

Reliable DP-300 Exam Sims | Reliable DP-300 Exam Dumps

P.S. Free 2026 Microsoft DP-300 dumps are available on Google Drive shared by Lead2PassExam: <https://drive.google.com/open?id=1gaNfSq4PDpLgh-8BuAbVWrhHtFU2qkfk>

Allowing for your problems about passing the exam, our experts made all necessary points into our DP-300 training materials, making it the most efficient way to achieve success. They can alleviate your pressure, relieve you of tremendous knowledge and master the key points with the least time. As customer-oriented company, we believe in satisfying the customers at any costs. Instead of focusing on profits, we determined to help every customer harvest desirable outcomes by our DP-300 Training Materials. So our staff and after-sales sections are regularly interacting with customers for their further requirements and to know satisfaction levels of them.

Best Self-Revision Materials for DP-300 Exam

Every aspiring candidate who wants to become a proficient Azure Database Administer Associate should know the significance of books for DP-300 preparation. Admittedly, books are handy guides to gather new information. Thus, here are some notable resources for reading from Amazon that candidates should follow for preparing DP-300 exam:

- **Inside Out: SQL Server Administration 2017**

Get this book by **William Assaf and others** if you are looking for some viable tips and suggestions to produce success in DP-300 exam with time-saving solutions. All the slightest details about Azure SQL Server are perfectly put together in this book so you will have all that it takes to master the final test.

- **Step by Step Developer: Microsoft Azure SQL Database**

This is the best hands-on exam guide by **Leonard G. Lobel** that anyone can take on board while getting ready for the Microsoft DP-300 evaluation. The step-by-step guide and coding exercises are here to turn you into an Azure SQL Server maven.

- **How I Passed DP-300: Administrating Relational Databases on Microsoft Azure DP-300 Exam**

A class product from the house of **Empirical Matt Publications**, this book is here to teach candidates smart methods to

pass DP-300. It covers the related topics thoroughly and helps aspirants prepare well in advance before sitting for their exams.

- **Professional Administration of Azure SQL Database**

Penned-down by **Ahmad Osama**, this manual explains viable ways to explore and administer the Azure SQL Server database. It includes result-driven 40-practical activities to reinforce the learning for the upcoming DP-300 test. So, if you want to excel in the official testing, such a book is good to go.

Quiz Microsoft - Latest DP-300 - Reliable Administering Relational Databases on Microsoft Azure Exam Sims

We guarantee that if you study our DP-300 guide materials with dedication and enthusiasm step by step, you will desperately pass the exam without doubt. As the authoritative provider of study materials, we are always in pursuit of high pass rate of DP-300 Practice Test compared with our counterparts to gain more attention from potential customers. We believe in the future, our DP-300 study torrent will be more attractive and marvelous with high pass rate.

The DP-300 Exam consists of 40-60 multiple-choice and multiple-response questions, and candidates have 150 minutes to complete the exam. DP-300 exam can be taken online or at a testing center, and it costs \$165 USD per attempt. Candidates who pass the exam will receive the Microsoft Certified: Azure Database Administrator Associate certification, which is recognized by employers and industry professionals worldwide.

Microsoft Administering Relational Databases on Azure Exam Certification Details:

Books / Training	DP-300T00-A: Administering Relational Databases on Microsoft Azure
Duration	120 mins
Schedule Exam	Pearson VUE
Passing Score	700 / 1000
Sample Questions	Microsoft Administering Relational Databases on Azure Sample Questions
Exam Price	\$165 (USD)
Exam Name	Microsoft Certified - Azure Database Administrator Associate

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q39-Q44):

NEW QUESTION # 39

You have a single availability set that contains two SQL Server on Azure Virtual Machines instances.

The instances were deployed by using an Azure Marketplace SQL Server 2019 Enterprise image that has the latest cumulative updates applied. The instances are configured as the nodes of a failover cluster instance (FCI) named FC11.

You need to ensure that client applications can connect to FC11. The solution must meet the following requirements:

- Provide an availability SLA.
- Minimize costs.

What should you create?

- **A. a distributed network name (DNN) resource**
- B. an Azure Standard Load Balancer
- C. a Basic Azure Load Balancer
- D. a virtual network name (VNN) resource

Answer: A

Explanation:

You should create a distributed network name (DNN) resource 1. On Azure Virtual Machines, the DNN routes traffic to the

appropriate clustered resource. It provides an easier way to connect to the SQL Server failover cluster instance (FCI) than the virtual network name (VNN), without the need for an Azure Load Balancer 1.

NEW QUESTION # 40

Hotspot Question

You have an Azure subscription.

You need to deploy an Azure SQL database. The solution must meet the following requirements:

- Support at least 36 cores.
- Minimize costs.

How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
$SqlDatabaseParams = {  
    ResourceGroupName: "RG1",  
    ServerName: "Server01",  
    DatabaseName: "DB1",  
    Edition: "GeneralPurpose",  
    Vcore: 2,  
    ComputeGeneration:   
    ComputeModel:   
}  
  
New-AzSqlDatabase @SqlDatabaseParams
```

Microsoft

Provisioned
Serverless
Standard

```
}
```

```
New-AzSqlDatabase -e @SqlDatabaseParams
```

Explanation:

Box 1: "Gen5"

Box 2: Serverless

Purchasing model and service tier

The following table describes serverless support based on purchasing model, service tiers, and hardware:

Category	Supported	Not supported
Purchasing model	vCore	DTU
Service tier	General Purpose Hyperscale	Business Critical
Hardware	Standard-series (Gen5)	All other hardware

The vCore purchasing model compute size is 2 to 128 vCores.

NEW QUESTION # 41

You have an Azure SQL database that contains a table named Customer. Customer has the columns shown in the following table.

Customer_ID	Customer_Name	Customer_Phone
11001	Contoso, Ltd.	555-555-0173
11002	Litware, Inc.	555-505-3124
11003	ADatum Corporation	555-689-4312

You plan to implement a dynamic data mask for the Customer_Phone column. The mask must meet the following requirements:

- * The first six numerals of each customer's phone number must be masked.
- * The last four digits of each customer's phone number must be visible.
- * Hyphens must be preserved and displayed.

How should you configure the dynamic data mask? To answer, select the appropriate options in the answer area.

Exposed Prefix:

0
1
3
5

Padding String:

X
XXXXXX
XXX-XXX
XXX-XXX-
X[3]-X[3]

Exposed Suffix:

0
1
3
5

Answer:

Explanation:

Exposed Prefix: 0

Padding String: xxx-xxx-

Exposed Suffix: 0

Explanation

Exposed Prefix: 0

Padding String: xxx-xxx-

Exposed Suffix: 0

Box 1: 0

Custom String : Masking method that exposes the first and last letters and adds a custom padding string in the middle. prefix, [padding],suffix Box 2: xxx-xxx Box 3: 5 Reference:

NEW QUESTION # 42

You have an Azure SQL Database managed instance named SQLMI1. A Microsoft SQL Server Agent job runs on SQLMI1.

You need to ensure that an automatic email notification is sent once the job completes.

What should you include in the solution?

- A. From SQL Server Management Studio (SSMS), create a Database Mail profile
- B. From SQL Server Configuration Manager (SSMS), enable SQL Server Agent
- C. From the Azure portal, create an Azure Monitor action group that has an Email/SMS/Push/Voice action
- D. From SQL Server Management Studio (SSMS), run `sp_set_sqlagent_properties`

Answer: A

Explanation:

To send a notification in response to an alert, you must first configure SQL Server Agent to send mail. Using SQL Server Management Studio; to configure SQL Server Agent to use Database Mail:

1. In Object Explorer, expand a SQL Server instance.
2. Right-click SQL Server Agent, and then click Properties.
3. Click Alert System
4. Select Enable Mail Profile.
5. In the Mail system list, select Database Mail.
6. In the Mail profile list, select a mail profile for Database Mail.
7. Restart SQL Server Agent.

Note: Prerequisites include:

Enable Database Mail.

Create a Database Mail account for the SQL Server Agent service account to use.

Create a Database Mail profile for the SQL Server Agent service account to use and add the user to the DatabaseMailUserRole in the msdb database.

Set the profile as the default profile for the msdb database.

NEW QUESTION # 43

You are planning the migration of the SERVER1 databases. The solution must meet the business requirements.

What should you include in the migration plan? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Azure Database Migration Service pricing tier:  ▼

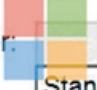

Standard 2-vCore
Standard 4-vCore
Premium 4-vCore

Required Azure resource: ▼

A virtual network that has service endpoints
A VPN gateway
An Azure Logic app

Answer:

Explanation:

Azure Database Migration Service pricing tier:  ▼

Standard 2-vCore
Standard 4-vCore
Premium 4-vCore

Required Azure resource: ▼

A virtual network that has service endpoints
A VPN gateway
An Azure Logic app

Explanation:

Azure Database Migration Service pricing tier:

	▼
Standard 2-vCore	
Standard 4-vCore	
Premium 4-vCore	

Required Azure resource:

	▼
A virtual network that has service endpoints	
A VPN gateway	
An Azure Logic app	

Azure Database Migration service

Box 1: Premium 4-VCORE

Scenario: Migrate the SERVER1 databases to the Azure SQL Database platform.

* Minimize downtime during the migration of the SERVER1 databases.

Premium 4-vCore is for large or business critical workloads. It supports online migrations, offline migrations, and faster migration speeds.
