Fast2test에서 Salesforce Salesforce-Slack-Administrator덤프를 다운받아 공부하시면 가장 적은 시간만 투자해도 Salesforce Salesforce-Slack-Administrator시험패스하실수 있습니다. Fast2test에서 Salesforce Salesforce-Slack-Administrator시험덤프를 구입하시면 퍼펙트한 구매후 서비스를 제공해드립니다. Salesforce Salesforce-Slack-Administrator덤프가 업데이트되면 업데이트된 최신버전을 무료로 제공해드립니다. 시험에서 불합격성적표를 받으시면 덤프구매시 지불한 덤프비용은 환불해드립니다.

Salesforce Salesforce-Slack-Administrator 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
주제 2	<ul style="list-style-type: none"> Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
주제 3	<ul style="list-style-type: none"> Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.
주제 4	<ul style="list-style-type: none"> Fundamentals: This section of the exam measures the skills of Salesforce Administrators and covers the key privileges and responsibilities associated with each Slack user role. Candidates will identify unique features of Slack's paid plans and understand the common responsibilities shared by Admins and Owners. Additionally, this section emphasizes the importance of workspace and organization-level settings and dashboards, focusing on how they contribute to effective Slack management.

최신 Salesforce Administrator Salesforce-Slack-Administrator 무료 샘플문제 (Q77-Q82):

질문 # 77

Big Corp uses an IdP (Identity Provider) to manage access for its members to its Plus plan on Slack. Their security team wants to make sure members will be automatically deactivated when they leave the company.

Which of the following must be true to ensure that members are automatically deactivated?

- A. The member who is leaving the company must have left all channels.
- B. Each member's access must be set to expire after 90 days.
- **C. The IdP must support deprovisioning via SCIM.**
- D. The member must not be a Workspace Admin or Owner.

정답: C

설명:

To automatically deactivate users who leave a company, Slack relies on SCIM (System for Cross-domain Identity Management) provisioning. SCIM allows an Identity Provider (IdP) to manage user accounts, including provisioning, deprovisioning, and updating user profiles directly from the IdP.

According to the official Slack documentation for user provisioning:

"When SCIM provisioning is enabled, changes made in your Identity Provider - such as deactivating a user - will be reflected in Slack automatically. Deprovisioning ensures that when someone leaves the company, their Slack account is also deactivated without manual intervention." None of the other options (A, B, or C) are requirements for automatic deactivation. SCIM deprovisioning is the only supported and correct method for automated account deactivation through IdP integrations.

(Reference: Slack Administration Study Guide - User Management and SCIM Provisioning)

질문 # 78

GoodAdvertisements Inc works with several companies to support global advertising campaigns and are on a paid plan. They are preparing for a campaign launch that requires input from multiple companies.

GoodAdvertisements Inc wants the ability to coordinate effectively with the companies before and during their respective launch in a private channel, but it is not clear whether the companies use paid Slack plans. The Admins at the company want to take security precautions before inviting any outside individuals into their Slack workspace.

What is the best way for the Admins to have the individuals from the outside companies join the Slack workspace and ensure the process scales for future launches with other companies?

- A. Ask the outside companies to upgrade to the paid plan. Then, share the launch channel externally to the companies, and set a reminder to unshare the channel when the launch is complete.
- B. Have the Admins individually send out Single-Channel Guest invitations.
- C. Require that invitations get approval via a #guest-invitation-approval channel so Admins can action the requests and inform project leaders to invite individuals from outside companies as Single-Channel Guests. Set expiry dates for the Single-Channel Guests.
- D. Require that invitations get approval via a #guest-invitation-approval channel so Admins can action the requests and inform project leaders to invite individuals from outside companies as Multi-Channel Guests. Set expiry dates for the Multi-Channel Guests.

정답: C

질문 # 79

You're a Support Agent on the admin team for your organization's Slack Enterprise Grid workspace.

You receive a service request from one of your employees to add 15 new members from a single external company to Slack in order to support a 12-month joint marketing partnership. The team requires multiple channels and members for external collaboration.

How should you respond to the service request?

(Select the best answer.)

- A. Advise the employee to request the external users be added to your identity provider (IdP) so they can authenticate to your workspace with the same single sign-on (SSO).
- B. Approve the employee's request, then invite the external users to your workspace as Multi-Channel Guests with a 12-month expiration date.
- C. Advise the employee to set up a separate Slack workspace that is jointly owned by both organizations.
- D. Advise the employee to initiate one or more Slack Connect channels to collaborate with the external organization. The external organization can set up a free Slack instance if they are not already using Slack.

정답: D

설명:

Slack recommends using Slack Connect for external collaboration across companies.

According to Slack Connect official guidelines:

"Slack Connect lets you securely collaborate with external organizations in channels or direct messages, without needing to add external users as guests in your workspace." Rather than creating guest accounts (A) or modifying your IdP (C), the correct and scalable method is setting up Slack Connect channels. Option D (setting up a separate Slack workspace) is not necessary and would complicate governance.

(Reference: Slack Administration Study Guide - Slack Connect Best Practices)

질문 # 80

Asher manages a global workplace and facilities team. Currently, his team receives all global requests in a channel called #help-workplace. Because the channel now receives hundreds of requests per day, the support team asks Asher if they can create regional channels to make triaging requests more manageable.

How should Asher respond to this request?

- A. Continue to use one centralized channel to minimize confusion for channel members on where workplace requests should be submitted, but require that members start posts with the name of the region where they're requesting assistance.
- B. Create a private channel for the global workplace team to triage requests from #help-workplace into the appropriate regions.
- C. Create new regional channels and name them using the #help-workplace-region format, then assign regional team members to monitor each channel.
- D. Allow each region to create new channels and name them after famous landmarks in their region, then assign regional team members to monitor each channel.

정답: C

설명:

Slack best practices for managing high-volume help channels recommend:

"Creating regional help channels following a clear, consistent naming convention, such as #help-workplace- region, so requests are easier to route and monitor." This method ensures that requests are properly triaged without confusing users and keeps the support experience scalable.

(Reference: Slack Administration Study Guide - Best Practices for Managing High-Volume Support Channels)

질문 # 81

You're a Workspace Primary Owner for a Slack Pro workspace owned by your company. App requests from users are becoming overwhelming, so you decide to create an app approval process that collects necessary information to assist your IT team in making app approval decisions.

Which two Questions should you ask of the requestor during the app approval process?

Choose 2 answers

- A. What is the urgency level for the app request?
- B. Are competitors using the requested app?
- C. Does the app support Data loss Prevention (DLP)?
- D. Does the app require a license?
- E. Does the app support Enterprise Key Management (EKM)?

정답: A,D

질문 # 82
