CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam 認定 Sustainable-Investing 試験問題 (Q542-Q547):

質問 # 542

Compared to stewardship codes drafted by the fund management industry, stewardship codes with regulatory backing most likely place greater emphasis on:

- A. Conflicts of interest management.
- **B. Escalation activities to protect and enhance shareholder value.**
- C. Disclosure of voting activity.

正解: B

解説:

Regulatory-backed stewardship codes are designed to enforce stronger accountability and escalation processes for investors engaging with companies.

Why C (escalation activities) is correct:

Regulatory codes emphasize escalation strategies (e.g., proxy voting, shareholder resolutions, and engagement letters).
Example: UK Stewardship Code 2020 requires investors to engage forcefully when companies fail to address material ESG risks.
Why not A or B?
A (Voting disclosure) is important but not the primary distinction between voluntary and regulatory-backed codes.
B (Conflicts of interest) is addressed in both types of stewardship codes but is not the main emphasis of regulatory-backed codes.

質問 # 543

The consulting firm McKinsey & Company includes transparency as part of which of the following dimensions of an asset manager's investment approach?

- A. Tools and processes
- B. Public reporting
- C. Resources and organization

正解: A

解説:

McKinsey & Company emphasizes transparency as part of an asset manager's tools and processes. Effective tools and processes help ensure that ESG data is accurately collected, analyzed, and reported, making the decision-making process clear and accountable. 質問 # 544

The financial crisis of 2008 led to which of the following legislative changes?

- A. The Dodd-Frank Act
- B. The Cadbury Code
- C. The Greenbury Report

正解: A

解説:

Step 1: Context of the Financial Crisis of 2008

The financial crisis of 2008, also known as the Global Financial Crisis (GFC), led to significant legislative and regulatory changes aimed at preventing a similar crisis in the future.

Step 2: Legislative Responses

The Cadbury Code: A set of guidelines for corporate governance in the UK, established in the early 1990s, long before the 2008 crisis.

The Dodd-Frank Act: Enacted in 2010 in response to the 2008 financial crisis, this comprehensive piece of legislation aimed to increase transparency in the financial system, reduce risks, and protect consumers.

The Greenbury Report: Focused on executive remuneration in the UK and was published in 1995.

Step 3: Verification with ESG Investing Reference

The Dodd-Frank Wall Street Reform and Consumer Protection Act was directly a result of the 2008 financial crisis, aimed at preventing future financial system collapses by implementing stricter regulations and oversight: "The Dodd-Frank Act introduced significant changes in financial regulation to prevent the recurrence of the risky behaviors that led to the 2008 crisis".

Conclusion: The financial crisis of 2008 led to the enactment of the Dodd-Frank Act.

質問 # 545

A drawback of ESG index-based investment strategies is that they:

- A. cannot accommodate factor-based investing styles
- B. rely on established datasets for construction that lack historical data
- C. focus only on environmental factors

正解: B

解説:

A drawback of ESG index-based investment strategies is that they rely on established datasets for construction that lack historical data.

Rely on established datasets for construction that lack historical data (C): ESG indices are often based on datasets that have only recently started to be compiled comprehensively. This lack of long historical data can make it challenging to perform back-testing and historical performance analysis, which are crucial for investment strategies.

Focus only on environmental factors (A): ESG indices typically encompass environmental, social, and governance factors, not just environmental ones.

Cannot accommodate factor-based investing styles (B): ESG indices can be designed to accommodate various factor-based investing styles, including value, growth, and others.

質問 # 546

With respect to ESG reporting by investment managers, the 2020 version of the UK Stewardship Code calls for more reporting on the:

- A. policies and activities of signatories.
- **B. outcomes from ESG activity.**
- C. assertions of investment managers on ESG themes.

正解: B

解説:

The 2020 version of the UK Stewardship Code emphasizes reporting on the outcomes from ESG activity, highlighting the practical impact of stewardship efforts rather than just focusing on policies or intentions.
