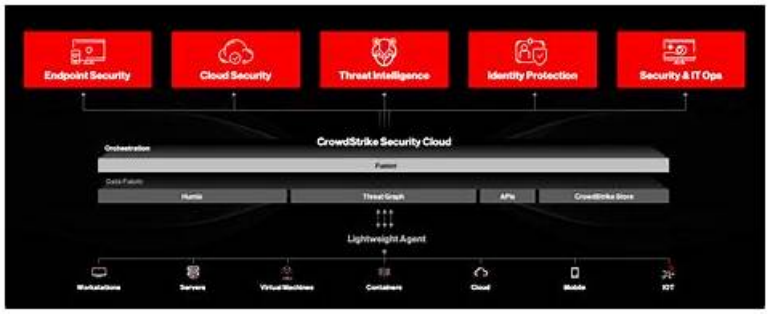
Latest CrowdStrike IDP Test Camp, IDP Vce Files



2026 Latest PassLeaderVCE IDP PDF Dumps and IDP Exam Engine Free Share: https://drive.google.com/open?id=1KUhjMsYsPvy3Xj7YUjUk9w1_fYGv4Wqb

IDP Online test engine is convenient and easy to study, and it supports all web browsers, and you can practice offline if you like. Most importantly, IDP Online test engine has testing history and performance review, and you can have a general review of what you have learned before next practice. In addition, we offer you free demo for IDP Exam Dumps for you to have a try, so that you can know what the complete version is like. We have online and offline service for IDP exam dumps, and if you are bothered by any questions, you can have a conversion with us, and we will give you the professional advice.

Free demo for IDP training materials is available, and you can have a try before buying ,so that you can have a deeper understanding of what you are going to buy. We recommend you have a try before buying. In addition, IDP exam materials contain most of knowledge points of the exam, and you can master major knowledge points as well as improve your professional ability in the process of learning. We also pass guarantee and money back guarantee for IDP Training Materials , if you fail to pass the exam in your first attempt, we will give you full refund ,and no other questions will be asked.

Achieve your goals with IDP actual dumps & CrowdStrike IDP exam pdf

PassLeaderVCE CrowdStrike IDP Exam Training materials can help you to come true your dreams. Because it contains all the questions of CrowdStrike IDP examination. With PassLeaderVCE, you could throw yourself into the exam preparation completely. With high quality training materials by PassLeaderVCE provided, you will certainly pass the exam. PassLeaderVCE can give you a brighter future.

CrowdStrike IDP Exam Syllabus Topics:

Topic	Details
Topic 1	• User Assessment: Examines user attributes, differences between users • endpoints • entities, risk baselining, risky account types, elevated privileges, watchlists, and honeytoken accounts.
Topic 2	• Multifactor Authentication (MFA) and Identity-as-a-service (IDaaS) Configuration Basics: Focuses on accessing and configuring MFA and IDaaS connectors, configuration fields, and enabling third-party MFA integration.
Topic 3	• Zero Trust Architecture: Covers NIST SP 800-207 framework, Zero Trust principles, Falcon's implementation, differences from traditional security models, use cases, and Zero Trust Assessment score calculation.
Topic 4	• Falcon Identity Protection Fundamentals: Introduces the four menu categories (monitor, enforce, explore, configure), subscription differences between ITD and ITP, user roles, permissions, and threat mitigation capabilities.

Topic 5	• Identity Protection Tenets: Examines Falcon Identity Protection's architecture, domain traffic inspection, EDR complementation, human vulnerability protection, log-free detections, and identity-based attack mitigation.
Topic 6	• Risk Management with Policy Rules: Covers creating and managing policy rules and groups, triggers, conditions, enabling • disabling rules, applying changes, and required Falcon roles.
Topic 7	• Risk Assessment: Covers entity risk categorization, risk and event analysis dashboards, filtering, user risk reduction, custom insights versus reports, and export scheduling.
Topic 8	• Domain Security Assessment: Focuses on domain risk scores, trends, matrices, severity • likelihood • consequence factors, risk prioritization, score reduction, and configuring security goals and scopes.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35
What setting can be switched under the Domain Security Overview for each Active Directory domain and/or Azure tenant?

- A. Privileged Identities
- B. Domains
- C. Scope
- D. Goal

Answer: C

Explanation:
In the Domain Security Overview,Scopeis a configurable setting that allows administrators toswitch between Active Directory domains and Azure tenants. This capability is essential for organizations managing multiple identity environments, as it enables targeted risk assessment and comparison across different identity infrastructures.
The CCIS documentation explains that Scope determineswhich domain or tenant's identity data is displayedin the Overview dashboard, including risk scores, trends, and prioritized remediation guidance.
Changing the scope does not alter risk calculations; it simply refocuses the analysis on the selected identity environment.
Other options are incorrect because:
* Privileged Identities represent a subset of users, not a switchable setting.
* Domains are entities, not a dashboard control.
* Goal changes how risks are evaluated, not which environment is displayed.
By allowing granular control over which domain or tenant is analyzed, Scope supports accurate identity risk management in complex, hybrid environments. Therefore,Option Dis the correct answer.

NEW QUESTION # 36
Within the Falcon Identity Protection portal, which page allows you to enable/disable Policy Rules?

- A. Identity-Based Detections
- B. Enforce
- C. Policy Enforcement
- D. Configure

Answer: B

Explanation:
In Falcon Identity Protection, Policy Rules are managed within the Enforce section of the portal. The CCIS documentation explains that Enforce is the operational area where administrators create, enable, disable, and manage Policy Rules and Policy Groups.
This section is specifically designed for identity enforcement logic, allowing security teams to activate or suspend rules without modifying underlying configurations or analytics. Enabling or disabling a Policy Rule immediately affects how identity conditions are

enforced across the environment.
Other sections serve different purposes:
Configure manages connectors, domains, subnets, and risk settings.
Identity-Based Detections is used for investigation and monitoring.
Policy Enforcement is not a standalone navigation section in Falcon Identity Protection.
Because rule activation and enforcement control reside exclusively in Enforce, Option B is the correct and verified answer.

NEW QUESTION # 37
Falcon Identity Protection can continuously assess identity events and associate them with potential threats WITHOUTwhich of the following?

- A. API-based connectors
- B. The need for string-based queries
- C. Ingesting logs
- D. Machine-learning-powered detection rules

Answer: B

Explanation:
Falcon Identity Protection is architected as alog-free identity security platform, a core tenet emphasized throughout the CCIS curriculum. Unlike traditional SIEM- or log-based solutions, Falcon Identity Protection doesnot require string-based queriesto continuously assess identity events or associate them with threats.
Instead, the platform relies onmachine-learning-powered detection rules,real-time authentication traffic inspection, andAPI-based connectorsto collect and analyze identity telemetry directly from domain controllers and identity providers. This approach eliminates the operational complexity of building, tuning, and maintaining query logic.
String-based queries are commonly associated with legacy log aggregation tools and SIEM platforms, where analysts must manually search logs to identify suspicious behavior. Falcon Identity Protection replaces this model withbehavioral baselining and automated correlation, enabling continuous identity risk assessment without human-driven query execution.
Because Falcon does not require string-based queries to operate,Option Dis the correct and verified answer.

NEW QUESTION # 38
Which of the following demonstrates a detection is enabled?

- A. The toggle next to the Detection Enabled is marked in gray
- B. The toggle next to the Detection Enabled is marked in green
- C. The detection has a Disabled tag next to it
- D. The detection has an Enabled tag next to it

Answer: B

Explanation:
In Falcon Identity Protection, detection status is visually indicated using atoggle controlwithin the detection configuration interface.
According to the CCIS documentation, when a detection isenabled, the toggle next to Detection Enabledis displayed ingreen.
A green toggle indicates that the detection logic is active and that Falcon will generate detections when the defined conditions are met. When the toggle is gray, the detection is disabled and will not generate alerts or contribute to incident formation.
Falcon does not rely on textual "Enabled" or "Disabled" tags to indicate detection status. Instead, the toggle color provides a clear, immediate visual indicator to administrators.
Because agreen toggleexplicitly represents an enabled detection,Option Bis the correct and verified answer.

NEW QUESTION # 39
What basic configuration fields are typically required for cloud Multi-Factor Authentication (MFA) connectors?

- A. Service account user name and password
- B. Domain controller host name and IP address
- C. Connector application identifier and secret keys
- D. Domain Administrator user name and password

Answer: C

Explanation:
Cloud-based MFA connectors integrate Falcon Identity Protection with third-party MFA providers using application-based authentication, not user credentials. As outlined in the CCIS curriculum, these connectors require anapplication identifier (Client/Application ID)andsecret keysto securely authenticate API communications.
This approach follows modern security best practices by avoiding the use of privileged user credentials and instead leveraging scoped, revocable application secrets. The connector uses these credentials to trigger MFA challenges and exchange authentication context securely.
Options involving usernames, passwords, or domain controller details are incorrect, as Falcon Identity Protection does not store or require privileged account credentials for MFA integrations. Therefore,Option D is the correct answer.

NEW QUESTION # 40
.....

IDP training materials are compiled by experienced experts, and therefore they cover most knowledge points of the exam, and you can also improve your ability in the process of learning. IDP exam dumps not only contain quality but also contain certain quantity, and they will be enough for you to pass the exam and get the certificate. In addition, we are pass guarantee and money back guarantee if you fail to pass the exam. We offer you free update for365 days after you purchase the IDP traing materials.

P.S. Free 2026 CrowdStrike IDP dumps are available on Google Drive shared by PassLeaderVCE: https://drive.google.com/open?id=1KUhjMsYsPvy3Xj7YUjUk9w1_fYGv4Wqb
