USGBC LEED-Green-Associate Free Learning Cram & New LEED-Green-Associate Exam Guide

Immediately after you have made a purchase for our LEED-Green-Associate practice dumps, you can download our LEED-Green-Associate study materials to make preparations. It is universally acknowledged that time is a key factor in terms of the success. The more time you spend in the preparation for LEED-Green-Associate Training Materials, the higher possibility you will pass the exam. And with our LEED-Green-Associate study torrent, you can get preparations and get success as early as possible.

USGBC LEED Green Associate Exam Sample Questions (Q327-Q332):

NEW QUESTION # 327

Which label or certification indicates reduced water consumption for appliances?

- A. GREENGUARD
- **B. ENERGY STAR**
- C. ISO 14001:2015
- D. ASHRAE 90.1

Answer: B

Explanation:

ENERGY STAR is a program run by the U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy that promotes energy efficiency. Products that earn the ENERGY STAR label meet strict criteria for energy efficiency and often for water efficiency as well, helping consumers save money on utility bills and protect the environment through energy-efficient products and practices. Reference: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 328

Which is an example of a low-cost Water Efficiency strategy?

- A. Use only compostable toilets throughout the facility
- B. Incorporate an on-site blackwater treatment system
- **C. Install new flush valves or flow restrictors**
- D. Install subsurface cisterns to collect stormwater

Answer: C

Explanation:

Installing new flush valves or flow restrictors is a low-cost strategy to improve water efficiency. These devices reduce the amount of water used in each flush or flow, leading to significant water savings over time.

Other strategies like installing subsurface cisterns to collect stormwater, using only compostable toilets throughout the facility, or incorporating an on-site blackwater treatment system can also improve water efficiency, but they typically involve higher upfront costs. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 329

The Interior space of a six-story commercial building is being completely renovated. Which of the following actions should the design team conduct first in order to incorporate green building strategies?

- A. Benchmark performance of existing building
- **B. Set project goals**
- C. Identify improvement opportunities
- D. Measure performance and undergo third party verification

Answer: B

Explanation:

Explanation

Setting project goals is the action that the design team should conduct first in order to incorporate green building strategies in a six-story commercial building renovation project. Setting project goals is an important step in the integrative process that defines the

vision and expectations for the project's sustainability performance and guides the decision-making throughout the design and construction phases. Setting project goals involves engaging key stakeholders, such as owners, users, designers, contractors, and operators, and identifying measurable objectives, targets, and metrics for various aspects of green building, such as energy efficiency, water conservation, material selection, indoor environmental quality, site selection, and transportation access. The LEED Green Associate Candidate Handbook states that one of the steps in the integrative process is to "establish sustainability goals early in project development" [1, p. 12]. References: LEED Green Associate Candidate Handbook, [Integrative Process | U.S. Green Building Council]

NEW QUESTION # 330

An annual survey is given to the building occupants in which they are asked to rate their comfort level with regards to the heating and air-conditioning, acoustics, air quality, lighting levels and cleanliness. Which building staff member is best equipped to evaluate the responses and develop a corrective action plan to address problems and improve occupants' comfort?

- **A. Facilities Manager**
- B. Leasing Agent
- C. LEED AP
- D. Commissioning (Cx) Agent

Answer: A

Explanation:

Explanation

The Facilities Manager is typically responsible for ensuring the comfort and safety of a building's occupants.

They would be best equipped to evaluate responses to a survey about comfort levels in the building and develop a corrective action plan to address any problems identified. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 331

Which strategy can be used during the building process and after occupation to reduce waste?

- A. Use grey water for flushing of toilets
- **B. Implement a recycling program**
- C. Use certified lumber for framing
- D. Develop a Sustainable Purchasing Policy

Answer: B

NEW QUESTION # 332

.....
