Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q17-Q22):

NEW QUESTION # 17

When creating association roles, which deletion semantic ensures that all content or attached features are deleted if the container or structure is deleted?

- A. Restricted deletion semantic
- B. **Cascade deletion semantic**
- C. Unspecified deletion semantic

Answer: B

Explanation:

Cascade deletion removes all associated content when the container/structure is deleted.

NEW QUESTION # 18

In ArcGIS Utility Network, which type of association allows a transformer to connect to a distribution line even if the two features are not spatially coincident?

- A. Connectivity association
- B. Containment association
- C. Structural attachment association

Answer: A

Explanation:

Connectivity associations allow connectivity between non-coincident features, enabling logical rather than spatial connections.

NEW QUESTION # 19

When creating association roles in ArcGIS Utility Network, what would an unspecified deletion semantic allow if a user attempts to delete a structure feature?

- A. Automatically deletes all associated features along with the structure
- B. Prevents deletion of the structure until all associated features are removed
- C. Allows deletion of the structure while keeping associated network features in place

Answer: C

Explanation:

Unspecified deletion semantic removes associations but leaves network features intact when the container or structure is deleted.

NEW QUESTION # 20

A utility modeler needs to represent a power pole that supports other features in the electric network. Which type of structure feature in ArcGIS Utility Network should be used?

- A. Structure line
- B. Structure boundary
- C. Structure junction

Answer: C

Explanation:

Structure junctions support domain features such as transformers, typically modeled as poles or towers.

NEW QUESTION # 21

If a utility feature does not require terminals, such as when both sides of a device are equal, which configuration should be assigned?

- A. Bidirectional
- B. Directional
- C. Single Terminal

Answer: C

Explanation:

The Single Terminal configuration is applied when no terminals are needed.

NEW QUESTION # 22
