We will give you the best service and suggestion on the GitHub-Copilot study material.

GitHub GitHub-Copilot Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> How GitHub Copilot Works and Handles Data: This section of the exam measures the skills of Data Security Specialists and DevOps Engineers and covers how GitHub Copilot processes data, handles code suggestions and manages privacy concerns. It explains the data pipeline for Copilot’s suggestions, how it gathers context, and how prompts are processed through its AI model. The section also discusses the limitations of AI-generated code, the effects of historical data on suggestions, and the role of prompt crafting. Best practices for improving prompt effectiveness and optimizing AI-generated responses are included.

Topic 2	<ul style="list-style-type: none"> • Prompt Engineering: This section of the exam measures skills of AI Engineers and Software Developers and covers the fundamentals of prompt engineering, including key principles, techniques, and best practices for generating high-quality outputs. It explains different prompting strategies such as zero-shot and few-shot prompting, how context influences AI-generated responses, and the role of structured prompts in guiding Copilot's behavior. It also discusses the prompt lifecycle and ways to enhance model performance through refined input instructions.
Topic 3	<ul style="list-style-type: none"> • GitHub Copilot Plans and FeaturesThis section of the exam measures the skills of Software Engineers and IT Administrators and covers different GitHub Copilot plans, including Individual, Business, and Enterprise editions. It explains the integration of GitHub Copilot within IDEs and discusses key features such as inline chat, multiple suggestions, and exception handling. The section details the policies for managing GitHub Copilot within organizations, including auditing logs and API management. It also highlights advanced functionalities like knowledge bases for improved code quality and best practices for Copilot Chat usage.
Topic 4	<ul style="list-style-type: none"> • Developer Use Cases for AI: This section of the exam measures skills of Full-Stack Developers and Cloud Engineers and covers how AI enhances developer productivity across various tasks such as learning new programming languages, debugging, writing documentation, and refactoring code. It discusses how GitHub Copilot integrates with the Software Development Lifecycle (SDLC) and its role in modernizing legacy applications. It also highlights the use of AI for personalized responses, sample data generation, and improving overall efficiency in software development.

GitHub Copilot Certification Exam Sample Questions (Q116-Q121):

NEW QUESTION # 116

Which Copilot Individual features are available when using a supported extension for Visual Studio, VS Code, or JetBrains IDEs? (Each correct answer presents part of the solution. Choose two.)

- A. Knowledge Base
- B. Code suggestions
- C. Chat
- D. Pull Request Diff Analysis

Answer: B,C

NEW QUESTION # 117

A company is currently storing code in Bitbucket and would like to use GitHub Copilot. Which GitHub Copilot plan will be most cost effective to allow them to manage users with their Identity Provider (e.g. Okta)?

- A. GitHub Copilot Enterprise
- B. GitHub Copilot Teams
- C. GitHub Copilot Business for non-GHE customers
- D. GitHub Copilot Individual

Answer: A

Explanation:

GitHub Copilot Enterprise is the most cost-effective plan for managing users with an Identity Provider like Okta, as it provides enterprise-level features and integration.

NEW QUESTION # 118

What type of information can you retrieve through GitHub Copilot Business Subscriptions via REST API? Each correct answer presents part of the solution. (Choose two.)

- A. List all GitHub Copilot seat assignments for an organization
- B. View code suggestions for a specific user
- C. List of all unsubscribed GitHub Copilot members within an organization

- D. Get a summary of GitHub Copilot usage for organization members

Answer: A,D

Explanation:

The REST API includes a List all Copilot seat assignments for an organization endpoint, which returns every active seat currently being billed for that org There's also a Get Copilot metrics for an organization endpoint that provides a summary of usage data across all organization members

NEW QUESTION # 119

What do you check when GitHub Copilot content exclusions are not working? Each correct answer presents part of the solution. (Choose two.)

- A. If GitHub Copilot can connect to the server selected in your user settings.
- B. If the user is in an organization that has content exclusions configured.
- C. If the content exclusion settings changed in the last 30 minutes or before that.
- D. If the user is part of the content exclusion team that limits the use of content exclusions.

Answer: B,C

Explanation:

Verify that the user belongs to an organization (or enterprise) where content exclusion rules have actually been set up. Check whether the exclusion policy was recently modified - changes can take up to 30 minutes to propagate before they take effect.

NEW QUESTION # 120

An independent contractor develops applications for a variety of different customers. Assuming no concerns from their customers, which GitHub Copilot plan is best suited?

- A. GitHub Copilot Business for non-GHE Customers
- B. GitHub Copilot Business
- C. GitHub Copilot Individual
- D. GitHub Copilot Teams
- E. GitHub Copilot Enterprise

Answer: C

Explanation:

For an independent contractor, GitHub Copilot Individual is the most suitable and cost-effective plan.

NEW QUESTION # 121

.....
