Salesforce is a cloud-based customer relationship management (CRM) software that helps businesses manage their customer interactions and sales processes. The Salesforce Platform-App-Builder Certification is designed for professionals who want to demonstrate their skills in building custom applications on the Salesforce platform. Salesforce Certified Platform App Builder certification is perfect for those who are already working as Salesforce developers, administrators, or consultants.

Salesforce Certified Platform App Builder Sample Questions (Q58-Q63):

NEW QUESTION # 58
Which statements are correct about encrypted fields among the following? (Choose four.)

- A. Encrypted fields are not available in lead conversion, workflow rule criteria or formulas, formula fields, outbound messages, default values, and Web-to-Lead and Web-to-Case forms.
- B. Encrypted fields are not searchable and cannot be used to define report criteria.
- C. Encrypted fields can be included in search results, and report results.

- D. Encrypted text fields can be an external ID and can have default values.
- E. They are not available for use in filters such as list views, reports, roll-up summary fields, and rule filters.

Answer: A,B,C,E

NEW QUESTION # 59
Which statement is true about field update actions from workflow rules and approval processes? Choose 2 answers

- A. Field updates are tracked in the history related list of a record regardless of whether or not History tracking is set for those fields.
- B. Field update are not available on currency field if the organization uses multi-currency.
- C. Field update with "re-evaluate workflow rules" selected can cause a recursive loop if the updated field is included in a workflow.
- D. Field updates to records based on workflow rules and approval processes do not trigger validation rules

Answer: C,D

NEW QUESTION # 60
The recruiters at Universal Containers have requested that the candidate list view match the look and feel of the employee referral web page. What can be used to accomplish this?

- A. Page Layouts
- B. Record Types
- C. Publisher Actions
- D. Visualforce

Answer: D

NEW QUESTION # 61
Universal Containers utilizes opportunities and a custom object called Detaited.Sales__c. The company would like to roll sales metrics up to an opportunity for only Detailed.Sales__c records that have their picklist status set to Active.
What is the recommended method for the app builder to achieve this request?

- A. Create a lookup relationship between the parent and child object with a roll-up summary held that filters on the status field.
- B. Create a master-detail relationship between the parent and child object with a roll-up summary field that fitters on the status held.
- C. Utilize the AppExchange to download a third-party application that can roll_up the sales dollars with the appropriate filter.
- D. Utilize Apex code to roll up the desired amounts.

Answer: B

Explanation:
Create a master-detail relationship between the parent and child object with a roll-up summary field that filters on the status field is the recommended method for the app builder to achieve the request of rolling up sales metrics to an opportunity for only Detailed.Sales__c records that have their picklist status set to Active. According to the Salesforce documentation, "Roll-up summary fields calculate values from related records, such as those in a master-detail relationship." A roll-up summary field can filter on a field value of the child records and sum up only those records that match the criteria. Utilize the AppExchange to download a third-party application that can roll up the sales dollars with the appropriate filter, create a lookup relationship between the parent and child object with a roll-up summary field that filters on the status field, and utilize Apex code to roll up the desired amounts are not valid or necessary methods for this request.

NEW QUESTION # 62
You can have multiple records with the same external ID.

- A. False
- B. True

Answer: B

Explanation:
Explanation: It is not recommended, as it will defeat the purpose of the external id.

NEW QUESTION # 63
