

Latest Oracle 1Z1-771 Exam Guide - Exam Dumps 1Z1-771 Free

P.S. Free & New 1Z1-771 dumps are available on Google Drive shared by Actual4dump: <https://drive.google.com/open?id=1qW1ih5rRzTXw4vj6KfIKbItvO5yIp3Qq>

Do you wonder why so many peers can successfully pass 1Z1-771 exam? Are also you eager to obtain 1Z1-771 exam certification? Now I tell you that the key that they successfully pass the exam is owing to using our 1Z1-771 exam software provided by our Actual4dump. Our 1Z1-771 exam software offers comprehensive and diverse questions, professional answer analysis and one-year free update service after successful payment; with the help of our 1Z1-771 Exam software, you can improve your study ability to obtain 1Z1-771 exam certification.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 2	<ul style="list-style-type: none">Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 3	<ul style="list-style-type: none">Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 4	<ul style="list-style-type: none">Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.

Topic 5	<ul style="list-style-type: none"> • Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 6	<ul style="list-style-type: none"> • Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 7	<ul style="list-style-type: none"> • Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 8	<ul style="list-style-type: none"> • Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 9	<ul style="list-style-type: none"> • Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 10	<ul style="list-style-type: none"> • Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.

Exam Dumps 1Z1-771 Free, Pass4sure 1Z1-771 Pass Guide

You can even print the study material and save it in your smart devices to study anywhere and pass the Oracle APEX Cloud Developer Professional (1Z1-771) certification exam. The second format, by Actual4dump, is a web-based Oracle APEX Cloud Developer Professional (1Z1-771) practice exam that can be accessed online through browsers like Firefox, Google Chrome, Safari, and Microsoft Edge. You don't need to download or install any excessive plugins or Software to use the web-based software.

Oracle APEX Cloud Developer Professional Sample Questions (Q50-Q55):

NEW QUESTION # 50

In a faceted search page, facets can be displayed as different UI types. Which two facet item types are supported in the faceted search region?

- A. Popup LOV
- B. Checkbox Group
- C. Range
- D. Date Picker

Answer: B,C

Explanation:

In Oracle APEX, a faceted search page allows users to filter data using facets, which are displayed as UI components in the Faceted Search region. According to the Oracle APEX documentation, the supported facet item types include:

Range: Used for numeric or date ranges, allowing users to filter data within a specified range (e.g., salary or hire date).

Checkbox Group: Used for multi-select options, enabling users to select multiple values from a list (e.g., departments).

Other types like Popup LOV and Date Picker are valid item types in APEX but are not natively supported as facet types in the Faceted Search region. Popup LOV is typically used for single-value selection in forms, and Date Picker is a standalone item type, not a facet-specific UI.

NEW QUESTION # 51

Which API can be used to send Push Notifications immediately in Oracle APEX?

- A. APEX_PWA.HAS_PUSH_SUBSCRIPTION
- **B. APEX_PWA.PUSH_QUEUE**
- C. APEX_PWA.PURGE_QUEUE

Answer: B

Explanation:

The APEX_PWA package manages Push Notifications:

B . APEX_PWA.PUSH_QUEUE: This procedure forces immediate processing of the Push Notification queue, sending queued messages (added via APEX_PWA.SEND) to subscribed devices without waiting for the default scheduler (e.g., every 5 minutes).

Example: APEX_PWA.PUSH_QUEUE; ensures a "Meeting now!" alert goes out instantly.

A . APEX_PWA.HAS_PUSH_SUBSCRIPTION: Checks if a user has an active subscription (returns BOOLEAN), not for sending.

C . APEX_PWA.PURGE_QUEUE: Clears the queue, discarding unsent messages, not sending them.

Technical Insight: PUSH_QUEUE triggers a job to contact the push service (e.g., Firebase), using VAPID keys from the PWA configuration.

Use Case: Urgent alerts (e.g., system outage) need immediate delivery, bypassing delays.

Pitfall: Overuse can strain the server; use judiciously for time-sensitive messages.

NEW QUESTION # 52

What are two reasons to enable the "Used by App Builder" option while creating a Generative AI Server?

- **A. To build applications using natural language powered by Generative AI**
- B. To create a REST-enabled database object
- **C. To author SQL powered by Generative AI**
- D. To create a Working Copy of your application

Answer: A,C

Explanation:

Enabling "Used by App Builder" for a Generative AI Server allows:

Author SQL powered by Generative AI: Integrates AI-driven SQL generation in App Builder.

Build applications using natural language: Enables natural language prompts to create app components.

Options A and B are unrelated to this setting, as it's specific to AI integration in App Builder.

NEW QUESTION # 53

You created a custom theme for an application. Examine these requirements: (Assuming requirements mandate syncing changes). Which solution guarantees that any changes to the master theme are reflected in the copied theme?

- **A. Subscribing the copied theme to the master theme and refreshing the theme.**
- B. Refreshing the templates.
- C. Copying the changes made in the master theme to the copied theme.
- D. Verifying the theme subscription.

Answer: A

Explanation:

Theme subscription links a copied theme to its master:

A . Subscribing and refreshing: Subscribing the copied theme (in Shared Components > Themes) to the master ensures it inherits updates. "Refresh Theme" (via Theme Roller or Utilities) syncs changes (e.g., CSS, templates) from the master, guaranteeing consistency.
