

Sample Juniper JN0-351 Questions | JN0-351 Certification Test Answers

BTW, DOWNLOAD part of DumpsValid JN0-351 dumps from Cloud Storage: <https://drive.google.com/open?id=1wpu3JB5IvXTog47qeYBZrALGatml-ys3>

Our JN0-351 research materials are widely known throughout the education market. Almost all the candidates who are ready for the qualifying examination know our products. Even when they find that their classmates or colleagues are preparing a JN0-351 exam, they will introduce our study materials to you. So, our learning materials help users to be assured of the JN0-351 Exam. Currently, my company has introduced a variety of learning materials, covering almost all the official certification of qualification exams, and each JN0-351 learning materials in our online store before the listing, are subject to stringent quality checks within the company.

Do you want to get the JN0-351 certification to boost your career? Do you desire to feel competent and confident going into your real Enterprise Routing and Switching, Specialist (JNCIS-ENT) certification exam? Real JN0-351 Exam Questions are available right here at DumpsValid, so don't waste your time going elsewhere. By practicing with our Real JN0-351 Exam Questions, which are offered in JN0-351 PDF, web-based practice test, and desktop practice exam software formats, you can crack your Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) certification test on first attempt and advance in the Juniper industry.

JN0-351 Certification Test Answers, JN0-351 Braindumps Torrent

Life is full of ups and downs. We cannot predicate what will happen in the future. To avoid being washed out by the artificial intelligence, we must keep absorbing various new knowledge. Our JN0-351 learning questions will inspire your motivation to improve yourself. Tens of thousands of our loyal customers are benefited from our JN0-351 Study Materials and lead a better life now after they achieve their JN0-351 certification.

Juniper JN0-351 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Tunnels: The fundamentals of IP tunneling are emphasized, highlighting their requirements and functionalities. Mastery in configuring, monitoring, and troubleshooting tunnels equips professionals to meet the demands of the JN0-351 exam.
Topic 2	<ul style="list-style-type: none"> • IS-IS: Aspiring Juniper networking professionals enhance their understanding of IS-IS routing protocols. This topic equips candidates with the knowledge to configure and monitor IS-IS systems, addressing specific exam challenges and practical applications.
Topic 3	<ul style="list-style-type: none"> • Protocol Independent Routing: An essential domain for understanding routing components outside protocol dependencies, this topic enhances expertise in configuring, monitoring, and troubleshooting critical elements.
Topic 4	<ul style="list-style-type: none"> • Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q84-Q89):

NEW QUESTION # 84

You are configuring an IS-IS IGP network and do not see the IS-IS adjacencies established. In this scenario, what are two reasons for this problem? (Choose two.)

- A. The lo0 interface is not included as an IS-IS interface.
- B. The Level 2 routers have mismatched areas.
- C. IP subnets are not a /30 address.
- D. MTU is not at least 1492 bytes.

Answer: A,D

Explanation:

Explanation

Option A suggests that the MTU is not at least 1492 bytes. This is correct because IS-IS requires a minimum MTU of 1492 bytes to establish adjacencies¹. If the MTU is less than this, IS-IS adjacencies will not be established¹.

Option D suggests that the lo0 interface is not included as an IS-IS interface. This is also correct because the loopback interface (lo0) is typically used as the router ID in IS-IS¹. If the loopback interface is not included in IS-IS, it could prevent IS-IS adjacencies from being established¹.

Therefore, options A and D are correct.

NEW QUESTION # 85

Referring to the exhibit, which statement is correct?

□

- A. The root bridge is using a bridge priority of 4k.
- B. The root bridge has not been elected for this RSTP topology.
- C. The local device is using a bridge priority of 4k.
- D. The local device is the root bridge for this RSTP topology.

Answer: A

Explanation:

The "Root ID" shows 4096.00:19:e2:55:36:1e. The first part of this ID, 4096, is the bridge priority of the root bridge.

The local bridge ID is shown as 32768.00:19:e2:55:1d:30, indicating that the local device has a default bridge priority of 32768, which is higher (and thus less preferred) than 4096.

Thus, the root bridge has a priority of 4096, and the local device is not the root bridge. The local device is participating in the RSTP topology and has identified another bridge as the root.

NEW QUESTION # 86

You are attempting to configure the initial two aggregated Ethernet interfaces on a router but there are no aggregated Ethernet interfaces available.

In this scenario, which configuration will enable these interfaces on this router?

- A.
- B.
- C.
- D.

Answer: C

Explanation:

The correct answer to your question is C. Option C . Here is why:

* Option C shows the configuration of the chassis statement, which defines the properties of the router chassis, such as the number of aggregated Ethernet interfaces, the number of FPCs, and the number of PICs 1 .

* To enable aggregated Ethernet interfaces on a router, you need to specify the aggregated-devices statement under the chassis statement and set the ethernet parameter to the desired number of interfaces 2 . For example, to enable two aggregated Ethernet interfaces, you can use the following configuration:

```
chassis { aggregated-devices { ethernet { device-count 2; } } }
```

* Option C shows this configuration with the device-count set to 2, which will enable two aggregated Ethernet interfaces on the router. The other options do not show this configuration and will not enable any aggregated Ethernet interfaces on the router.

* Therefore, option C is the correct answer to your question.

NEW QUESTION # 87

Which statement is correct about the exhibit?

- A. Only the interface routes from inet.0 will be imported into both first.inet.0 and second.inet.0.
- B. All the routes from first.inet.0 and second.inet.0 will be imported into inet.0.
- C. Only the interface routes from first.inet.0 and second.inet.0 will be imported into inet.0.
- D. All routes from inet.0 will be imported into first.inet.0 and second.inet.0.

Answer: A

NEW QUESTION # 88

You are troubleshooting a BGP routing issue between your network and a customer router and are reviewing the BGP routing policies. Which two statements are correct in this scenario?

(Choose two.)

- A. Import policies are applied to routes in the RIB-Local table.
- B. Import policies are applied after the RIB-In table.
- C. Export policies are applied after the RIB-Local table.
- D. Export policies are applied to routes in the RIB-In table.

Answer: B,C

Explanation:

In BGP, routing policies are used to control the flow of routing information between BGP peers.

Option C suggests that import policies are applied after the RIB-In table. This is correct because import policies in BGP are applied to routes that are received from a BGP peer, before they are installed in the local BGP Routing Information Base (RIB-In). The RIB-In is a database that stores all the routes that are received from all peers.

Option D suggests that export policies are applied after the RIB-Local table. This is correct because export policies in BGP are applied to routes that are being advertised to a BGP peer, after they have been selected from the local BGP Routing Information Base (RIB-Local). The RIB-Local is a database that stores all the routes that the local router is using.

NEW QUESTION # 89

.....

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our Juniper experts deem it impossible to drop the JN0-351 exam, if you believe that you have learnt the contents of our JN0-351 study guide and have revised your learning through the JN0-351 Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our JN0-351 study guide and their indispensability for all those who want success without any second thought.
