

Interactive Cisco 300-445 EBook & Valid 300-445 Exam Forum

ActualTorrent expect to design such an efficient study plan to help you build a high efficient learning attitude for your further development. Our 300-445 study torrent are cater every candidate no matter you are a student or office worker, a green hand or a staff member of many years' experience. Therefore, you have no need to worry about whether you can pass the 300-445 Exam, because we guarantee you to succeed with our technology strength. The language of our 300-445 exam questions are easy to follow and the pass rate of our 300-445 learning guide is as high as 99% to 100%.

Cisco 300-445 Exam Syllabus Topics:

Topic	Details
Topic 1	Insights and Alerts: This domain addresses configuring alert rules based on network conditions and end-user experience factors. It covers selecting metrics for stakeholders, validating alerts, and recommending network optimization for capacity planning.
Topic 2	Data Analysis: This domain encompasses diagnosing network issues like packet loss, congestion, routing, and jitter, plus end-device problems. It includes analyzing web application performance and identifying security threats such as DDoS attacks, DNS hijacking, and BGP hijacking.
Topic 3	Data Collection Implementation: This domain focuses on deploying enterprise and endpoint agents across infrastructure and end-user devices. It covers configuring network, DNS, voice, web, and endpoint tests using ThousandEyes and Meraki Insights, along with implementing synthetic web tests and authentication methods.
Topic 4	Platforms and Architecture: This domain covers understanding monitoring agent types and placement, active versus passive monitoring, and ThousandEyes WAN Insights. It addresses Cisco platform integrations, metric baselines, and selecting appropriate integration methods and assurance platforms based on business requirements.

Authoritative Interactive 300-445 EBook & Leader in Qualification Exams & Effective Cisco Designing and Implementing Enterprise Network Assurance

When you are struggling with those troublesome reference books; when you feel helpless to be productive during the process of preparing 300-445 exams; when you have difficulty in making full use of your sporadic time and avoiding procrastination. It is time for you to realize the importance of our 300-445 Test Prep, which can help you solve these annoyance and obtain a 300-445 certificate in a more efficient and productive way. Not only will you be able to pass any 300-445 test, but will gets higher score, if you choose our 300-445 study materials.

Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q53-Q58):

NEW QUESTION # 53

In network assurance, what is the purpose of a local collection agent?

- A. Managing cloud-based applications
- B. Analyzing global network trends
- C. Gathering data from nearby devices
- D. Conducting remote diagnostics

Answer: C

Explanation:

The purpose of a local collection agent is to gather data from nearby devices within the same network segment, enabling detailed monitoring and analysis of local traffic patterns.

NEW QUESTION # 54

Which RFC defines the framework for passive performance monitoring in network assurance?

- A. RFC 7276
- B. RFC 793
- C. RFC 791
- D. RFC 7799

Answer: A

Explanation:

RFC 7276 defines the framework for passive performance monitoring, providing guidelines for collecting and analyzing network performance data in network assurance.

NEW QUESTION # 55

Which deployment option should a network administrator use to deploy the ThousandEyes Endpoint Agent to all users on their internal domain using a Microsoft Domain Controller?

- A. Power Shell
- B. JAMF
- C. Microsoft Intune
- D. Group Policy Objects

Answer: D

Explanation:

For the Designing and Implementing Enterprise Network Assurance (300-445 ENNA) exam, understanding enterprise-scale deployment of the Endpoint Agent (EPA) is vital for ensuring comprehensive user-centric visibility. When an organization utilizes a Microsoft Domain Controller to manage its internal domain, the standard mechanism for automated software distribution is Group Policy Objects (GPOs) (Option B).

Deploying the ThousandEyes Endpoint Agent via GPO allows a network administrator to push the .msi installer package to all Windows-based workstations joined to the domain. This method is highly effective for large-scale environments because it ensures that the agent is installed automatically upon machine startup or user login, without requiring manual intervention from the end-user or the IT staff at each individual machine.

The GPO can be configured to perform a "silent installation," which runs in the background, ensuring a seamless experience for the employees while providing the IT team with the necessary performance metrics.

While Microsoft Intune (Option A) is a modern cloud-based endpoint management solution, the question specifically references a Microsoft Domain Controller, making GPO the most direct and traditional choice for that specific infrastructure. JAMF (Option C) is specifically for Apple (macOS/iOS) device management and would not be used for a Windows domain deployment. PowerShell (Option D) can be used for scripting, but it lacks the centralized policy enforcement and automatic compliance checking provided by GPOs in an Active Directory environment. Therefore, Group Policy Objects is the verified deployment method for this scenario.

NEW QUESTION # 56

What is the primary purpose of integrating Cisco Catalyst Manager with other Cisco technologies?

- A. Streamlining network provisioning
- B. Optimizing WAN performance
- C. Enhancing network security
- **D. Centralizing device management**

Answer: D

Explanation:

The primary purpose of integrating Cisco Catalyst Manager is to centralize device management, enabling efficient configuration and monitoring of network devices in network assurance.

NEW QUESTION # 57

Which Cisco technology provides real-time analytics and insights into network traffic using flow-based telemetry?

- A. SNMP
- **B. NetFlow**
- C. API
- D. Syslog

Answer: B

Explanation:

NetFlow is a Cisco technology that provides real-time analytics and insights into network traffic using flow-based telemetry. It collects and analyzes network flow data, including source and destination IP addresses, ports, protocols, and traffic volume, to monitor network behavior, detect anomalies, and troubleshoot performance issues.

NEW QUESTION # 58

.....

Users using our 300-445 study materials must be the first group of people who come into contact with new resources. When you receive an update reminder from 300-445 practice questions, you can update the version in time and you will never miss a key message. If you use our study materials, you must walk in front of the reference staff that does not use valid 300-445 Real Exam. And you will get the according 300-445 certification more smoothly.
