

Practice VMware 2V0-15.25 Online | Exam 2V0-15.25 Reference

P.S. Free 2026 VMware 2V0-15.25 dumps are available on Google Drive shared by DumpTorrent: https://drive.google.com/open?id=18AJ9g4kyd3rb8XFQFU3Npu_urk60LUn8

Therefore, you have the option to use VMware 2V0-15.25 PDF questions anywhere and anytime. DumpTorrent VMware Cloud Foundation 9.0 Support (2V0-15.25) dumps are designed according to the VMware 2V0-15.25 certification exam standard and have hundreds of questions similar to the actual VMware Cloud Foundation 9.0 Support (2V0-15.25) exam. VMware Cloud Foundation 9.0 Support (2V0-15.25) web-based practice exam software also works without installation.

As we all know, it is difficult to prepare the 2V0-15.25 exam by ourselves. Excellent guidance is indispensable. If you urgently need help, come to buy our study materials. Our company has been regarded as the most excellent online retailers of the 2V0-15.25 exam question. So our assistance is the most professional and superior. You can totally rely on our study materials to pass the exam. In addition, all installed 2V0-15.25 study tool can be used normally. In a sense, our 2V0-15.25 Real Exam dumps equal a mobile learning device. We are not just thinking about making money. Your convenience and demands also deserve our deep consideration. At the same time, your property rights never expire once you have paid for money. So the 2V0-15.25 study tool can be reused after you have got the 2V0-15.25 certificate. You can donate it to your classmates or friends. They will thank you so much.

Exam 2V0-15.25 Reference & 2V0-15.25 Test Book

The chance of making your own mark is open, and only smart one can make it. We offer 2V0-15.25 exam materials this time and support you with our high quality and accuracy 2V0-15.25 learning quiz. Comparing with other exam candidates who still feel confused about the perfect materials, you have outreached them. So it is our sincere suggestion that you are supposed to get some high-rank practice materials like our 2V0-15.25 Study Guide.

VMware Cloud Foundation 9.0 Support Sample Questions (Q47-Q52):

NEW QUESTION # 47

An administrator is responsible for a VMware Cloud Foundation (VCF) fleet. The administrator has been tasked with commissioning four ESX hosts for a new workload domain that uses vSAN Express Storage Architecture (ESA) as the primary storage solution.

During the host validation stage in vSphere client, the process fails with the following errors:

esx-1.wld.vcf.local. Failed to validate vSAN HCL status.
esx-2.wld.vcf.local. Failed to validate vSAN HCL status.
esx-3.wld.vcf.local. Failed to validate vSAN HCL status.
esx-4.wld.vcf.local. Failed to validate vSAN HCL status.

What is the cause of the errors?

- A. The RAID controller in each ESX host needs to be reconfigured to use Tri-mode.
- B. The ESX hosts must have internet access to validate vSAN ESA compatibility.

- C. The RAID controller in each ESX host is not configured to use RAID-O/Passthrough.
- **D. The ESX hosts are not using vSAN ESA certified storage devices.**

Answer: D

Explanation:

VMware Cloud Foundation 9.0 requires strict vSAN ESA hardware compatibility when creating a workload domain that uses vSAN Express Storage Architecture (ESA). During host validation, SDDC Manager and vSphere Client check whether each ESXi host meets ESA requirements, including CPU generation, storage controller type, and-most importantly-ESA-certified NVMe storage devices. The validation errors provided:

"Failed to validate vSAN HCL status" for every host indicate that the hosts do not meet the vSAN ESA HCL requirements.

VCF 9.0 documentation states that ESA uses a next-generation log-structured filesystem requiring certified NVMe devices only, with no RAID controller dependencies. Unlike OSA, ESA eliminates disk groups, but it requires certified devices listed on the vSAN ESA HCL to pass host validation. If non-certified or unsupported NVMe/SAS devices are present, validation fails exactly as described.

Option A is incorrect because RAID pass-through settings apply to OSA, not ESA.

Option C is incorrect because ESA compatibility validation is performed offline using the SDDC Manager BOM, not via internet lookup.

Option D is incorrect because ESA does not use tri-mode RAID controllers.

Therefore, the documented and verified cause is B: hosts are not using vSAN ESA certified storage devices.

NEW QUESTION # 48

An administrator has observed that the vSphere Global Inventory is only available from the management domain vCenter. The Global Inventory is not available from the workload domain's vCenter.

Why is the "Global Inventory" missing from the workload domain's vCenter?

- A. Supervisor Management has not been enabled.
- B. An external VIDB instance has not been configured.
- C. An inventory sync was not run following the workload domain creation.
- **D. VCF SSO and vCenter Linking have not been configured.**

Answer: D

Explanation:

The Global Inventory List (GIL) is only available when multi-vCenter SSO domain linking is configured. In VMware Cloud Foundation, the management domain vCenter is deployed first and becomes the root vCenter for global inventory data. For workload domains, their vCenter Servers must be registered into the same SSO domain and linked with the management-domain vCenter in order for the global inventory data (VMs, hosts, clusters, content libraries) to appear.

If a workload domain vCenter is not SSO-linked, it operates in its own identity domain, and therefore cannot access or present Global Inventory, resulting in exactly the symptom described: the management domain vCenter shows the GIL, while the workload domain vCenter does not.

Option B (Supervisor Management) relates to vSphere with Tanzu and has no impact on Global Inventory.

Option C (inventory sync) is incorrect-there is no manual sync required; GIL relies entirely on SSO linking.

Option D (VIDB) is not related to vCenter linking or inventory visibility; it is used by VCF Identity Broker.

Therefore, the reason the Global Inventory is missing from the workload domain vCenter is that SSO/vCenter Linking has not been configured, which is required for federation across all VCF vCenters.

NEW QUESTION # 49

A VMware Cloud Foundation (VCF) administrator cannot deploy Virtual Machines (VMs) to a compute cluster.

The administrator discovers that the vCLS VMs on the problematic cluster are powered off and cannot be powered on.

What action can the administrator take to enable deployment of VMs?

- **A. Enable retreat mode on the affected cluster.**
- B. Set DRS Automation level to fully automated.
- C. Delete all resource pools in the affected cluster.
- D. Disable HA on the affected cluster.

Answer: A

Explanation:

In vSphere 7+ and VCF-managed clusters, the vSphere Cluster Services (vCLS) VMs must remain powered on for DRS, cluster health, and policy enforcement to function. If the vCLS VMs cannot power on, no workloads—including new VMs—can be deployed to the cluster because vSphere considers the cluster unhealthy.

A common cause is insufficient resources (CPU/memory), datastore issues, or policy conflicts preventing vCLS VMs from starting. VMware provides Retreat Mode as a troubleshooting mechanism to temporarily disable vCLS, allowing the administrator to deploy VMs and correct underlying issues. Enabling retreat mode:

- * Removes vCLS from the cluster
- * Restores ability to deploy VMs
- * Allows remediation of storage/placement issues
- * Can later be disabled to restore DRS health

Option A (deleting resource pools) does not restore vCLS VM power state.

Option B (disabling HA) does not affect vCLS behavior.

Option D (setting DRS automation level) does not correct vCLS placement problems.

NEW QUESTION # 50

An administrator attempts to update the VMware vCenter root account password through VMware Cloud Foundation (VCF) Operations. The attempt fails with the following error message, "Failed to authenticate with the guest operating system using the supplied credentials." What is the cause of the failure?

- A. The SSH service is not running.
- **B. The password was previously updated on the vCenter directly.**
- C. vCenter is down.
- D. The password does not meet policy requirements.

Answer: B

Explanation:

VMware Cloud Foundation 9.0 Operations manages credentials for integrated components such as vCenter Server through its internal password vault. When administrators modify passwords directly on the component—such as manually changing the vCenter root password—VCF Operations is no longer able to authenticate using its stored credentials. As a result, any password rotation or update operation initiated through VCF Operations fails during the validation step. The error "Failed to authenticate with the guest operating system using the supplied credentials" is a direct symptom of this condition. VCF Operations attempts to log in to vCenter using the previously stored credential, which no longer matches the actual root password. Documentation describes this as an "out-of-sync credential state," and the resolution is to perform password remediation to re-synchronize VCF Operations with the system.

Option A (password complexity) is irrelevant because complexity is validated only after authentication.

Option C (vCenter down) would generate connectivity errors, not authentication errors.

Option D (SSH disabled) does not prevent password rotation because VCF Operations uses VMware Tools guest operations, not SSH, for authentication.

NEW QUESTION # 51

An administrator is attempting to import a certificate chain in VMware Cloud Foundation (VCF) Operations by uploading a certificate file. The validation fails with an error stating, "The provided certificate content is invalid." What is a possible cause for this error?

- A. The certificate chain order is invalid.
- B. The certificate chain does not include the private key.
- C. The certificate chain is missing the root CA.
- **D. The certificate is not PEM-encoded.**

Answer: D

Explanation:

VCF Operations enforces strict certificate format validation when importing certificate chains. According to VMware Cloud Foundation 9.x certificate management requirements, all uploaded certificates must be PEM-encoded. A PEM certificate must contain:

- * ASCII-encoded content
- * Proper headers such as:

* -----BEGIN CERTIFICATE-----

* -----END CERTIFICATE-----

If the certificate is encoded in DER, PFX, PKCS#12, or any non-PEM format, VCF Operations will reject the upload with the error:

"The provided certificate content is invalid."

This matches the behavior described in the question.

Option B (chain order invalid) and Option C (missing root CA) can cause validation issues only after the certificate file is successfully parsed. The error described indicates the file itself cannot be parsed, which directly points to encoding.

Option D (missing private key) is incorrect because certificate chain uploads must NOT include a private key- private keys are only used during CSR signing and are handled separately by the system

NEW QUESTION # 52

.....

With so many methods can boost individual competitiveness, people may be confused, which can really bring them a glamorous work or brighter future? We are here to tell you that a 2V0-15.25 certification definitively has everything to gain and nothing to lose for everyone. You might have seen lots of advertisements about 2V0-15.25 learning question, there are so many types of 2V0-15.25 exam material in the market, why you should choose us? Our reasons are as follow. Our 2V0-15.25 test guide is test-oriented, which makes the preparation become highly efficient.

Exam 2V0-15.25 Reference: <https://www.dumptorrent.com/2V0-15.25-braindumps-torrent.html>

The excellent study guides, practice questions and answers and dumps offered by DumpTorrent Exam 2V0-15.25 Reference are your real strength to take the test with confidence and pass it without facing any difficulty, There are three different kinds of our 2V0-15.25 exam questions: the PDF, Software and APP online, It is universally acknowledged that VMware 2V0-15.25 examination serves as a kind of useful tool to test people's ability.

Checking for Membership, By Kim Ann King, The excellent study guides, practice 2V0-15.25 questions and answers and dumps offered by DumpTorrent are your real strength to take the test with confidence and pass it without facing any difficulty.

Pass Guaranteed 2V0-15.25 - High Hit-Rate Practice VMware Cloud Foundation 9.0 Support Online

There are three different kinds of our 2V0-15.25 Exam Questions: the PDF, Software and APP online, It is universally acknowledged that VMware 2V0-15.25 examination serves as a kind of useful tool to test people's ability.

It is well acknowledged that people who have a chance to participate in the simulation for the real 2V0-15.25 exam, they must have a fantastic advantage over other people to get good grade in the 2V0-15.25 exam.

All these achievements are due to the reason that our 2V0-15.25 exam questions have a high quality that is unique in the market.
