SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Assign business catalogs to a business role
- B. Maintain technical catalogs
- C. Assign PFCG profiles to a business role
- D. Maintain restrictions

Answer: A,D

NEW QUESTION # 28

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create business processes with a high number of people involved in a pre-defined sequence
- B. To create cross-product workflow procedures
- C. To create standard procedures from SAP Signavio Process Navigator
- D. To create complex, repeated work processes with iterative cycles
- E. To create very simple release or approval procedures

Answer: A,B,D

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:

- * To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.
- * To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.
- * To create business processes with a high number of people involved in a pre-defined sequence: SAP S/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

NEW QUESTION # 29

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.

How would you troubleshoot? Note: There are 3 correct answers to this question

- A. Check the restrictions for the role.
- B. Check the business catalogues assigned to the role.
- C. Check the Role Maintenance app.
- D. Check the space and page(s) assigned to the role.
- E. Check the business role template.

Answer: A,B,D

Explanation:

When an SAP Fiori app isn't displaying on the SAP Fiori Launchpad despite the user having the correct business role, several aspects need to be checked to troubleshoot the issue effectively:

* Check the restrictions for the role: It's essential to verify if there are any restrictions applied to the role that might prevent the app from being displayed. Restrictions can be based on various factors such as geographic location, department, or specific user attributes.

* Check the business catalogues assigned to the role: Business catalogues in SAP Fiori contain groups of apps related to specific business functions. If the necessary business catalogue is not assigned to the role, the app will not appear on the SAP Fiori Launchpad. Ensuring the correct assignment of catalogues is crucial for app visibility.

* Check the space and page(s) assigned to the role: With the introduction of spaces and pages in the SAP Fiori Launchpad, it's vital to ensure that the relevant space and page that should display the app are correctly assigned to the user's role. Spaces are higher-level groupings, while pages within those spaces contain the actual apps.

NEW QUESTION # 30

You are recording actions for a custom process step in a test automate.

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture a static label on the screen that should be checked during test execution.
- B. To capture an error message on the screen that can be used later.
- C. To capture a value in a text field that should be stored as a variable.
- D. To capture text in a message screen that can be used for data binding later.

Answer: C,D

NEW QUESTION # 31

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Runtime Authoring mode
- B. In the Maintain SAP Business Technology Platform Extensions app
- C. In the Extensibility Cockpit app
- D. In the Custom Fields app

Answer: D

Explanation:

You enable a customer-specific field to be available for UIs and reports relevant for the same business context in the Custom Fields app. The Custom Fields app allows you to create and manage custom fields for business objects in SAP S/4HANA Cloud, public edition. You can define the properties of the custom fields, such as the label, data type, length, and default value. You can also specify the UIs and reports where you want the custom fields to appear, and the business context that determines the visibility and authorization of the custom fields. The Custom Fields app also enables you to activate the custom fields and generate the corresponding CDS views and OData services for consumption by other applications.
