An organization has 10000 employees. The organization wants to give restricted AWS access to each employee. How can the organization achieve this?

- A. Use Identity federation with SSO
- B. Create an IAM user for each employee and make them a part of the group
- C. Use STS and create the users' run time
- D. It is not recommended to support 10000 users with IAM

Explanation:
Identity federation enables users from an existing directory to access resources within your AWS account, making it easier to manage your users by maintaining their identities in a single place.
