- B. Amount >50000 && ISBLANK(Picklist field)
- C. Amount >50000 && ISPICKVAL(Picklist field, " ")
- D. Amount >50000 && TEXT(Picklist field) = " "

Answer: C,D

NEW QUESTION # 59

Both a sharing rule and an account team give Jose access to the Dixon Chemical account. The sharing rule gives him read access, and the account team gives him read/write access. Will Jose be able to edit the Dixon Chemical account?

- A. Yes
- B. No

Answer: A

NEW QUESTION # 60

AW Computers has created a custom field called Government ID on a custom object. Most users with a custom Sales profile should be unable to access this field. A select group of Sales users called the Institutional Team should be able to access the Government ID field via reports.
How should an administrator accommodate this request?

- A. Mark the field as Read Only on the sales profile. Create a permission set to re-enable reporting for the Institution Team.
- B. Configure a report type with the Government ID field. Assign this report type to the Institutional Team via a permission set.
- C. Create a permission set with Read access to the field. Assign the permission set to the Institutional Team.
- D. Make a report with the Government ID field included. Share this report to the Institutional Team in a public reports folder.

Answer: C

Explanation:
Explanation
A permission set is a collection of settings and permissions that give users access to various tools and functions in Salesforce. A permission set can be used to extend users' functional access without changing their profiles. You can assign permission sets to individual users or groups of users based on their business needs.
In this case, you can create a permission set with Read access to the Government ID field on the custom object and assign it to the Institutional Team users who need access to this field via reports. References:

NEW QUESTION # 61

A sales user is assigned to a permission set group that gives them Modify All access to Accounts. An administrator assigns the same user to a muting permission set that mutes Deletes access on Account.
What level of access will the sales user have on the Account object?

- A. No Access
- B. Modify All
- C. Read-only
- D. Read, Create, and Edit

Answer: B

Explanation:
Modify All is the level of access that the sales user will have on the Account object after being assigned to a muting permission set that mutes Delete access on Account. Muting permissions are a way to reduce or remove access to objects or fields for users who are assigned to permission set groups. Muting permissions can only mute object-level permissions, such as Create, Read, Edit, Delete, View All, or Modify All, but not field-level permissions or other permissions. Muting permissions can only reduce or remove access that is granted by other permission sets or permission set groups within the same permission set group, but not by profiles or other sources of access. Therefore, in this case, the muting permission set will only mute the Delete access on Account that is granted by the permission set group, but not the Modify All access that is also granted by the permission set group.
