2026 Latest DumpsKing NCP-US-6.5 PDF Dumps and NCP-US-6.5 Exam Engine Free Share: [https://drive.google.com/open?id=1xUzHs8RRc\\_U1UWbjoRdseZqD4PWvfwsA](https://drive.google.com/open?id=1xUzHs8RRc_U1UWbjoRdseZqD4PWvfwsA)

This helps you save your money and time as the actual Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 NCP-US-6.5 certification exam costs a high fee. Nutanix also offers 365 days free updates if the NCP-US-6.5 certification exam content changes after the purchase of the Nutanix NCP-US-6.5 Exam Dumps. We guarantee our valued customers that you will qualify for your Nutanix NCP-US-6.5 exam, hence this saves you time and money.

## Nutanix NCP-US-6.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Analyze and Monitor Nutanix Unified Storage</li><li>• Describe the use of Data Lens for data security</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Given a scenario, configure shares, buckets, and or Volume Groups</li><li>• Troubleshoot a failed upgrade for Files</li><li>• Objects</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Troubleshoot issues related to Nutanix Files</li> <li>• Explain Data Management processes for Files and Objects</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Configure and Utilize Nutanix Unified Storage</li> <li>• Identify the steps to deploy Nutanix Objects</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Identify the steps to deploy Nutanix Files</li> <li>• Given a scenario, determine product and sizing parameters</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Deploy and Upgrade Nutanix Unified Storage</li> <li>• Perform upgrades</li> <li>• maintenance for Files</li> <li>• Objects implementations</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Troubleshoot issues related to Nutanix Objects</li> <li>• Troubleshoot issues related to Nutanix Volumes</li> </ul>

## 100% Pass 2026 NCP-US-6.5: Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 –Trustable Exam Materials

Our NCP-US-6.5 guide question dumps are suitable for all age groups. Even if you have no basic knowledge about the relevant knowledge, you still can pass the NCP-US-6.5 exam. We sincerely encourage you to challenge yourself as long as you have the determination to study new knowledge. Our NCP-US-6.5 exam material is full of useful knowledge, which can strengthen your capacity for work. As we all know, it is important to work efficiently. So once you have done you work excellently, you will soon get promotion. You need to be responsible for your career development. The assistance of our NCP-US-6.5 Guide question dumps are beyond your imagination. You will regret if you throw away the good products.

### Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q35-Q40):

#### NEW QUESTION # 35

An administrator is planning to upgrade all ESXi hypervisors in a cluster hosting Files. When performing one-click hypervisor upgrades, what prerequisite must be performed?

- A. Enable the anti-affinity rules on all FSVMs.
- **B. Disable the anti-affinity rules on all FSVMs.**
- C. Shutdown the FSVMs.
- D. Manually migrate the FSVMs.

**Answer: B**

Explanation:

Anti-affinity rules ensure FSVMs are distributed across hosts for HA, but during a one-click hypervisor upgrade, these rules can prevent FSVMs from being migrated to other hosts when a host enters maintenance mode. Disabling the anti-affinity rules temporarily allows the upgrade to proceed by permitting FSVMs to reside on the same host during the migration process, ensuring a smooth and non-disruptive upgrade.

Exact Extract from Nutanix Documentation:

From the Nutanix Files Administration Guide (available on the Nutanix Portal):

"When performing a one-click hypervisor upgrade on ESXi hosts hosting Nutanix Files, temporarily disable the anti-affinity rules for FSVMs. This allows FSVMs to be migrated to other hosts during the upgrade process without violating placement constraints, ensuring a non-disruptive upgrade. Re-enable the anti- affinity rules after the upgrade is complete."

:

Nutanix Files Administration Guide, Version 4.0, Section: "Upgrading Hypervisors in a Files Environment" (Nutanix Portal).  
Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix Files Upgrade Considerations".

### NEW QUESTION # 36

Which action is required to allow the deletion of file server audit data in Data Lens?

- A. Configure the audit trail target.
- **B. Update the data retention period.**
- C. Enable the File Server.
- D. Disable the File Server.

**Answer: B**

Explanation:

The action that is required to allow the deletion of file server audit data in Data Lens is to update the data retention period. Data retention period is a setting that defines how long Data Lens keeps the file server audit data in its database. Data Lens collects and stores various metadata and statistics from file servers, such as file name, file type, file size, file owner, file operation, file access time, etc. Data Lens uses this data to generate reports and dashboards for file analytics and anomaly detection. The administrator can update the data retention period for each file server in Data Lens to control how long the audit data is kept before being deleted. Reference: Nutanix Files Administration Guide, page 98; Nutanix Data Lens User Guide

### NEW QUESTION # 37

An administrator has connected 100 users to multiple Files shares to perform read and write activity. The administrator needs to view audit trails in File Analytics of these 100 users. From which two Audit Trail options can the administrator choose to satisfy this task? (Choose two.)

- **A. Client IP**
- **B. Share Name**
- C. Folders
- D. Directory

**Answer: A,B**

Explanation:

Nutanix File Analytics, part of Nutanix Unified Storage (NUS), provides audit trails to track user activities within Nutanix Files shares. Audit trails include details such as who accessed a file, from where, and what actions were performed. The administrator needs to view the audit trails for 100 users, which requires filtering or grouping the audit data by relevant criteria.

Analysis of Options:

- \* Option A (Share Name): Correct. Audit trails in File Analytics can be filtered by Share Name, allowing the administrator to view activities specific to a particular share. Since the 100 users are connected to multiple shares, filtering by Share Name helps narrow down the audit trails to the shares being accessed by these users, making it easier to analyze their activities.
- \* Option B (Client IP): Correct. File Analytics audit trails include the Client IP address from which a user accesses a share (as noted in Question 14). Filtering by Client IP allows the administrator to track the activities of users based on their IP addresses, which can be useful if the 100 users are accessing shares from known IPs, helping to identify their read/write activities.
- \* Option C (Directory): Incorrect. While audit trails track file and directory-level operations, "Directory" is not a standard filter option in File Analytics audit trails. The audit trails can show activities within directories, but the primary filtering options are more granular (e.g., by file) or higher-level (e.g., by share).
- \* Option D (Folders): Incorrect. Similar to "Directory," "Folders" is not a standard filter option in File Analytics audit trails. While folder-level activities are logged, the audit trails are typically filtered by Share Name, Client IP, or specific files, not by a generic "Folders" category.

Selected Options:

- \* A: Filtering by Share Name allows the administrator to focus on the specific shares accessed by the 100 users.
- \* B: Filtering by Client IP enables tracking user activities based on their IP addresses, which is useful for identifying the 100 users' actions across multiple shares.

Exact Extract from Nutanix Documentation:

From the Nutanix File Analytics Administration Guide (available on the Nutanix Portal):

"File Analytics Audit Trails allow administrators to filter user activities by various criteria, including Share Name and Client IP.

Filtering by Share Name enables viewing activities on a specific share, while filtering by Client IP helps track user actions based on their source IP address."

:

Nutanix File Analytics Administration Guide, Version 4.0, Section: "Using Audit Trails in File Analytics" (Nutanix Portal).

Nutanix Certified Professional - Unified Storage (NCP-US) Study Guide, Section: "Nutanix File Analytics Audit Features".

### NEW QUESTION # 38

Which confirmation is required for an Objects deployment?

- A. Configure Domain Controllers on both Prism Element and Prism Central.
- B. Configure a dedicated storage container on Prism Element or Prism Central.
- C. Configure NTP servers on both Prism Element and Prism Central.
- D. Configure VPC on both Prism Element and Prism Central.

**Answer: C**

Explanation:

The configuration that is required for an Objects deployment is to configure NTP servers on both Prism Element and Prism Central. NTP (Network Time Protocol) is a protocol that synchronizes the clocks of devices on a network with a reliable time source. NTP servers are devices that provide accurate time information to other devices on a network. Configuring NTP servers on both Prism Element and Prism Central is required for an Objects deployment, because it ensures that the time settings are consistent and accurate across the Nutanix cluster and the Objects cluster, which can prevent any synchronization issues or errors. References: Nutanix Objects User Guide, page 9; Nutanix Objects Deployment Guide

### NEW QUESTION # 39

An administrator needs to protect a Files cluster unique policies for different shares. How should the administrator meet this requirement?

- A. Configure data protection policies in the Files view in Prism Central.
- B. Create a protection domain in the Data Protection view in Prism Central.
- C. Create a protection domain in the Data Protection view in Prism Element.
- D. Configure data protection policies in File Server view in Prism Element

**Answer: A**

Explanation:

The administrator can meet this requirement by configuring data protection policies in the Files view in Prism Central. Data protection policies are policies that define how file data is protected by taking snapshots, replicating them to another site, or tiering them to cloud storage. Data protection policies can be configured for each share or export in a file server in the Files view in Prism Central. The administrator can create different data protection policies for different shares or exports based on their protection needs and requirements. Reference: Nutanix Files Administration Guide, page 79; Nutanix Files Solution Guide, page 9

### NEW QUESTION # 40

.....

We are carrying out renovation about NCP-US-6.5 test engine all the time to meet the different requirements of the diversified production market. Thus we have prepared three kinds of versions on NCP-US-6.5 preparation materials. If you are used to study with paper-based materials you can choose the PDF version of our NCP-US-6.5 Study Guide. If you would like to get the mock test before the real NCP-US-6.5 exam you can choose the software version, and if you want to study in anywhere at any time then our online APP version is your best choice since you can download it in any electronic devices.
