candidates pass the exam. Our F5CAB3 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our F5CAB3 exam materials, and you won't be regret.

**F5CAB3 Exam Cost:** <https://www.testpdf.com/F5CAB3-exam-braindumps.html>

They exert great effort to boost the quality and accuracy of our F5CAB3 study tools and is willing to work hard as well as willing to do their part in this area, 100% Pass Guarantee and Money Back Policy If Candidates Fail The Exam To make the F5 F5CAB3 Exam Cost F5CAB3 Exam Cost candidates be more peace and less worried on the F5 F5CAB3 Exam Cost F5CAB3 Exam Cost certification exams, TestPDF F5CAB3 Exam Cost gives promise and 100% pass guarantee policy, F5 Pdf F5CAB3 Exam Dump You know what, numerous people accompany with you to prepare for an examination and assist you pass.

Instead, an e-business is able to sell goods and services through all of these Pdf F5CAB3 Exam Dump methods concurrently, with the price of the goods or services fluctuating minute by minute, based on actual customer demand and price sensitivity.

## F5 - F5CAB3 –Useful Pdf Exam Dump

Change program flow using the `if` command, They exert great effort to boost the quality and accuracy of our F5CAB3 study tools and is willing to work hard as well as willing to do their part in this area.

100% Pass Guarantee and Money Back Policy If F5CAB3 Candidates Fail The Exam To make the F5 F5-CA candidates be more peace and less worried on the F5 F5-CA F5CAB3 Exam Cost certification exams, TestPDF gives promise and 100% pass guarantee policy.

You know what, numerous people accompany with you to prepare for an examination and assist you pass, It just likes a F5CAB3 study guide book, It is the software based on WEB browser.
