Answer: B

The IT Contact is the person who receives the welcome email from SAP and is responsible for setting up the initial access to SAP Cloud ALM. The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the implementation project and assigning tasks to the other project team members1. The project manager is a partner role that has the authorization to create and manage projects in SAP Cloud ALM2. References = Setting up the Implementation Project in SAP Cloud ALM, Teams, Roles, and Access Restrictions | SAP Help Portal In the context of SAP Cloud ALM (Application Lifecycle Management), the IT Contact is typically responsible for the initial setup and assignment of roles within the project. The first role to which the IT Contact often assigns access permission is:
* Project manager: The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM. This access allows the project manager to monitor project progress, manage resources, and make informed decisions, facilitating successful project execution and alignment with business goals.
Granting the project manager access to SAP Cloud ALM is a strategic decision that empowers them to lead the project efficiently, leveraging the platform's capabilities for project management, monitoring, and collaboration.
