AAPC CPC Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Integumentary System: This section of the exam measures the skills of medical coders and covers procedures related to the skin and related structures. Topics include excisions, biopsies, repairs, and destruction services, focusing on accurate code selection and modifier usage for integumentary interventions.
Thema 2	• Hemic & Lymphatic Systems, Mediastinum, Diaphragm: This section of the exam measures the skills of medical coders and includes procedures related to the spleen, lymph nodes, bone marrow, as well as surgical interventions in the mediastinum and diaphragm. Coders must differentiate procedures by region and system accurately.
Thema 3	• Pathology & Laboratory: This section of the exam measures the skills of medical coders and includes lab tests, specimen analysis, and pathological examination procedures. It ensures that coders understand how to apply codes for chemistry panels, cultures, and histopathological diagnostics.
Thema 4	• Female Reproductive System and Maternity Care & Delivery: This section of the exam measures the skills of coding specialists and evaluates coding accuracy for gynecological and obstetric procedures. It includes deliveries, antepartum care, cesarean sections, and surgical procedures involving female reproductive anatomy.
Thema 5	• Evaluation & Management Services: This section of the exam measures the skills of coding specialists and covers office visits, hospital care, consultations, and other E • M services. It tests the understanding of time-based coding, medical decision-making, and history • exam components per current CMS guidelines.
Thema 6	• Respiratory System: This section of the exam measures the skills of medical coders and evaluates the ability to code procedures involving the nose, sinuses, larynx, trachea, bronchi, and lungs. Attention is given to services like endoscopies, excisions, and resections within the respiratory tract.

Thema 7	• Endocrine System and Nervous System: This section of the exam measures the skills of medical coders and assesses the ability to assign codes for surgeries involving glands, the brain, spinal cord, and peripheral nerves. Procedures like resections and electrical stimulation are part of the evaluated content.
Thema 8	• Introduction to CPT®, HCPCS Level II, and Modifiers: This section of the exam measures the skills of coding specialists and introduces candidates to CPT® coding for procedures, HCPCS Level II for supplies and services, and the correct use of modifiers. It helps learners distinguish between different code sets and understand their place in medical billing.
Thema 9	• Accurate ICD-10-CM Coding: This section of the exam measures the skills of medical coders and focuses on the precise assignment of diagnosis codes using the ICD-10-CM system. The goal is to ensure accurate representation of patient conditions, proper sequencing, and a clear linkage between diagnoses and services.
Thema 10	• Digestive System: This section of the exam measures the skills of coding specialists and evaluates the coding of surgeries and procedures involving the oral cavity, pharynx, esophagus, stomach, intestines, liver, pancreas, and related organs. Understanding endoscopic procedures is particularly critical here.

AAPC Certified Professional Coder (CPC) Exam CPC Prüfungsfragen mit Lösungen (Q260-Q265):

260. Frage

A surgeon performs a complete bilateral mastectomy with insertion of breast prosthesis at the same surgical session. What CPT® coding is reported?

- A. 19303-50, 19342-50
- B. 19305-50, 19340-50
- C. 19325-50
- **D. 19303-50, 19340-50**

Antwort: D

Begründung:

For a complete bilateral mastectomy with insertion of breast prosthesis performed during the same surgical session, the correct CPTcodes are:

1. 19303-50: This code represents a complete mastectomy (removal of breast tissue) performed bilaterally (indicated by the -50 modifier).
2. 19340-50: This code is for the immediate insertion of a breast prosthesis following mastectomy, also performed bilaterally.

Explanation of other options:

A: 19303-50, 19342-50: Incorrect because 19342 is for the insertion of a breast implant, which differs from a prosthesis.

B: 19305-50, 19340-50: 19305 describes a modified radical mastectomy, which is more extensive than what is documented here.

C: 19325-50: This code represents a breast augmentation procedure, not a mastectomy with prosthesis insertion.

Thus, the correct answer is D. 19303-50, 19340-50, which accurately describes a bilateral mastectomy with prosthesis insertion.

261. Frage

A 62-year-old with ventricular fibrillation comes to the outpatient surgery department for the replacement of a pacing cardioverter-defibrillator. The procedure is performed under MAC anesthesia. The Certified Registered Nurse Anesthetist (CRNA), is working independently without medical direction.

What CPT and ICD-10-CM codes are reported for the CRNA?

- A. 00534-QZ-QS, 149.01
- B. 00520-QY, 148.91
- C. 00534-QY, 148.91
- D. 00520-QZ-QS, 149.01

Antwort: A

262. Frage

A 52-year-old woman has been experiencing discomfort and itching in the vulvar area for several months. She has a history of abnormal Pap smears and a recent biopsy revealed vulvar intraepithelial neoplasia (VIN III). Decision has been made to perform a vulvectomy.

Procedure: Under general anesthesia, the surgeon made an incision in the vulvar area and removed the vulva (more than 80%), including the affected skin and deep subcutaneous tissue.

What CPT and ICD-10-CM codes are reported?

- A. 56630, N90.1
- B. 56633, D07.1
- C. 56620, N90.1
- D. 56625, D07.1

Antwort: B

Begründung:

Procedure Coding:

56633 - Radical vulvectomy (removal of >80%), including deep subcutaneous tissue Documentation supports greater than 80% vulvar removal Deep tissue involvement confirms radical procedure

Diagnosis Coding:

D07.1 - Carcinoma in situ of vulva

VIN III = high-grade squamous intraepithelial lesion

Classified as carcinoma in situ, not benign dysplasia

Why Other Options Are Incorrect:

56620 / 56625 / 56630 - Partial or simple vulvectomy

N90.1 - Mild vulvar dysplasia (incorrect severity)

ICD-10-CM Official Guideline:

VIN III is coded as D07.1, not N90.x.

263. Frage

An interventional radiologist performs an abdominal paracentesis using fluoroscopic guidance to remove excess fluid. The procedure is performed in the hospital. What CPT coding is reported?

- A. 0
- B. 1
- C. 49083, 77001-26
- D. 49083, 77002-26

Antwort: A

Begründung:

49083 - Abdominal paracentesis, diagnostic or therapeutic; with imaging guidance This code includes imaging guidance (ultrasound or fluoroscopy).

Per CPT guidelines, do not separately report fluoroscopy or ultrasound guidance with 49083.

The procedure was performed in the hospital, but CPT coding does not change based on site of service.

Why Other Options Are Incorrect:

A (49082) - Used without imaging guidance

B / D - Imaging guidance codes (77001, 77002) are bundled into 49083 per CPT and NCCI edits Official CPT Guidance:

When a paracentesis is performed with imaging guidance, report 49083 only.
