NEW QUESTION # 53

Where can Oracle GoldenGate software be downloaded officially?

- A. Oracle Database Utilities
- B. My Oracle Support
- C. OTN or <http://edelivery.oracle.com>
- D. Oracle Cloud Marketplace

Answer: C

NEW QUESTION # 54

With BATCHSQL enabled, what causes a Replicat to use normal mode operation?

- A. When server memory < 8 GB
- B. Statements that cause errors
- C. Statements with rows between 8k and 24k in length
- D. When BATCHSQL and GROUPTRANSOPS coexist

Answer: C

Explanation:

When BATCHSQL is enabled in Oracle GoldenGate Replicat, it tries to optimize performance by grouping multiple SQL statements and applying them in batches using array operations. However, if an error occurs during the execution of a batched group of statements, GoldenGate automatically switches the Replicat into "normal mode" (i.e., one-by-one row apply) for that transaction to allow better error handling and diagnostics.

The Integrated Extract can use the LogMiner components to collectively read and format the logical change records and create trail entries in the trail file. Which of the following is not a component of the LogMiner?

- A. Reader
- B. Converter
- C. Builder
- D. Preparer

Answer: B

Explanation:

In Oracle LogMiner (used by Integrated Extract), the core components are Reader, Preparer, and Builder - they work together to read redo logs, extract change records, and prepare them for trail file writing. Converter is not a valid LogMiner component.

You want to eliminate the reporting output from processing a Macro. How should you proceed?

- A. Use the optional parameter NOLIST.
- B. Use the optional parameter NOREPORT.
- C. Use the optional parameter UNLIST.
- D. Use the optional parameter NOMACROOUTPUT.
