Similarly, Prep4SureReview provides you 1 year free updates after your purchase of Amazon ANS-C01 practice tests. These updates will help you prepare well if the content of the exam changes. The AWS Certified Advanced Networking Specialty Exam (ANS-C01) demo of the practice exams is totally free and it helps you in examining the ANS-C01 study materials.

Amazon AWS Certified Advanced Networking Specialty Exam Sample

Questions (Q75-Q80):

NEW QUESTION # 75
A multi-player gaming application that runs on UDP protocol needs to add functionality where you can assign multiple players to a single session on a game server based on factors such as geographic location, player skill, and few more configurable parameters. The application is accessed by players spread out across different regions of the world.
What is the right way to configure this requirement?
Response:

- A. Use Application Load Balancer (ALB) with sticky sessions enabled to maintain player session data. Configure Global Accelerator to front the ALB for cross-region elasticity
- B. Use custom routing accelerator of Global Accelerator in front of Network Load Balancer (NLB) to route traffic that can maintain session data
- C. Use custom routing accelerator of Global Accelerator to deterministically route one or more users to a specific instance using VPC subnet endpoints
- D. Use custom routing accelerator of Global Accelerator to deterministically route one or more users to a specific instance using VPC sharing

Answer: C

NEW QUESTION # 76
An organization wants to process sensitive information using the Amazon EMR service. The information is stored in on-premises databases. The output of processing will be encrypted using AWS KMS before it is uploaded to a customer-owned Amazon S3 bucket.
The current configuration includes a VPS with public and private subnets, with VPN connectivity to the on-premises network. The security organization does not allow Amazon EC2 instances to run in the public subnet.
What is the MOST simple and secure architecture that will achieve the organization's goal?
Response:

- A. Use the existing VPC and configure Amazon EMR in a private subnet with an Amazon S3 endpoint.
- B. use the existing VPS and a NAT gateway, and configure Amazon EMR in a private subnet with an Amazon S3 endpoint.
- C. Create a new VPS without an IGW and configure the VPN and Amazon EMR in a private subnet with an Amazon S3 endpoint.
- D. Create a new VPS without an IGW and configure the VPN and Amazon EMR in a private subnet with an Amazon S3 endpoint and a NAT gateway.

Answer: B

NEW QUESTION # 77
You have two public applications on different domains that use two front-end servers and two back-end servers each. You wish to achieve high availability for both applications. What two options should you configure?
(Choose two.)
Response:

- A. 4 load balancers: 2 public and 2 internal.
- B. Route 53: 2 public zones and 2 private zones.
- C. 3 load balancers: 2 public and 1 internal.
- D. Route 53: 2 public zones and 1 private zone.

Answer: A,B

NEW QUESTION # 78
What must be done to configure an Internet Gateway?
Response:

- A. Create an Internet Gateway, Associate it with a VPC, Configure a Route Table entry pointing to the NAT Gateway.
- B. Create an Internet Gateway, Associate it with a subnet, Configure a Route Table entry pointing to the NAT Gateway.

- C. Create an Internet Gateway, Associate it with a VPC, Configure a Route Table entry pointing to the Internet Gateway.
- D. Create an Internet Gateway, Associate it with a subnet, Configure a Route Table entry pointing to the Internet Gateway.

Answer: C

NEW QUESTION # 79

A network engineer has configured a private hosted zone using Amazon Route 53. The engineer needs to configure health checks for record sets within the zone that are associated with instances.

How can the engineer meet the requirements?

Response:

- A. Create a CloudWatch alarm for the StatusCheckFailed metric and choose Recover this instance, selecting a threshold value of 1
- B. Create a CloudWatch metric that checks the status of the EC2 StatusCheckFailed metric, add an alarm to the metric, and then create a health check that is based on the state of the alarm
- C. Configure a Route 53 health check pointing to an Amazon SNS topic that notifies an Amazon CloudWatch alarm when the Amazon EC2 StatusCheckFailed metric fails.
- D. Configure a Route 53 health check to a private IP associated with the instances inside the VPC to be checked

Answer: B

NEW QUESTION # 80

......

Up to now our ANS-C01 real exam materials become the bible of practice material of this industry. Ten years have gone, and three versions have been made for your reference. They made the biggest contribution to the efficiency and quality of our AWS Certified Advanced Networking Specialty Exam practice materials, and they were popularizing the ideal of passing the exam easily and effectively. All ANS-C01 Guide prep is the successful outcomes of professional team.
