Quiz 2026 Useful Nokia 4A0-D01: Nokia Data Center Fabric Fundamentals Exam Hottest Certification

Our latest 4A0-D01 preparation materials can help you if you want to pass the 4A0-D01 exam in the shortest possible time to master the most important test difficulties and improve learning efficiency. Also, by studying hard, passing a qualifying examination and obtaining a 4A0-D01 certificate is no longer a dream. With these conditions, you will be able to stand out from the interview and get the job you've been waiting for. However, in the real time employment process, users also need to continue to learn to enrich themselves. To learn our 4A0-D01 practice materials, victory is at hand.

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.
Topic 2	<ul style="list-style-type: none"> Module 5 – EDA (Event Driven Automation) Introduction
Topic 3	<ul style="list-style-type: none"> SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.
Topic 4	<ul style="list-style-type: none"> Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q27-Q32):

NEW QUESTION # 27

Based on the exhibit output, which of the following statements is TRUE?

□

- A. A cpm-filter is configured to accept ICMP packets, which are then captured in a log file.
- B. A cpm-filter policer is configured to rate limit ICMP packets, which are then captured in a log file.
- C. An ACL filter is configured to accept ICMP packets, which are then processed by the tcpdump-like utility.
- D. capture-filter is configured to copy ICMP packets to the CPM where they are processed by the tcpdump-like utility.

Answer: D

Explanation:

The exhibit shows ICMP packets being captured and displayed by a tcpdump-like utility, which indicates that a capture-filter is configured to copy ICMP packets to the Control Plane Manager (CPM) where they are processed and monitored.

NEW QUESTION # 28

Which of the following statements about configuration checkpoints in Nokia SR Linux is FALSE?

- A. The operator can generate a new checkpoint when committing configuration changes.
- B. Checkpoint 0 is always the oldest checkpoint.
- C. The current running configuration can be saved as a JSON-formatted checkpoint file.
- D. The operator can revert to any existing checkpoint.

Answer: B

Explanation:

In Nokia SR Linux, checkpoint numbering is dynamic. The system assigns the lowest available number to the most recent checkpoint, not necessarily "0." When the number of saved checkpoints exceeds the configured maximum, the oldest checkpoint is removed, and the remaining checkpoints are renumbered accordingly. Therefore, checkpoint "0" is not always the oldest checkpoint.

NEW QUESTION # 29

Which of the following statements about multi-homing in EVPN is FALSE?

- A. The ES identifier (ESI) uniquely identifies an ES and it is locally significant for a particular leaf
- B. Type 1 Ethernet Auto-Discovery (A-D) EVPN route is used to support EVPN multi-homing.

- C. Type 4 Ethernet Segment (ES) EVPN route is used for designated forwarder (DF) election for an ES.
- D. The Ethernet Segment (ES) identifies a set of links that connects a host to one or more leafs.

Answer: A

Explanation:

The Ethernet Segment Identifier (ESI) uniquely identifies an Ethernet Segment (ES) globally across the EVPN domain, not just locally for a particular leaf.

NEW QUESTION # 30

Which of the following is NOT a valid logging source used in Nokia's SR Linux?

- A. Linux facility + priority
- B. **Syslog filter**
- C. Console
- D. SR Linux subsystem + priority

Answer: B

Explanation:

"Syslog filter" is not a logging source; it is a mechanism used to filter log messages. Valid logging sources in SR Linux include Linux facility + priority, console, and SR Linux subsystem + priority.

NEW QUESTION # 31

Which of the following is NOT a function of Nokia's SR Linux application manager?

- A. It manages the SR Linux and customer-defined applications.
- B. **It translates the application's YANG model into protobufs for the IDB.**
- C. It monitors the health of all applications.
- D. It reads the application's configuration information and starts each application.

Answer: B

Explanation:

The SR Linux application manager does not perform the function of translating an application's YANG model into protobufs for the Interface DataBase (IDB). Its primary roles are managing applications, reading their configuration, and monitoring their health.

NEW QUESTION # 32

.....

Actual4test provides you with actual Nokia 4A0-D01 in PDF format, Desktop-Based Practice tests, and Web-based Practice exams. These 3 formats of Nokia 4A0-D01 exam preparation are easy to use. This is a Printable 4A0-D01 PDF dumps file. The Nokia 4A0-D01 PDF dumps enables you to study without any device, as it is a portable and easily shareable format.
