Instant FCP_FML_AD-7.4 Download, Reliable FCP_FML_AD-7.4 Exam Camp

If you want to be a leader in some industry, you have to continuously expand your knowledge resource. Our DumpsTorrent always updates the exam dumps and the content of our exam software in order to ensure the FCP_FML_AD-7.4 exam software that you have are the latest and comprehensive version. No matter which process you are preparing for FCP_FML_AD-7.4 Exam, our exam software will be your best helper. As the collection and analysis of our FCP_FML_AD-7.4 exam materials are finished by our experienced and capable IT elite.

Fortinet FCP_FML_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Email Security: This section of the exam measures skills of a Network Security Administrator and deals with implementing security controls to filter and manage email threats. Candidates must configure session-based filtering, spam detection methods, malware protection, APT mitigation, and content filtering. The section also includes email archiving configurations for compliance and storage.
Topic 2	<ul style="list-style-type: none">• Server Mode and Transparent Mode: This section of the exam measures skills of a Network Security Administrator and explains how to deploy and manage FortiMail in different operation modes. It includes configuring server mode to handle mail directly and deploying FortiMail in transparent mode where it acts as a gateway to filter email traffic without altering the existing mail infrastructure.

Topic 3	<ul style="list-style-type: none"> • Encryption: This section of the exam measures skills of a Messaging Security Engineer and addresses the implementation of encryption methods in FortiMail. It covers traditional SMTP encryption and identity-based encryption (IBE). Candidates are expected to configure these technologies and manage IBE users for secure email communication.
Topic 4	<ul style="list-style-type: none"> • Initial Deployment and Basic Configuration: This section of the exam measures skills of a Network Security Administrator and covers the foundational setup of FortiMail. It includes understanding SMTP and email flow, performing initial configurations such as selecting operation mode, system settings, and defining protected domains. It also involves deploying FortiMail in high-availability clusters to ensure service continuity.
Topic 5	<ul style="list-style-type: none"> • Email Flow and Authentication: This section of the exam measures skills of a Messaging Security Engineer and focuses on configuring FortiMail to handle email flow securely. It includes enabling and matching authentication protocols, setting up secure MTA features, and implementing access control, IP policies, and recipient-based policies to control mail delivery and security.

Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50

Exhibit.

Refer to the exhibit, which shows the mail server settings of a FortiMail device. What are two ways this FortiMail device will handle connections? (Choose two.)

- A. FortiMail will accept SMTPS connections.
- B. FortiMail will enforce SMTPS on all outbound sessions.
- C. FortiMail will drop any inbound plaintext SMTP connection.
- D. FortiMail will support the STARTTLS extension.

Answer: A,D

NEW QUESTION # 51

A FortiMail administrator is investigating a sudden increase in DSNs being delivered to their protected domain. After searching the logs, the administrator identifies that the DSNs were not generated because of any outbound email sent from their organization. Which FortiMail antispam technique can the administrator enable to prevent this scenario?

- A. FortiGuard IP Reputation
- B. Spam outbreak protection
- C. Bounce address tag validation
- D. Spoofed header detection

Answer: C

Explanation:

Enabling Bounce Address Tag Validation prevents FortiMail from accepting forged bounce messages (backscatter) for mail it never actually sent, stopping those unsolicited DSNs from reaching your users.

NEW QUESTION # 52

Refer to the exhibit, which shows the mail server settings of a FortiMail device:

What are two ways this FortiMail device will handle connections? (Choose two.)

- A. FortiMail will accept SMTPS connections.
- B. FortiMail will enforce SMTPS on all outbound sessions.
- C. FortiMail will drop any inbound plaintext SMTP connection.
- D. FortiMail will support the STARTTLS extension.

Answer: A,D

Explanation:

FortiMail will accept SMTPS connections.

The SMTPS port (465) is enabled and "SMTPS" authentication is turned on, so it will listen for and accept implicit-SSL SMTP on port 465.

FortiMail will support the STARTTLS extension.

With "SMTP over SSL/TLS" enabled on port 25, the server advertises and accepts STARTTLS for opportunistic TLS upgrades on plaintext SMTP sessions.

NEW QUESTION # 53

Refer to the exhibit, which displays the Mail Settings page of a FortiMail device running in gateway mode.

In addition to selecting Check External Domain in the MTA-STS service field, what else must an administrator do to enable MTA-STS?

- A. Enable MTA-STS action in the appropriate inbound recipient policy.
- B. Enable secure authentication in the associated SMTP authentication profile.
- C. Enable SMTPUTF8 support in the mail server settings.
- **D. Enable MTA-STS in the associated TLS profile.**

Answer: D

Explanation:

You must enable MTA-STS in whatever TLS profile your outbound IP policy uses-only then will FortiMail honor the "Check External Domain" setting.

NEW QUESTION # 54

What are two disadvantages of configuring the dictionary and DLP scan rule aggressiveness too high?
(Choose two.)

- **A. It is more resource intensive**
- **B. More false positives could be detected.**
- C. High aggressiveness scan settings do not support executable file types.
- D. FortiMail requires more disk space for the additional rules.

Answer: A,B

NEW QUESTION # 55

.....
